

Centers for Disease Control and Prevention's  
**DES UPDATE**

**Cancer Risks For DES Daughters**

---

**Wednesday, May 14, 2003**  
**8:30 - 9:30 p.m. EST**

CDC's DES Update invites you to join the third in a series of free telephone conferences designed to present ongoing research and answer questions about potential health risks associated with DES exposure.

DES research expert Elizabeth Hatch, Ph.D., will present recent research findings on cancer risks for DES Daughters. Dr. Hatch has been the primary investigator on several large DES cohort studies. Candy Tedeschi, RNC, OGNP, will also participate to answer questions about clinical implications for recent research findings. She ran a DES screening clinic on Long Island for 30 years and has treated many DES Daughters in her practice.

**Registration is free and required to participate.**

Register online at <http://www.att-rsvp.com>  
or by telephone at **1-877-471-4350**  
using **Conference ID # 682216**.

*Participants only need to supply their first name and location during registration. All information is kept confidential!*

**The deadline to register is May 12, 2003.**
