

Updated (2023–24 Formula) Novavax COVID-19 Vaccine

Storage and Beyond-Use Date Tracking Labels

Staff can easily become confused about vaccines within the storage unit because there are so many brands and formulations available. Labeling the area where vaccines are stored can help staff quickly locate and choose the correct vaccine and prevent a vaccine administration error. The following labels are examples that may be used to help organize vaccines. Labels are based on recommendations from the Advisory Committee on Immunization Practices (ACIP) and the Food and Drug Administration authorization.

Updated 2023-2024 Formula
Novavax COVID-19 Vaccine

Store between 2°C and 8°C (36°F and 46°F) up to 9 months.

Ages: 12 years and older

Note the time when the vial is first punctured and use within 12 hours.

Discard vial and any remaining vaccine after 12 hours.

2023-2024
Vaccine

- Store between 2°C and 8°C (36°F to 46°F) up to 9 months
- Protect from light
- Do NOT freeze.

Vaccine Storage Best Practices

- Use the storage labels on page 2 to help staff easily identify the vaccine.
 - Note: Storage labels are formatted to print on 4" x 3-1/3" adhesive labels. We are unable to format for other size labels.
- Depending on how vaccines are organized within the storage unit, labels can be placed on containers or bins or directly attached to shelves where vaccines are stored.
- Other helpful organizational strategies include color-coding labels (e.g., one color for pediatric and another for adult vaccines) and including additional information such as age indications or other information unique to the vaccine.
- Store vaccine vials in their original packaging with lids closed.
