During this interview, I will ask about policies and practices that affect the health, safety and security of the school environment at this school, such as measures taken to reduce violence, and to reduce alcohol and other drug use at school. When I ask about “policies,” I mean any mandate issued by the state, the local school board, or any other agency that affects your school environment. Please consider any policies officially adopted by your school or district, including policies developed by your school, by your (district/diocese), as well as policies built on model federal or state policies. In addition, I will ask about practices that you might follow to promote the health and well-being of students. Please keep in mind that I will be asking only about policies and practices, not about standard classroom instruction on these topics. If I ask about things that do not apply to this school or that your school does not do, please bear with me.
