Idaho National Laboratory (INL) Site Profile Update

LaVon B. Rutherford, CHP
National Institute for Occupational Safety and Health
Division of Compensation Analysis and Support

July 2013
Idaho Falls, ID

Background

- SC&A conducted a site profile review and identified 38 issues
- Since the initial review some of the documents have been updated
- SC&A and NIOSH are reviewing the issues to determine if they are still applicable
- Of the 38 issues:
  - Ten are closed
  - NIOSH is working on 11 issues
  - SC&A is reviewing 22 issues (6 are in conjunction with NIOSH)

Data Capture Efforts

- A large amount of data was identified for capture in April, May, and June 2012
- The last of the documents were received April 2013
- ORAU completed loading the documents into the Site Research Database on June 2013

White Papers

- In response to some of the issues, NIOSH is developing white papers
- These include:
  - Investigation of the NTA Film Dosimeter Limits of Detection Being Used for INL Dose Reconstruction.
    - Delivery to the work group scheduled for July 2013
  - INL Environmental Monitoring
    - Delivery to the work group scheduled for October 2013
  - Hot Particle issue
    - Delivery to the work group scheduled for late 2013
  - Aircraft Nuclear Propulsion issue
    - Delivery to the work group scheduled for late 2013

Coworker Model

- Internal Coworker model development was initiated in June 2012
  - Complete Quality Assurance (QA) review of data entry should be complete late 2013
  - Additional Data entry from data received April 2013 should be complete late 2013
  - The schedule for completing the model after data entry and QA efforts are complete is still in development

Site Profiles

- Site Profiles will be updated once the issues identified by SC&A have been resolved and the coworker models are complete
- Program Evaluation Report (PER) will be completed, as necessary, after the site profiles are updated
- Based on the results of the PER, NIOSH will send a list of claims to DOL that will require rework
