

## 2003 National School-based Youth Risk Behavior Survey Public-use Data Documentation

---

### Introduction

The Youth Risk Behavior Surveillance System (YRBSS) is an epidemiologic surveillance system that was established by the Centers for Disease Control and Prevention (CDC) to monitor the prevalence of youth behaviors that most influence health. The 2003 national school-based Youth Risk Behavior Survey (YRBS) is one component of the YRBSS.

The YRBS focuses on priority health-risk behaviors established during youth that result in the most significant mortality, morbidity, disability, and social problems during both youth and adulthood. These include: tobacco use; unhealthy dietary behaviors; inadequate physical activity; alcohol and other drug use; sexual behaviors that may result in HIV infection or other sexually transmitted diseases; unintended pregnancies; and behaviors that may result in violence and unintentional injuries, as well as overweight.

The results from the YRBS will be used by CDC to (1) monitor how priority health-risk behaviors among high school students (grades 9-12) increase, decrease, or remain the same over time; (2) evaluate the impact of broad national, state, and local efforts to prevent priority health-risk behaviors; and (3) monitor progress in achieving three leading health indicators and 15 *Healthy People 2010* national health objectives. Results also will be used to help focus programs and policies for comprehensive school health education on the behaviors that contribute most to the leading causes of mortality and morbidity.

### Methodology

The 2003 national school-based survey employed a three-stage cluster sample design to produce a nationally representative sample of students in grades 9-12. The first stage sampling frame contained primary sampling units (PSUs) consisting of large counties, sub-areas of very large counties, or groups of small, adjacent counties. From the 1,262 PSUs, 57 were selected from 16 strata formed on the basis of the degree of urbanization and the relative percentage of black\* and Hispanic† students in the PSU. The PSUs were selected with probability proportional to school enrollment size. At the second sampling stage, 195 schools were selected with probability proportional to school enrollment size. To enable separate analysis of data for black and Hispanic students, schools with substantial numbers of black and Hispanic students were sampled at higher rates than all other schools. The third stage of sampling consisted of randomly selecting one or two intact classes of a required subject (e.g., English or social studies) from grades 9-12 at

\* black or African American, non-Hispanic students

† Hispanic or Latino students of any race

## 2003 YOUTH RISK BEHAVIOR SURVEY

each chosen school. All students in the selected classes were eligible to participate in the survey.

In addition to the national survey conducted by the CDC in 2003, 43 state surveys and 22 local surveys were conducted by state and local education and health agencies. The national dataset is not the aggregate of the individual state and local surveys. The national sample is not representative of states or localities. Data from state and local surveys may be available from the agencies that conducted those surveys. Please contact CDC for further information on obtaining individual state and local data files.

### **Survey Procedures**

Survey procedures were designed to protect the students' privacy by allowing for anonymous and voluntary participation. Students complete the self-administered questionnaire in their classrooms during a regular class period, and record their responses directly on a computer-scannable booklet or answer sheet. Local parental permission procedures are followed before survey administration.

### **Response Rate**

One hundred and fifty-eight of 195 sampled schools participated in the national survey. There were 15,214 usable questionnaires received from the 15,240 completed questionnaires. The school response rate was 81% and the student response rate was 83%, resulting in an overall response rate of 67%.

### **Data Analysis**

In addition to questionnaire variables, the following variables have been added to the data file to support analysis.

**Weight:** A weighting factor was applied to each student record to adjust for nonresponse and for the varying probabilities of selection, including those resulting from the oversampling of black and Hispanic students. The weights were scaled so that a) the weighted count of students was equal to the total sample size and b) the weighted proportions of students in each grade matched national population proportions. Thus the data are representative of students in grades 9-12 in public and private schools in the United States. "WEIGHT" indicates the weight factor assigned to each student record.

**Stratum:** The sample design employed a three-stage cluster sample stratified by racial/ethnic concentration and MSA status. "STRATUM" indicates the stratum the school the student attends was assigned to.

## 2003 YOUTH RISK BEHAVIOR SURVEY

**Primary Sampling Unit (PSU):** PSUs consist of counties, groups of smaller adjacent counties, or sub-areas of very large counties. “PSU” indicates the PSU the school the student attends was assigned to.

**Geographic Region:** In the National YRBS data, students are classified as being from the Northeast, Midwest, South, or West based on the location of the school the student attends.

- **Northeast:** Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont
- **Midwest:** Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin
- **South:** Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia
- **West:** Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming

The YRBS follows the same geographic region codes that the US Census Bureau uses. Geographic Region is coded in the variable “GREG”. **Note:** The YRBS sample was not designed to be representative of each geographic region.

**Metropolitan Status:** In the National YRBS data, students are classified as Urban, Suburban, or Rural based on the location of the school attended by that student. Definitions are as follows:

- **Urban:** School is located inside a Metropolitan Statistical Area (MSA) and inside the "central city."
- **Suburban:** School is located inside an MSA, but outside the "central city."
- **Rural:** School is located outside an MSA.

The coding for a particular school is determined from Census data linked to the school's location during processing. Metropolitan Status is coded in the variable “METROST”. **Note:** The YRBS sample was not designed to be representative of each type of metropolitan area.

### **Software Requirements**

Software that can precisely calculate sampling variances for a design of the complexity described here must be used when analyzing YRBS data. SUDAAN, produced by the Research Triangle Institute, is widely used for this but other packages are available. When using SUDAAN, we recommend using the “with replacement” sampling option, while building in the multiple stages of selection at the stratum and PSU levels into the model. SUDAAN assumes simple random sampling after the first stage of selection while the actual model was clustered at subsequent stages. Thus, SUDAAN-estimated variances

## 2003 YOUTH RISK BEHAVIOR SURVEY

will underestimate the true variances in the vicinity of 3 to 10 percent (based on analysis done by the CDC project contractor).

### **Data Characteristics**

Standardized data files in ASCII, SAS version 6, and SPSS version 9 formats have been prepared for distribution to make the data more widely available. A SAS format library is also available. This data documentation manual contains a detailed description of the files and variables. The data files and an electronic version of this document may be downloaded at no cost from [www.cdc.gov/yrbss](http://www.cdc.gov/yrbss).

### **User Services**

Questions and comments concerning the 2003 national school-based YRBS may be addressed to:

2003 YRBS  
Division of Adolescent and School Health
