

Medical Mortality Data System

Web-MICAR

We at NCHS understand that there is a growing desire for an internet version of MMDS. To help us understand your needs, please provide the following information.

We also encourage you to call us and share your opinions, suggestions, and concerns about bringing MMDS to the internet.

Contact by Phone

Steve Rushing
MMDS Help Desk

Your name and phone or email: _____

Your state or organization: _____

Is there someone else in your organization we should talk to?

(name and phone or email)

Is there someone we may contact about technical issues?

(name and phone or email)

What possible features of Web-MICAR would be important to you?

Check the important features, or rank them, or just write your comments in your own words.

Transmit/Receive your MMDS batches (Backups, Import files, TRANSAX) to/from NCHS via the internet.

Receive upgrades/installations to your current MMDS software via the internet.

Use your browser to log in to NCHS from anywhere and enter records directly into our system.

Send error logs to NCHS via the internet.

Get immediate feedback. Automatically coded records are returned to your system as soon as we receive them.

Other desired features or your comments:
