

# NATIONAL HEALTH INTERVIEW SURVEY EARLY RELEASE PROGRAM

**Table 1. Percentages of persons under age 65 who were uninsured, had private health insurance coverage, and had public health plan coverage at the time of interview, by year, and quarter: United States, January 2010–March 2014**

Year and quarter	Uninsured <sup>1</sup>	Private health insurance coverage <sup>2</sup>	Exchange-based private health insurance coverage <sup>3</sup>	Public health plan coverage <sup>4</sup>
2010 full year	18.2 (0.30)	61.2 (0.50)	...	22.0 (0.38)
Quarter 1	17.5 (0.53)	62.6 (0.99)	...	21.2 (0.71)
Quarter 2	19.2 (0.74)	60.9 (0.92)	...	21.2 (0.58)
Quarter 3	18.8 (0.50)	60.6 (0.83)	...	22.0 (0.64)
Quarter 4	17.2 (0.49)	60.6 (0.89)	...	23.5 (0.68)
2011 full year	17.3 (0.29)	61.2 (0.51)	...	23.0 (0.37)
Quarter 1	17.4 (0.49)	61.3 (0.89)	...	22.7 (0.67)
Quarter 2	17.4 (0.48)	61.4 (0.83)	...	22.5 (0.59)
Quarter 3	17.3 (0.54)	60.8 (0.95)	...	23.3 (0.68)
Quarter 4	16.9 (0.51)	61.1 (0.86)	...	23.3 (0.63)
2012 full year	16.9 (0.27)	61.0 (0.47)	...	23.5 (0.37)
Quarter 1	17.6 (0.56)	60.2 (0.93)	...	23.5 (0.64)
Quarter 2	16.0 (0.48)	63.0 (0.90)	...	22.6 (0.68)
Quarter 3	17.0 (0.50)	60.3 (0.84)	...	24.2 (0.67)
Quarter 4	17.2 (0.47)	60.3 (0.80)	...	23.8 (0.59)
2013 full year	16.6 (0.30)	61.0 (0.52)	...	23.8 (0.35)
Quarter 1	17.1 (0.54)	60.3 (0.91)	...	23.9 (0.65)
Quarter 2	16.4 (0.49)	62.1 (0.82)	...	22.9 (0.59)
Quarter 3	16.5 (0.48)	61.2 (0.85)	...	23.7 (0.61)
Quarter 4	16.2 (0.53)	60.5 (0.93)	...	24.5 (0.68)
2014 (Jan. – Mar.)	15.2 (0.47)	61.8 (0.85)	1.4 (0.11)	24.2 (0.68)
Quarter 1	15.2 (0.47)	61.8 (0.85)	1.4 (0.11)	24.2 (0.68)

... Category not applicable.

<sup>1</sup>A person was defined as uninsured if he or she did not have any private health insurance, Medicare, Medicaid, Children's Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, or military plan. A person was also defined as uninsured if he or she had only Indian Health Service coverage or had only a private plan that paid for one type of service, such as accidents or dental care.

<sup>2</sup>Includes any comprehensive private insurance plan (including health maintenance and preferred provider organizations). These plans include those obtained through an employer, purchased directly, purchased through local or community programs, or purchased through the Health Insurance Marketplace or a state-based exchange. Private coverage excludes plans that pay for only one type of service, such as accidents or dental care. A small number of persons were covered by both public and private plans and were included in both categories.

<sup>3</sup>Includes persons who have purchased a private health insurance plan through the Health Insurance Marketplace or state-based exchanges that were established as part of the Affordable Care Act of 2010 (P.L. 111-148, P.L. 111-152). All persons who have exchange-based coverage are considered to have private health insurance and have also been included in the estimate for "private health insurance coverage."

<sup>4</sup>Includes Medicaid, Children's Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, Medicare, and military plans. A small number of persons were covered by both public and private plans and were included in both categories.

<sup>5</sup>The estimates are based on a sample of the population and therefore are subject to sampling error. Standard errors are reported to indicate the reliability of the estimates. Quarterly estimates have larger standard errors than annual estimates due to smaller sample sizes, and this should be taken into account when evaluating the statistical significance of differences between groups and changes over time. Estimates with larger standard errors are less reliable and less precise than estimates with smaller standard errors.

NOTES: These health insurance estimates are being released prior to final data editing and final weighting to provide access to the most recent information from the National Health Interview Survey. The resulting estimates for persons without health insurance are generally 0.1–0.3 percentage points lower than those based on the editing procedures used for the final data files. Occasionally, due to decisions made for the final data editing and weighting, estimates based on preliminary editing procedures may differ by more than 0.3 percentage points from estimates based on final files. Estimates for 2014 are based on data collected from January through March. Data are based on household interviews of a sample of the civilian noninstitutionalized population.

<sup>1</sup>A person was defined as uninsured if he or she did not have any private health insurance, Medicare, Medicaid, Children's Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, or military plan. A person was also defined as uninsured if he or she had only Indian Health Service coverage or had only a private plan that paid for one type of service, such as accidents or dental care.

<sup>2</sup>Includes any comprehensive private insurance plan (including health maintenance and preferred provider organizations). These plans include those obtained through an employer, purchased directly, or purchased through local or community programs. Private coverage excludes plans that pay for only one type of service, such as accidents or dental care. A small number of persons were covered by both public and private plans and were included in both categories.

<sup>3</sup>Includes Medicaid, Children's Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, Medicare, and military plans. A small number of persons were covered by both public and private plans and were included in both categories.

<sup>4</sup>The estimates are based on a sample of the population and therefore are subject to sampling error. Standard errors are reported to indicate the reliability of the estimates. Quarterly estimates have larger standard errors than annual estimates due to smaller sample sizes, and this should be taken into account when evaluating the statistical significance of differences between groups and changes over time. Estimates with larger standard errors are less reliable and less precise than estimates with smaller standard errors.

NOTES: These health insurance estimates are being released prior to final data editing and final weighting to provide access to the most recent information from the National Health Interview Survey. The resulting estimates for persons without health insurance are generally 0.1–0.3 percentage points lower than those based on the editing procedures used for the final data files. Occasionally, due to decisions made for the final data editing and weighting, estimates based on preliminary editing procedures may differ by more than 0.3 percentage points from estimates based on final files. Estimates for 2014 are based on data collected from January through March. Data are based on household interviews of a sample of the civilian noninstitutionalized population.

See footnotes at end of table.

**Table 4. Percentages of persons aged 18–64 who were uninsured, had private health insurance coverage, and had public health plan coverage at the time of interview, by sex, year, and quarter: United States, January 2010–March 2014—Continued**

Sex, year, and quarter	Uninsured <sup>1</sup>	Private health insurance coverage <sup>2</sup>	Public health plan coverage <sup>3</sup>
		Percent (standard error <sup>4</sup> )	
2013 full year	18.3 (0.37)	64.0 (0.51)	19.1 (0.36)
Quarter 1	18.7 (0.62)	63.4 (0.85)	19.3 (0.65)
Quarter 2	17.3 (0.57)	65.9 (0.79)	18.4 (0.59)
Quarter 3	18.9 (0.60)	63.9 (0.81)	18.7 (0.57)
Quarter 4	18.4 (0.67)	62.6 (0.96)	20.2 (0.73)
2014 (Jan.–Mar.)	16.8 (0.59)	65.1 (0.86)	19.3 (0.62)
Quarter 1	16.8 (0.59)	65.1 (0.86)	19.3 (0.62)

<sup>1</sup>A person was defined as uninsured if he or she did not have any private health insurance, Medicare, Medicaid, Children’s Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, or military plan. A person was also defined as uninsured if he or she had only Indian Health Service coverage or had only a private plan that paid for one type of service, such as accidents or dental care.

<sup>2</sup>Includes any comprehensive private insurance plan (including health maintenance and preferred provider organizations). These plans include those obtained through an employer, purchased directly, or purchased through local or community programs. Private coverage excludes plans that pay for only one type of service, such as accidents or dental care. A small number of persons were covered by both public and private plans and were included in both categories.

<sup>3</sup>Includes Medicaid, Children’s Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, Medicare, and military plans. A small number of persons were covered by both public and private plans and were included in both categories.

<sup>4</sup>The estimates are based on a sample of the population and therefore are subject to sampling error. Standard errors are reported to indicate the reliability of the estimates. Quarterly estimates have larger standard errors than annual estimates due to smaller sample sizes, and this should be taken into account when evaluating the statistical significance of differences between groups and changes over time. Estimates with larger standard errors are less reliable and less precise than estimates with smaller standard errors.

NOTES: These health insurance estimates are being released prior to final data editing and final weighting to provide access to the most recent information from the National Health Interview Survey. The resulting estimates for persons without health insurance are generally 0.1–0.3 percentage points lower than those based on the editing procedures used for the final data files. Occasionally, due to decisions made for the final data editing and weighting, estimates based on preliminary editing procedures may differ by more than 0.3 percentage points from estimates based on final files. Estimates for 2014 are based on data collected from January through March. Data are based on household interviews of a sample of the civilian noninstitutionalized population.

DATA SOURCE: CDC/NCHS, National Health Interview Survey, 2010–2014, Family Core component.

<sup>1</sup>A person was defined as uninsured if he or she did not have any private health insurance, Medicare, Medicaid, Children’s Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, or military plan. A person was also defined as uninsured if he or she had only Indian Health Service coverage or had only a private plan that paid for one type of service, such as accidents or dental care.

<sup>2</sup>Includes any comprehensive private insurance plan (including health maintenance and preferred provider organizations). These plans include those obtained through an employer, purchased directly, or purchased through local or community programs. Private coverage excludes plans that pay for only one type of service, such as accidents or dental care. A small number of persons were covered by both public and private plans and were included in both categories.

<sup>3</sup>Includes Medicaid, Children’s Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, Medicare, and military plans. A small number of persons were covered by both public and private plans and were included in both categories.

<sup>4</sup>The estimates are based on a sample of the population and therefore are subject to sampling error. Standard errors are reported to indicate the reliability of the estimates. Quarterly estimates have larger standard errors than annual estimates due to smaller sample sizes, and this should be taken into account when evaluating the statistical significance of differences between groups and changes over time. Estimates with larger standard errors are less reliable and less precise than estimates with smaller standard errors.

<sup>5</sup>Refers to persons who are of Hispanic or Latino origin and may be of any race or combination of races.

NOTES: These health insurance estimates are being released prior to final data editing and final weighting to provide access to the most recent information from the National Health Interview Survey. The resulting estimates for persons without health insurance are generally 0.1–0.3 percentage points lower than those based on the editing procedures used for the final data files. Occasionally, due to decisions made for the final data editing and weighting, estimates based on preliminary editing procedures may differ by more than 0.3 percentage points from estimates based on final files. Estimates for 2014 are based on data collected from January through March. Data are based on household interviews of a sample of the civilian noninstitutionalized population.

Quarter 1	10.1 (0.48)	83.0 (0.62)	8.1 (0.44)

<sup>1</sup>Based on family income and family size, using the U.S. Census Bureau’s poverty thresholds. “Poor” persons are defined as those below the poverty threshold; “Near-poor” persons have incomes of 100% to less than 200% of the poverty threshold; and “Not-poor” persons have incomes of 200% of the poverty threshold or greater. Persons with unknown poverty status are not shown in this table. The percentage of respondents with unknown poverty status was 12.2% in 2010, 11.5% in 2011, 11.4% in 2012, 10.2% in 2013 and 7.8% in the first quarter of 2014. Estimates may differ from estimates that are based on both reported and imputed income. FPL is federal poverty level.

<sup>2</sup>A person was defined as uninsured if he or she did not have any private health insurance, Medicare, Medicaid, Children’s Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, or military plan. A person was also defined as uninsured if he or she had only Indian Health Service coverage or had only a private plan that paid for one type of service, such as accidents or dental care.

<sup>3</sup>Includes any comprehensive private insurance plan (including health maintenance and preferred provider organizations). These plans include those obtained through an employer, purchased directly, or purchased through local or community programs. Private coverage excludes plans that pay for only one type of service, such as accidents or dental care. A small number of persons were covered by both public and private plans and were included in both categories.

<sup>4</sup>Includes Medicaid, Children’s Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, Medicare, and military plans. A small number of persons were covered by both public and private plans and were included in both categories.

<sup>5</sup>The estimates are based on a sample of the population and therefore are subject to sampling error. Standard errors are reported to indicate the reliability of the estimates. Quarterly estimates have larger standard errors than annual estimates due to smaller sample sizes, and this should be taken into account when evaluating the statistical significance of differences between groups and changes over time. Estimates with larger standard errors are less reliable and less precise than estimates with smaller standard errors.

NOTES: These health insurance estimates are being released prior to final data editing and final weighting to provide access to the most recent information from the National Health Interview Survey. The resulting estimates for persons without health insurance are generally 0.1–0.3 percentage points lower than those based on the editing procedures used for the final data files. Occasionally, due to decisions made for the final data editing and weighting, estimates based on preliminary editing procedures may differ by more than 0.3 percentage points from estimates based on final files. Estimates for 2014 are based on data collected from January through March. Data are based on household interviews of a sample of the civilian noninstitutionalized population.
