

NATIONAL CENTER FOR HEALTH STATISTICS (CPC)

(1) Provides national leadership in health statistics and epidemiology; (2) collects, analyzes, and disseminates national health statistics on vital events and health activities, including the physical, mental, and physiological characteristics of the population, illness, injury, impairment, the supply and utilization of health facilities and manpower, the operation of the health services system: health costs and expenditures, changes in the health status of people, and environmental, social, and other health hazards; (3) administers the Cooperative Health Statistics System; (4) stimulates and conducts basic and applied research in health data systems and statistical methodology; (5) coordinates to the maximum extent feasible, the overall health statistical and epidemiological activities of the program and agencies of the Department of Health and Human Services (DHHS) and provides technical assistance in the planning, management, and evaluation of the Department's statistical programs; (6) maintains operational liaison with statistical units of other health agencies, public and private, and provides technical assistance within the limitations of staff resources; (7) fosters research, consultation, and training programs in international statistical activities; (8) participates in the development of national health statistics policy with other Federal agencies; (9) directs the environmental and epidemiological statistics programs of the National Center for Health Statistics (NCHS); (10) provides the Secretary, DHHS with consultation and advice on statistical matters in its role as the Government's principal general-purpose health statistics organization as designated by the Office of Management and Budget (OMB).

Office of the Director (CPC1)

(1) Plans, directs, administers, coordinates and evaluates the total vital, health, and health-related statistics programs of the Center; (2) stimulates basic and applied research and developmental activities; (3) provides national and international leadership in vital and health statistics and epidemiology; (4) conducts a variety of professional activities to provide assistance to government agencies, to foster international relationships, and to improve the broad fields of vital and health statistics and epidemiology; (5) coordinates the Center's activities with public and private health statistical agencies; (6) provides advice and guidance on disease classification problems in the Center; coordinates activities within the Center on classification of diseases and procedures; and has responsibility for development of revision proposals and U.S. position on decennial revisions of the International Classification of Diseases (ICD); (7) directs the Center's environmental and epidemiological statistics programs; (8) provides management and administration for the Center; (9) provides program planning and development for the Center; (10) develops and coordinates legislative activities; (11) directs and coordinates Center activities in support of the Department's Equal Employment Opportunity program; (12) serves as primary liaison between NCHS and the National Center for Health Marketing on communications and marketing science, and its associated research and practice; and (13) releases and disseminates all NCHS statistical products and related activities in a manner consistent with OMB Federal Statistical Agency Director No. 4. (Approved 4/2/2008)

Office of Management and Operations (CPC12)

(1) Participates in the development of policy, long-range plans, and programs of the National Center for Health Statistics (NCHS); (2) plans, coordinates, directs, and provides advice and guidance on management and administrative operations of NCHS in the areas of fiscal management, human capital, employee development, travel, records management, information management, and other administrative related services; (3) manages and coordinates NCHS requirements related to contracts, grants, cooperative agreements, interagency agreement, and reimbursable agreements; (4) reviews the effectiveness and efficiency of the operation and administration of all programs of the Center; (5) conducts management and organizational analyses as well as provides consultation and advice on program reorganizations; (6) plans, directs, and coordinates building support services and work life activities of NCHS; and (7) serves as the Collective Bargaining Official for NCHS.

(Approved 5/27/2014)

Building Operations and Services Staff (CPC122)

(1) Plans, directs, and coordinates facilities support and worklife functions for NCHS; (2) maintains liaison and assures compliance with federal, state, and local government emergency, environmental, postal, safety, security, and health regulations; (3) develops and implements facilities related policies and procedures to maintain compliancy, increase efficiency, and improve customer service; (4) manages facility operations including building maintenance, custodial, lease enforcement, facility improvements, and parking; (5) manages the government vehicle program; (6) manages the NCHS sustainability program to promote environmental, conservation, and recycling stewardship in the workplace; (7) manages logistics support for on- site conferences, meetings, seminars, ceremonies, and other special events; (8) manages the safety program to assure compliancy and to prevent unsafe work practices; (9) manages physical security operations, including; the security guard oversight to safeguard personnel, personal property, equipment, and building resources; (10) manages the personnel identification badge function and serves as the Centers for Disease Control and Prevention (CDC) regional Personal Identification Verification Card Issuing Facility for the issuing the Smartcard; (11) manages the continuity of operations plan to ensure the capability of carrying out essential functions during the lack of access to the primary work facility; (12) manages the lifecycle of personal property, furniture, and equipment to include repair, replacement, loan, donation, and disposition; (13) manages mail center operations and receiving and shipping activities; (14) manages Center-wide copying service; and (15) manages work life activities to support healthy choices and behaviors in the workplace for improving the health and resilience of all employees. (Approved 5/27/2014)

Business Logistics Staff (CPC123)

(1) Facilitates the development, issuance, and implementation of NCHS administrative policies and standard operating procedures; (2) performs assessments to identify and address policy and procedures gaps, and provides advice and guidance on policies and procedures that impact NCHS; (3) serves as the NCHS liaison with the CDC Management Analysis and Services Office regarding delegations of authority, policy and procedures development, internal controls, records and forms management;

(4) manages the NCHS records management program; (5) provides Administrative Officer support services to NCHS offices and divisions; (6) coordinates program and administrative delegations of authority for NCHS and develops appropriate delegating documents; (7) serves as the NCHS liaison with the CDC Ethics Program Activity; (8) develops and disseminates administrative communications via email announcements, web (intranet) and electronic publications; (9) develops and maintains the NCHS business services intranet website(s); (10) develops, conducts, and coordinates NCHS management and business process studies and internal control activities and makes recommendations for improved business service processes; (11) provides oversight, guidance, and coordination of acquisition activities for NCHS; (12) serves as the Centers liaison to the CDC Procurement and Grants Office, providing guidance and assistance to NCHS offices and divisions on the development and administration of contracts, grants, cooperative agreements, interagency agreements and memorandums of understanding; (13) maintains the official NCHS library of administrative policies and procedures; (14) provides electronic forms services for NCHS, including development and inventory management of NCHS administrative forms; (15) manages and coordinates domestic and international travel activities for NCHS, providing guidance on policy and procedures related to travel and providing support for transportation, change of station and travel cards; (16) serves as the NCHS liaison with the CDC Office of the Associate Director for Communication for the development and dissemination of electronic announcements; and (17) manages the conference clearance and approval process for NCHS. (Approved 5/27/2014)

Workforce and Career Development Staff (CPC124)

(1) Serves as advisor and manages human capital activities for NCHS that will improve the Center's organizational effectiveness, employee morale, motivation, and productivity; (2) develops and implements NCHS internal administrative human capital related policies and procedures as appropriate for NCHS and maintains liaison with related staff offices and other officials of CDC; (3) coordinates and manages the NCHS incentive and honor award programs including planning and coordinating the annual NCHS Director's Awards Ceremony; (4) coordinates and manages the NCHS performance appraisal system in accordance with Office of Personnel Management, Department of Health and Human Services, and CDC policies, procedures and regulations; (5) coordinates the processing of personnel actions and activities in the areas of recruitment, staffing and retention of NCHS staff; (6) provides advice and guidance on strategies and tools available to effectively recruit, retain and plan for succession of staff knowledge and skills; (7) directs organizational development activities for NCHS that focus on skill assessment, career counseling, training administration, workforce planning and conflict management; (8) provides advice, guidance and assistance to NCHS on the establishment or modification of position development, organizational structure and functional assignments; (9) coordinates the administration of the NCHS fellowship and intern program; (10) serves as the NCHS diversity champion for NCHS and oversees the implementation of diversity initiatives; (11) coordinates and manages telework and transhare programs; (12) manages the new employee orientation process; (13) serves as liaison with the HRO and NCHS supervisors on employee and labor relations activities; (14) coordinates and provides advice and guidance on a variety of administrative functions related to pay and leave administration; (15) coordinates all activities related to personnel security, ensuring that all employees complete the proper security clearances; and (16) serves as the liaison with the Office of Commissioned Corps Personnel for NCHS Commissioned Officers. (Approved 5/27/2014)

Office of Planning, Budget and Legislation (CPC14)

(1) Provides a focus for short and long range statistical programs, policy development, and program analysis; (2) provides advice on the development of new health statistics programs, translates planning into program proposals for the Center's operations, and organizes Center- wide teams or special work groups for selected high priority initiatives; (3) serves as a focal point for coordination and integration of program activities within NCHS, and facilitates communication within NCHS regarding program and policy issues; (4) assists the Center Director in the assessment of program accomplishments and the development of program planning through a program review process; (5) provides leadership within NCHS on legislative affairs, develops and coordinates the Center's legislative activities, and serves as principal liaison between NCHS programs and executive and legislative branch officials on legislative affairs; (6) serves as principal advisor in areas of resource development and budget formulation; (7) develops fiscal policies, financial management procedures, and systems throughout NCHS, and provides leadership for the direction and improvement of financial management functions; (8) provides overall programmatic oversight of allocated resources; (9) provides planning, operational review and coordination for the NCHS Reimbursable Work Program, and coordinates required clearances of the program; (10) manages and coordinates NCHS' responsibilities for review and clearance under the Paperwork Reduction Act, and serves as principal liaison between NCHS programs and clearance officials in CDC, DHHS, and OMB; (11) assures that NCHS' confidentiality and privacy policy are consistent with legislative mandates, and that these policies and the Privacy Act are clearly articulated and enforced within NCHS; provides policy leadership and guidance on data sharing and data release agreements; and develops and maintains Privacy Act System Notices. (Approved 9/29/2004)

Office of Information Services (CPC15)

The Office of Information Services (OIS) plans and administers complex information services production and dissemination systems for promoting access to, use and value of, health statistics data to Government officials, health organizations, researchers, and academia. (1) Plans, directs, coordinates and evaluates the information services program of the Center; (2) develops standards for information services production and dissemination; (3) conducts a technologically enhanced information services program utilizing state-of-the-art advancements in Internet and external Web-based products and services; (4) coordinates information services with other NCHS divisions and programs to meet Center goals effectively; (5) conducts research to improve methods and operations of information production and dissemination programs, emphasizing Web-based services; (6) designs, develops, and implements state-of-the-art systems for information production and dissemination, emphasizing Web-based systems; (7) provides technical assistance, consultation, and liaison to NCHS, CDC, DHHS, and outside private, domestic, and international organizations on information services programs and services which improve the access to, use, and availability of health statistics data for analysis; (8) promotes the integration of health statistics data information systems; and (9) develops and sustains collaborative partnerships within NCHS, CDC, DHHS, and externally with public, private, domestic, and international entities on health information services programs. (Approved 12/16/2003)

Office of the Director (CPC151)

(1) Provides leadership for the development, conduct, and evaluation of the national health statistics information services program; (2) directs, plans, and coordinates the health information dissemination and information production activities of the Division; (3) develops and administers a research and analytic program to improve the delivery of information services to constituents; (4) determines the most effective mix to provide the Center cost-effective and timely information dissemination, publications, and Internet/Extranet services using in-house and contractor-based resources; (5) provides technical assistance regarding data and information dissemination, publications and Internet services to Federal, State, local, public, and private organizations; and (6) leads development of collaborative partnerships within NCHS, CDC, and DHHS and externally with public, private, domestic, and international entities on health information services and the manner in which health statistics data may be accessed by users. (Approved 12/16/2003)

Information Dissemination Staff (CPC152)

(1) Plans, directs, and coordinates the health statistics information dissemination program for the National Center for Health Statistics; (2) designs, develops, and implements systems to disseminate and promote the use of NCHS data and information products; (3) manages a broad program of electronic dissemination activities using cutting-edge tools such as the Internet, extranet, CD-ROM, and other media; (4) develops and promotes the dissemination of a wide range of other information materials, including brochures, fact sheets, and exhibits to reach general and specialized audiences; (5) develops standards and policies for formatting and organizing electronic data and information products including micro-data, Listserv, publications, Web-only data releases, fact sheets and other dissemination tools; (6) coordinates with NCHS programs to identify, develop, produce, disseminate and market a range of printed and electronic information materials designed to meet user needs; (7) develops and sustains relationships with Federal, State, and local agencies, the scientific and research community, libraries, and national and international health organizations which foster access to and use of NCHS statistical information services; (8) operates a public inquiries program to respond to data and information requests; (9) provides technical assistance to users in acquiring and using NCHS data and information products; (10) conducts and participates in conferences, seminars, workshops, and exhibits to present the information and data of NCHS; (11) evaluates the presentation and dissemination of NCHS information; (12) conducts user surveys to determine users needs and translates these needs into NCHS product development and dissemination plans; (13) researches, evaluates, develops, and implements improved methods of information dissemination; (14) manages the inventory and storage of NCHS information products; and (15) keeps abreast of Federal information dissemination policies and programs. (Approved 12/16/2003)

Information Design and Publishing Staff (CPC153)

(1) Plans, directs, and conducts the NCHS information publishing program; (2) develops, recommends, and implements policies and standards for electronic and printed publishing at NCHS; (3) provides consultation and technical assistance to NCHS programs regarding publication policies, operational procedures, presentation techniques, and graphic services; (4) interprets and applies CDC standards and provides input to CDC officials regarding issues unique to the design and production of NCHS

electronic and printed materials; (5) researches and adopts emerging technology to improve timeliness, cost-savings, and quality of electronic and printed products; (6) directs, coordinates, and provides liaison between NCHS and other agencies on joint information design and publishing projects; (7) provides design and production support for all NCHS published products, including the NCHS Web site; (8) plans, designs, produces, monitors, and administers the NCHS Web site; (9) develops specifications, sets standards, coordinates, and produces NCHS reports; (10) provides graphic and multimedia design services for all NCHS programs; (11) prioritizes, coordinates, and controls all NCHS electronic publications and print products; (12) establishes, administers, and monitors contracts to provide graphics support and printing services for NCHS; and (13) plans, develops and implements systems for tracking production of NCHS electronic information products, printed publications, and graphic products to insure timely releases. (Approved 7/21/2006)

Classifications and Public Health Data Standards Staff (CPC16)

(1) Serves as a nucleus for Public Health data standards and health classifications by fostering the collaborative development of tools and guidelines to enhance the integrity, comparability, quality, and usefulness of the data products from a wide variety of public and private agencies at the national and sub-national levels; (2) establishes and maintains liaison and partnerships with Federal agencies within and outside DHHS and with a wide variety of private and professional organizations to promote uniformity in classifications, data sets, definitions, and related data policies and standards; (3) assures representation of NCHS and takes a leadership role on intra- and interagency task forces and committees reviewing and developing uniform data elements and data sets for diverse health care settings, nomenclatures and classifications; (4) serves as a focal point within NCHS for collaborative activities related to computer-based patient record development; (5) supports the Director, NCHS, as a member of the DHHS Data Council and coordinates NCHS staff support to the Data Council for Public Health data standards activities; (6) provides scientific and technical support and Executive Secretariat services to the National Committee on Vital and Health Statistics (NCVHS), the legislatively-mandated advisory committee to the Secretary, DHHS; (7) establishes and maintains liaison between NCVHS and agencies within DHHS, other governmental agencies, and relevant private and professional organizations; (8) directs and facilitates cross-cutting Public Health data standards activities that involve multiple outside organizations and have important implications for NCHS and CDC programs; (9) provides liaison with standards-setting organizations on emerging data needs and on medical and health classification issues; (10) is responsible for overseeing, coordinating, evaluating, and formulating recommendations for the ICD Family of Classifications and related classifications, by providing the focus within NCHS for the development and execution of classification activities; (11) serves as the focal point and coordinator of U.S. Government activities related to the ICD and maintains liaison with the World Health Organization (WHO), through direction of the WHO Collaborating Center for the Classification of Diseases of North America; (12) provides advice and assistance within NCHS and to other agencies and organizations in the conduct of training activities related to Public Health data standards; conducts training in key areas as appropriate; and promotes appropriate training and educational materials for implementation and use of data sets and classification systems; (13) is responsible for assuring comparability of morbidity classification, using current and subsequent versions of the ICD for morbidity, and recommends revisions to the ICD for morbidity applications as appropriate; (14) assumes full responsibility for the development and implementation of the evaluation program of NCHS for assessment of the adequacy, completeness, and responsiveness of Center

programs both nationally and internationally to the NCHS mission and user needs for data; based on evaluations, makes proposals for changes in NCHS programs or policies; (15) participates with appropriate agencies and organizations to promote the dissemination, adoption, and use of Public Health data standards advocated by NCHS, DHHS, and the NCVHS; to this end, develops comprehensive policy analyses and special reports, and newsletters; (16) directs the work of the Public Health Data Standards Consortium. (Approved 9/20/2002)

Office of Information Technology (CPC17)

(1) Directs, plans and coordinates information technology services for NCHS; (2) serves as the focal point for information technology (IT) research activities for NCHS-wide systems and in that capacity represents NCHS in developing technology partnerships with other agencies, both public and private; (3) maintains knowledge of strategic business processes in the private and public sector, and leads the development of information technology policy planning for NCHS; (4) provides for the development and implementation of the Information Technology Plan for NCHS and directs the maintenance of the information technology architecture of NCHS; (5) serves as the focal point for the NCHS Information Technology Advisory Board and its working groups and serves as a clearinghouse for IT information on issues under consideration by the Board; (6) conducts applied research studies on existing and emerging information technologies and methodologies, and their applicability to NCHS critical business needs; (7) provides information resources management policy coordination for the Center and systems contract support; (8) represent NCHS to other public and private health agencies, foundations and statistical agencies on information technology activities; (9) provides software consultation, data base management, research, design, and support services needed by NCHS survey, registration and administrative systems, emphasizing projects which are not program specific; (10) plans, coordinates and conducts the NCHS computer training activities to enhance the use of information technologies and methodologies by Center staff; (11) manages and administers contracts for Center-wide emerging information technology services; and (12) actively participates with state, national and international agencies, associations, foundations and working groups involved in emerging technologies to enhance the IT environment between NCHS and its partners. (Approved 5/27/2014)

Office of the Director (CPC171)

(1) In partnership with NCHS programs, devises IT practices and procedures and provides direction, planning and evaluation for overall information technology services and infrastructure at NCHS; (2) identifies needs and makes recommendations for procurement of technology and services to support NCHS activities; (3) evaluates and recommends new information technology software and methods in support of NCHS programs; (4) serves as the primary point of contact in NCHS to represent the Center's IT infrastructure service needs to the CDC Information Technology Services Office (ITSO); (5) develops and administers an annual planning process to identify all requirements of NCHS programs for new IT Infrastructure products and services; (6) maintains close collaboration with CDC ITSO and coordinates capital planning and business case development for NCHS IT investments; (7) provides continuous evaluation of the NCHS IT program to certify adherence to all HHS Enterprise Architecture and CDC IT infrastructure policies, and technical standards; (8) provides technical assistance and information exchange services regarding NCHS information technology activities to federal, state and

local, public and private organizations; and (9) represents NCHS at national and international meetings regarding emerging information technologies and methodologies. (Approved 5/27/2014)

Information Technology Solutions and Services Staff (CPC172)

(1) Conducts and evaluates studies on emerging technologies as input to the information resource management planning process and serves as a clearinghouse on these emerging technologies for NCHS; (2) consults and advises for IT project management, information assurance services (e.g., cyber-security, certification and accreditation), and software life-cycle development that enable NCHS business delivery; (3) develops information technology solutions to bridge gaps between enterprise systems, business requirements and program solutions; (4) develops practices and procedures for NCHS information technology services and solution architectures; (5) partners with NCHS Offices and Divisions, outside agencies and the states, to pilot technology solutions that satisfy emerging business requirements for data access, storage, and dissemination; (6) develops and implements NCHS IT strategic planning processes to identify new requirements and to validate existing requirements for IT products and services; (7) provides technical consultation to NCHS Offices/Divisions for contracting of information management services, including solution development and integration of technology innovation; (8) chairs the NCHS Information Resource Governance Board; (9) participates in workgroups, committees and other collaborations that advance information exchange between NCHS and its partners and advancement of technology solutions through state, national and international informatics initiatives; and (10) advises and organizes IT user groups to advance the value of communities of interest/practice in support of IT innovation. (Approved 5/27/2014)

Division of Analysis and Epidemiology (CPCB)

(1) Participates in the development of policy, long-range plans, and programs of the Center, with emphasis on advancing the use of Center data systems; (2) plans, directs, and coordinates the Analysis and Epidemiology Program of the Center; (3) conducts developmental and evaluation research and analysis in the areas of epidemiology, health status, health services utilization, health promotion, and health economics, including methodological issues related to conceptualization and measurement; (4) provides leadership and expertise in the application of statistical techniques to integrate, analyze and report data from multiple and diverse sources; (5) provides consultation and technical assistance to the Center, CDC, the Department and other public and private health agencies at the national and international level on activities on the analysis and interpretation of health statistics; (6) augments the methodological and policy analysis activities of the Center; and (7) focuses on complex methods, analyses, and tools that integrate health data from diverse sources, including research on measurement, linkage, and surveillance of population health and health promotion. (Approved 03/15/2019)

Health Promotion Statistics Branch (CPCBB)

(1) Develops policies, plans, and strategies for the implementation of surveillance and data systems in support of the Department's health promotion and disease prevention objectives; (2) coordinates the health promotion and disease prevention related data collection activities of the Center; (3) serves as liaison with the Department's Office of Disease Prevention and Health Promotion; (4) provides support and technical assistance to state and local health agencies in the areas of statistical assessment and the

use of data for policy development and program planning; (5) coordinates Center activities that assess the progress on the elimination of health disparities; (6) establishes consensus-building processes involving CDC, the Department, state and local agencies, and the private sector to identify priority data gaps on national health promotion objectives and recommends solutions to fill these gaps; and (7) designs, develops, and implements computer data processing systems and software and produces statistical data for analysis. (Approved 03/15/2019)

Measures Research and Evaluation Branch (CPCBD)

(1) Develops and conducts a research program designed to examine significant public health problems, as well as the sources of data available and needed to inform their use in the evaluation of population health initiatives both in the U.S. and internationally; (2) uses statistical data from multiple sources, with an emphasis on Center data and the measures used to collect data for major areas of programmatic interest; (3) conducts multi-disciplinary research focusing on population health and functioning to examine areas of interest including methodological issues related to conceptualization and measurement; (4) collaborates with, and provides leadership, consultation and technical assistance to, others within the Center, the Federal government and internationally; and (5) prepares research and analytic reports for publication and dissemination. (Approved 03/15/2019)

Data Linkage Methodology and Analysis Branch (CPCBE)

(1) Plans, directs, and manages the Center's multi-faceted methodological research program on major public health issues including data linkage and geocoding activities; (2) develops and executes center-wide data linkage and geocoding activities to collect additional information to maximize the scientific value of the Center's population-based cross-sectional and longitudinal health surveys while maintaining respondent confidentiality; (3) develops, plans, and implements studies evaluating the methodology used for the Center's data linkage projects; (4) provides leadership and expert consultation to the Center's data divisions on best practices and methodologies used for data linkage; (5) provides consultation and technical assistance to the research community utilizing the NCHS survey linked data files; and (6) prepares methodological and research reports for publication and dissemination to support the Center's data linkage projects. (Approved 03/15/2019)

Population Health Reporting and Dissemination Branch (CPCBG)

(1) Serves as a focal point for a Center-wide analytical program aimed at the assessment and development of health data from multiple sources designed to facilitate the analysis of population health and emerging public health issues; (2) conducts and coordinates in-depth statistical analyses of special population groups relating to their health characteristics and their health care needs; (3) directs preparation of the Secretary's annual report, Health, United States, on the health status of the Nation to the President and the Congress in compliance with Section 308 of the PHS Act and other recurring and special reports requested by the Department; (4) provides leadership and expertise in the application of sophisticated statistical techniques related to the problem of integrating, analyzing, and reporting data from diverse sources; and (5) conducts research on selected aspects of health status and health services for publication and dissemination. (Approved 03/15/2019)

Division of Vital Statistics (CPCC)

The Division of Vital Statistics (DVS) plans and administers complex data collection systems and conducts a program of methodologic and substantive public health research activities based on the nationwide collection of data from vital records, follow back surveys, and demographic surveys of people in the childbearing ages. (1) Participates in the development of policy, long- range plans, and programs of the Center; (2) directs, plans, and coordinates the vital statistics program of the United States; (3) administers the vital statistics cooperative program, including the National Death Index; (4) develops standards for vital statistics data collection including electronic systems, data reduction, and tabulation; (5) interprets, classifies, and compiles complex demographic, economic, health, and medical data; (6) serves as the United States representative to the World Health Organization (WHO), regarding the International Classification of Diseases (ICD) for mortality data and the classification and coding of cause of death; (7) conducts research to determine cross-national comparability of causes of death to further enhance the ICD and make appropriate recommendations to WHO; (8) conducts research on data collection methodology, survey methodology, data quality and reliability, and statistical computation as related to vital and survey statistics; (9) conducts multidisciplinary research directed toward development of new scientific knowledge on the demographics of reproduction, natality, and mortality; (10) performs theoretical and experimental investigations into the content of the vital statistics data collection effort; (11) develops sophisticated approaches to making vital statistics data available to users, including techniques to avoid disclosure of confidential data; (12) conducts descriptive analyses and sophisticated multivariate analyses that integrate vital statistics data across multiple surveys or data sets; (13) provides technical assistance and consultation to international, State, and local offices with vital registration responsibilities on vital registration, vital statistics, and data processing; (14) researches, designs, develops, and implements state-of-the-art computing systems for collecting, storing, and retrieving vital records and for subsequent analysis and dissemination; (15) conducts methodological research on the tools for evaluation, utilization, and presentation of vital statistics and related survey data and medical classification; (16) assesses the security of the DVS IT systems and data files and develops and implements strategies to minimize any security risks; (17) produces and publishes a wide variety of vital statistics analytic reports and tabulations in multiple formats; and (18) develops and sustains collaborative partnerships within NCHS, CDC, DHHS, and externally with public, private, domestic and international entities on vital statistics programs. (Approved 09/13/2013)

Office of the Director (CPCC1)

(1) Participates in the development of policy, long-range plans, and programs of the Center; (2) provides leadership for the monitoring and statistical evaluation of national vital statistics; (3) directs, plans, and coordinates the statistical and research activities of the Division; (4) develops and administers a research and analytic program in registration and vital statistics; (5) develops policy, practices, and management for the National Death Index program; (6) plans and conducts a program to improve the vital registration and statistics program of the U.S.; (7) conducts studies of new vital registration techniques; (8) recommends content and format of model legislation, regulations, standard certificates, and other aids to registration systems; (9) provides international leadership and consultation on vital registration and statistics issues to other countries; (10) establishes collaborative partnerships within NCHS, CDC, DHHS, and externally with public, private, domestic and international entities on vital statistics

programs; and (11) manages the vital statistics data request program for the Division.
(Approved 09/13/2013)

Data Acquisition, Classification and Evaluation Branch (CPCCB)

(1) Provides policy direction to states regarding vital statistics data acquisition and quality control; (2) promotes state participation in the vital statistics cooperative program and the national death index (NDI) program; (3) develops specifications for coding, editing and processing of vital registration and statistics data; (4) develops and administers funding formulas that determine the level of reimbursement to states and the procurement mechanisms to effect this reimbursement; (5) develops and directs a comprehensive statistical quality assurance program to assure that the data received from each registration area are acceptable for national use; (6) provides technical assistance to states, local areas, other countries, and private organizations on data files, software, training, processing and coding of vital statistics data; (7) in consultation with health departments across the U.S., leads and conducts evaluation studies and other research on issues related to the collection of vital statistics; (8) prepares and publishes information obtained from special projects related to vital registration and statistics data; (9) promotes the development and implementation of best statistical practices throughout the U.S. vital statistics system to maximize the utility of vital statistics data; (10) manages the acquisition of vital statistics data from the 57 registration areas to assure a national file of timely and complete data; (11) directs a comprehensive program of technical assistance and consultation related to mortality medical data classification to states, local areas, other countries, and private organizations; (12) conducts methodological research in data preparation and medical classification of mortality data; and (13) interprets, classifies, codes, keys, and verifies medical and demographic information of value to researchers and public policy officials. (Approved 09/13/2013)

Mortality Statistics Branch (CPCCC)

(1) Establishes the research agenda for mortality statistics in response to public health priorities; (2) converts identified data needs into statistical and research programs to obtain, evaluate, analyze, and disseminate mortality statistics data; (3) conducts research to improve data collection of vital records, record linkage, and sample survey methodologies related to mortality statistics; (4) performs theoretical and experimental research that improves the content of the mortality statistics data collection effort and the timeliness, availability, and quality of mortality statistics data; (5) conducts research into life tables methodology and produces annual and decennial U.S. and State life tables; (6) recommends content of U.S. Standard Certificates; (7) assesses disclosure risk and develops optimal data release strategies that improve policy analysis and decision-making; (8) prepares and publishes descriptive analyses as well as sophisticated multivariate analyses that integrate data across multiple surveys or data sets; (9) conducts research related to the International Classification of Diseases (ICD) and cause of death classification; (10) conducts national and state-specific comparability studies of cause of death classification to facilitate the study of mortality trends across ICD revisions; (11) designs and conducts methodological research to improve the collection, production, use, and interpretation of mortality-related data; (12) collaborates with other agencies and organizations in the design, implementation, and analysis of vital records surveys; (13) develops and promotes training activities related to the collection, production, use and interpretation of mortality statistics; (14) provides leadership to the international community in the use and adoption of automated mortality medical classification systems; (15) provides nosological

assistance and training to DVS medical coding staff and to both nationally and internationally groups in regard to International Classification of Diseases (ICD) information for mortality and new revisions of the ICD; and (16) develops and implements training programs for cause-of-death coding and provides technical assistance to NCHS, other Federal agencies, state, and local governments, non-government agencies, and international agencies. (Approved 09/13/2013)

Reproductive Statistics Branch (CPCCD)

(1) Establishes the research agenda for reproductive statistics in response to public health priorities; (2) assesses information data needs in the fields of reproduction, maternal and child health, family formation, growth, and dissolution; (3) plans and develops statistical and research programs to obtain, evaluate, analyze, and disseminate reproductive statistics data to meet these needs; (4) conducts research to improve data collections on vital records, record linkage, and sample survey methodologies related to reproductive statistics; (5) performs theoretical and experimental research that improves the content of the reproductive statistics data collection effort and the timeliness, availability, and quality of reproductive statistics data; (6) assesses disclosure risk and develops optimal data release strategies that improve policy analysis and decision-making; (7) prepares and publishes descriptive analyses of individual data systems as well as sophisticated multivariate analyses that integrate data across multiple surveys or data sets; (8) conducts methodological research to improve statistics on reproduction, maternal and child health, family formation, growth, and dissolution; (9) recommends content of U.S. Standard Certificates; and (10) provides consultation and advice to members of Congress, the press, and a broad range of researchers and institutions at the international, national, State, and local levels on reproductive statistics data. (Approved 09/13/2013)

Information Technology Branch (CPCCE)

(1) Conducts research into the design, development, and administration of vital statistics information technology systems; (2) performs systems analysis and computer programming of vital registration data; (3) develops technologies, data architectures, security infrastructure, and database management related to vital records, record linkage, and sample surveys consistent with NCHS, CDC and DHHS information technology requirements, policies and architecture; (4) develops, maintains, and employs state-of-the-art information technologies (e.g., relational data bases, Web-enabled applications, applications development and dissemination activities) associated with vital statistics; (5) develops and maintains systems and databases to support the National Death Index program; (6) provides consultation and expert technical assistance to the Division concerning SQL server, web services, networking applications, and other technologies that may arise; (7) prepares and maintains population databases as well as conducts studies on statistical computation and data quality; (8) designs and implements information technology applications to produce final edited and imputed vital statistics and survey data; (9) provides consultation, policy guidance and expert technical assistance NCHS-wide as well as to a broad range of agencies, institutions, federal, local, and international governments, researchers, and individuals, in regard to vital statistics systems design, administration, and usage; (10) manages national vital statistics data files and databases; (11) develops, enhances, and maintains medical classification software and procedures for collecting and processing of mortality medical data in states and at NCHS following HHS Enterprise Life Cycle Framework; and (12) tests, refines, and updates automated coding systems that assist in the production of mortality data. (Approved 09/13/2013)

Division of Health Care Statistics (CPCD)

The Division of Health Care Statistics (DHCS) plans and administers complex data collection systems and analytic programs and conducts a program of methodologic and substantive public health research activities on the health care system and the use of health care services. (1) Participates in the development of policy, long-range plans, and programs of the Center; (2) plans, directs and coordinates the health care statistics program of the Center; (3) develops standards for health care statistics data collection, data reduction, and tabulation; (4) conducts research on data collection methodology, survey methodology, data quality and reliability, statistical computation, and utilization of health care statistics data; (5) conducts multidisciplinary research directed towards development of new scientific knowledge on the provision, use, quality, and appropriateness of ambulatory, hospital, and long-term care; interactions within the health care delivery system; and the effects of the system and its financing on services provided; (6) performs theoretical, experimental, and evaluative investigations into the content of the health care statistics data collection effort; (7) develops sophisticated approaches for making health care statistics data available to users, including techniques to avoid disclosure of confidential data; (8) conducts descriptive analyses and sophisticated multivariate analyses that integrate health care statistics across multiple surveys or data sets; (9) designs, develops, and implements state of the art computing systems for collecting, storing, and retrieving health care statistics data for subsequent analysis and dissemination; (10) provides technical assistance, consultation, and liaison to international, federal, state, and local government agencies, as well as the private sector, on statistics describing health care resources and utilization and future data needs of particular relevance for public health, health services research, and health policy; (11) fosters the integration of health care data systems as well as greater linkages of data for analytic purposes; (12) analyzes and produces and publishes a wide variety of health care statistics reports and tabulations in multiple formats; and (13) develops and sustains collaborative partnerships within NCHS, CDC, and DHHS, and externally with public, private, domestic and international entities on health care statistics programs.

Office of the Director (CPCD1)

(1) Participates in the development of policy, long-range plans, and programs of the Center; (2) provides leadership for the development, conduct, and evaluation of national health care surveys and statistics; (3) directs, plans, and coordinates the statistical and research activities of the Division; (4) develops and administers a research and analytic program to characterize the health care delivery system and patients and providers interacting within it; (5) coordinates activities within the division and with other Center components aimed at obtaining and using health care data from other Federal, state, and local government agencies, as well as from non- government sources; and (6) provides advice and leads development of collaborative partnerships within NCHS, CDC, and DHHS, and externally with public, private, domestic and international entities on health care statistics and the manner in which statistics may impact policy issues.

Ambulatory and Hospital Care Statistics Branch (CPCDB)

(1) Develops and maintains a national register of ambulatory and hospital providers; (2) assesses information and data needs for ambulatory and hospital care statistics, and translates data needs into plans for ambulatory and hospital care surveys, inventories and research activities; (3) prepares

specifications for the collection, coding, editing, and imputation of ambulatory and hospital care statistics data; (4) conducts complex research studies relating to hospital care and ambulatory care facilities and their utilization; (5) converts identified data needs into research, development, and evaluation activities; (6) performs theoretical and experimental research that improves the content of the ambulatory and hospital care data collection efforts and the timeliness, availability, and quality of ambulatory and hospital care data; (7) assesses disclosure risk and develops optimal data release strategies that improve policy analysis and decision-making; (8) prepares and publishes descriptive analyses as well as sophisticated multivariate analyses that integrate data across multiple surveys or data sets; (9) develops and publishes a wide variety of reports and tabulations in multiple formats and arranges for distribution/ dissemination through appropriate media; and (10) provides technical advice and consultation in survey methodology, data collection, quality control, and analysis of ambulatory and hospital data to other health professional personnel and researchers. (Approved 9/12/2007)

Long-Term Care Statistics Branch (CPCDD)

(1) Develops and maintains a national register of long-term care providers and plans for national long-term care surveys and inventories; (2) translates data needs into plans for surveys, inventories and research activities across the spectrum of long-term care; (3) prepares specifications for collection, coding, data entry, editing, and imputation of long-term care data; (4) conducts complex research studies relating to long-term care providers and their utilization; (5) converts identified data needs into research, development, and evaluation activities; (6) performs theoretical and experimental research to improve the content of the data collection effort and improves the timeliness, availability, and quality of long-term care statistics; (7) assesses disclosure risk and develops optimal data release strategies that improve policy analysis and decision-making; (8) prepares and publishes descriptive analyses as well as sophisticated multivariate analyses that may integrate data across multiple surveys or data sets; (9) develops and publishes a wide variety of reports and tabulations in multiple formats and arranges for distribution/dissemination through appropriate media; and (10) provides technical advice and consultation in survey methodology, data collection, quality control, and analysis of long-term care statistics to other health professional personnel and researchers.

Technical Services Branch (CPCDE)

(1) Conducts research into the design, development, and administration of health care statistics information technology systems; (2) performs systems analysis and computer programming of health care statistics data; (3) develops and implements computer technologies, data architectures, security infrastructure, and database management for division programs consistent with Center and Agency information technology requirements; (4) develops, maintains, and employs state-of-the-art information technologies (e.g., relational data bases, Web-enabled applications, applications development tools) in support of data collection, processing, maintenance, analysis, and dissemination activities associated with national health care surveys; (5) advises division staff regarding resources for mainframe, client-server, network, and emerging applications; (6) prepares and maintains databases and file libraries, as well as conducts studies of statistical computation and data quality; (7) produces and disseminates a wide variety of reports and tabulations in multiple formats; (8) develops quality control measures; and (9) provides consultation, policy guidance, and expert technical assistance NCHS-wide as well as to a

broad range of agencies, institutions, federal, local, and international governments, researchers, and individuals, in regard to health care survey and computer systems design and usage.

Division of Health Interview Statistics (CPCE)

The Division of Health Interview Statistics (DHIS) plans and administers complex data collection systems and analytic programs and conducts a program of methodologic and substantive public health research activities based on the collection of data from nationwide and special health interview surveys. (1) Participates in the development of policy, long-range plans, and programs of NCHS; (2) plans, directs, and coordinates the health interview statistics program of NCHS; (3) administers Division programs comprised of national health interview surveys, longitudinal surveys, population-based telephone surveys, targeted follow-up studies, and national and subnational surveys on selected health topics; (4) conducts research on data collection and estimation methodology, survey methodology, questionnaire design, data quality and reliability, and statistical computation related to health and health status assessment; (5) analyzes data and publishes reports on the prevalence and incidence of disease and associated disabilities, health status, health-related behaviors, utilization of health care resources, health insurance status, and other health and well-being related topics; (6) conducts multidisciplinary research directed toward development of new scientific knowledge in areas related to health and health care, population demographics, economics, epidemiology, statistics, and disability; (7) performs innovative theoretical and experimental investigations of the content of health interview surveys; (8) develops sophisticated approaches to making health interview statistics data available to users, including techniques to avoid disclosure of confidential data; (9) conducts descriptive analyses and sophisticated multivariate analyses that integrate data across multiple surveys or data sets; (10) designs, develops, and implements state-of-the-art computing systems for collecting, storing, and retrieving health interview statistics data and for subsequent analysis and dissemination; (11) applies computer systems and software in its programs, consistent with NCHS and CDC information technology requirements; (12) incorporates novel system improvement efforts to maintain timeliness, efficiency, cost effectiveness, and accuracy of data systems over multiple years; (13) conducts methodological research on the utilization, evaluation, and presentation of health interview statistics; (14) produces and publishes a wide variety of health interview statistics reports, papers, and tabulations in multiple formats as well as makes presentations on analyses of such data; and (15) develops and sustains collaborative partnerships with, and provides expert advice and technical assistance to NCHS, CDC, and DHHS and externally with public, private, domestic and international entities on issues regarding health interview statistics data. (Approved 6/1/2004)

Office of the Director (CPCE1)

(1) Participates in the development of policy, long-range plans, and programs of NCHS; (2) provides leadership for the design, development, conduct, and statistical evaluation of the Division's data systems; (3) oversees the analysis and dissemination of national and subnational health interview statistics through national health interview statistics surveys, supplements, and customized population surveys; (4) coordinates the planning and production activities of the Division including data collection, information technology, and data dissemination systems; (5) directs, plans, and monitors the scientific integrity and relevance to public health of the Division's data, publications, services, and other products; (6) develops and administers a research, analytic, and methodological program in health interview

statistics; (7) conducts theoretical and experimental research to improve the usefulness of the Division's statistics and data to policymakers, researchers, and academia; and (8) provides advice and leads development of collaborative partnerships within NCHS, CDC, and DHHS, and externally with public, private, domestic and international entities on issues regarding health interview statistics and the manner in which statistics may impact policy issues. (Approved 6/1/2004)

Data Production and Systems Branch (CPCEB)

(1) Conducts research into the design, development, deployment, and administration of survey and information technology systems to collect, process, and disseminate national health interview survey data; (2) develops system improvement plans and strategies to insure timely, cost-effective, accurate, and confidential data collection and production systems; (3) performs systems analysis and computer programming of health interview statistics data, employing state-of-the-art information technologies in support of data collection, processing, maintenance, analysis, and dissemination activities; (4) develops and adopts computer technologies, data architectures, security infrastructure, and database management for health interview statistics systems that are consistent with NCHS and CDC IT requirements; (5) develops and implements data collection and production standards for the Division's surveys; (6) provides planning for utilization of evolving telecommunication, data access, and network technologies in Division survey efforts; (7) conducts studies and analyses of data collection, processing, and dissemination systems to insure data confidentiality; (8) designs and implements computer applications to produce final edited and imputed health interview survey data and statistics; (9) produces health statistics reports and tabulations of data from health interview surveys in multiple formats; and (10) provides consultation and expert technical assistance NCHS-wide as well as to a broad range of agencies, institutions, federal, local, and international governments, researchers, and individuals regarding systems design and administration for health interview statistics technology systems. (Approved 6/1/2004)

Survey Planning and Special Surveys Branch (CPCEC)

(1) Establishes the design and content of the national health interview surveys and subnational special surveys in response to public health priorities; (2) converts identified data needs into research, development, and evaluation activities and related public health information; (3) designs and conducts methodological, analytical, developmental, and evaluation studies of health interview survey processes, questions, and data; (4) performs theoretical and experimental research on the design and content of the health interview survey in order to improve the timeliness, availability, and quality of the health interview statistics data; (5) plans and conducts special customized population surveys such as the State and Local Area Integrated Telephone Survey (SLAITS) in order to obtain timely state and smaller-area data as well as national data relevant to public health; (6) collaborates with other NCHS programs and through contracts, grants, and interagency agreements with outside sponsors of surveys for the development and implementation of survey questions and data; (7) publishes and presents results of methodological, analytical, developmental, and evaluation studies of special population surveys and data; (8) serves as the NCHS resource on special population surveys data and their use in addressing critical public health issues; and (9) provides consultation and technical assistance to a wide range of researchers and institutions at the state, national, and international levels, addressing the definitions, needs, and uses for national and subnational health interview statistics and data. (Approved 6/1/2004)

Data Analysis and Quality Assurance Branch (CPCED)

(1) Conducts research and analysis on topics relevant to public health using National Health Interview Survey (NHIS) data; (2) plans, develops, and implements analytic techniques and guidelines to assure data quality standards for Division surveys and supplements; (3) prepares scientific papers and presentations on the health status of the population, broad health trends, and characteristics of persons with health problems using data from the NHIS; (4) converts identified health interview statistics data needs into research, development, and evaluation activities; (5) conducts descriptive analyses as well as multivariate analyses that integrate data across multiple surveys or data sets; (6) administers analytic and scientific peer review of manuscripts produced from data collected in the Division's programs; (7) develops and implements a data dissemination plan to address needs of researchers; (8) serves as the NCHS resource on health interview survey data and their use in assessing the prevalence and incidence of disease and associated disabilities, health status, health related behaviors, health insurance status, and other health and well-being related topics; (9) provides interpretations and recommendations regarding public health issues as a result of data analyses from the NHIS; and (10) provides consultation, technical assistance, and liaison to academia, other research groups, and state, federal, and international entities concerning the development, uses, and dissemination of health interview survey data.

(Approved 6/1/2004)

Division of Health and Nutrition Examination Surveys (CPCG)

The Division of Health and Nutrition Examination Surveys (DHANES) plans and administers complex data collection systems and analytic programs and conducts a program of methodologic and substantive public health research activities based on the nationwide collection of data from health and nutrition examination surveys. (1) Participates in the development of policy, long-range plans, and programs of the Center; (2) plans, directs and coordinates the health and nutrition examination statistics program of the Center; (3) administers national cross-sectional, longitudinal and special health and nutrition examination studies responsive to the need for complex health, nutritional, and related public health information; (4) manages and coordinates activities of the World Health Organization (WHO) Collaborating Centre for Health and Nutrition Examination Surveys; (5) conducts research on data collection methodology, survey methodology, data quality, and statistical computation related to health and nutritional status assessment; (6) conducts multidisciplinary research directed toward development of new scientific knowledge in the areas related to health and nutrition status, e.g. determining the causal relationships between risks and outcomes; (7) performs innovative theoretical and experimental investigations into the content of the health and nutrition examination statistics data collection effort; (8) develops sophisticated approaches to making health and nutrition examination statistics data available to users, including techniques to avoid disclosure of confidential data; (9) prepares and publishes descriptive analyses and sophisticated multivariate analyses that integrate health and nutrition examination statistics data across multiple surveys or data sets; (10) consults and provides technical assistance on the assessment of health and nutritional status for application in setting medical standards, evaluation of national programs, and regulatory processes; (11) provides leadership for the National Nutrition Monitoring and Related Research Program; (12) designs, develops, and implements state-of-the-art computing systems and technologies for collecting, storing, and retrieving health and nutrition examination data for subsequent analysis and dissemination; (13) applies computer systems and software for its programs consistent with Center information technology requirements; (14) produces a

wide variety of health and nutrition examination statistics analytic reports and tabulations in multiple formats; and (15) develops and sustains collaborative partnerships within NCHS, CDC, and DHHS, and externally with public, private, domestic and international entities on health and nutrition examination statistics programs.

Office of the Director (CPCG1)

(1) Participates in the development of policy, long-range plans, and programs of the Center; (2) provides leadership for the monitoring and statistical evaluation of national health and nutrition examination statistics; (3) plans, directs and coordinates the statistical activities of the Division; (4) develops and administers a research and analytic program in health and nutrition examination statistics; (5) provides advice and leads development of collaborative partnerships within NCHS, CDC, and DHHS and externally with public, private, domestic and international entities on health and nutrition examination statistics; (6) provides support and focus for DHHS activities in the National Nutrition Monitoring and Related Research Program, coordinating these activities in CDC, DHHS, and other Federal agencies; and (7) manages and coordinates activities of the World Health Organization (WHO) Collaborating Centre for Health and Nutrition Examination Surveys.

Analysis Branch (CPCGB)

(1) Analyzes data and prepares scientific papers on the prevalence of disease or health-related characteristics and the interrelationships of these variables; (2) collaborates in the development and application of analytic techniques and guidelines for the Division's data collection programs; (3) performs innovative health and nutrition examination statistics research activities involving complex data sets; (4) converts identified health examination statistics data needs into research, development, and evaluation activities; (5) conducts theoretical and experimental research to improve the content of the health examination statistics data collection effort; (6) prepares and publishes descriptive analyses as well as sophisticated multivariate analyses that integrate data across multiple surveys or data sets; (7) develops a wide variety of health and nutrition examination statistics reports and tabulations in multiple formats and arranges for dissemination through appropriate media; and (8) administers analysis and scientific peer review of manuscripts for data collected in the Division's data collection programs; and (9) provides technical advice and consultation to academic, international, federal, and state entities regarding nutritional and health examination statistics data.

Informatics Branch (CPCGC)

(1) Conducts applied computer and informatics research on the development of new and novel approaches in integrated survey information systems, database technology, imaging and telemedicine, data transmission, geographical information systems, and metadata registries; conducts research on the design, development, and administration of computer systems for more timely and accurate health and nutrition examination statistics data; (3) develops, implements, and supports technologies, data architectures, and database management for the Division's data collection and analytic programs consistent with state-of-the-art trends in computer and informatics research; (4) implements appropriate technologies to prevent unauthorized access to internal and field data resources including authentication, data encryption, data security, system scanning/probing, and implementation and development of

systems security and policies consistent with Presidential Decision Directives and other Government wide initiatives; (5) performs systems analysis, computer programming, and quality assurance/quality control of health and nutrition examination data; (6) develops and implements standards for the Division's data collection programs and data access (e.g., data dissemination, telemedicine applications); (7) performs special projects related to data on health and nutrition and produces a wide variety of reports and tabulations in multiple formats; and (8) provides advice, policy guidance, and expert technical consultation NCHS-wide and to academic, federal, state, local and international governments, and researchers regarding health and nutrition examination survey information technologies and informatics research. (Approved 11/10/2003)

Operations Branch (CPCGD)

(1) Develops and administers contracts for data collection, engineering, acquisition and maintenance of mobile examination centers (MEC) and medical and computer equipment and receipt and control systems; (2) develops and implements systems for reporting of medical findings, professional readings, and laboratory processing for health and nutrition examination and special studies; (3) develops and conducts engineering and logistical support for survey data collection; (4) designs and conducts research studies on response rates, quality control, and quality assurance of health and nutrition examination statistics data; (5) designs and develops comprehensive outreach programs and survey participant recruitment materials; and (6) prepares and publishes reports and analyses of field operations and performs special projects related to health and nutrition examination statistics survey implementation.

Planning Branch (CPCGE)

(1) Establishes the research agenda for health and nutrition statistics data in response to public health priorities; (2) converts identified data needs into research, development, and evaluation activities and related public health information; (3) directs the planning phase of contractual activities, including pilot testing and workshop development, in support of the Division's data collection programs; (4) plans and develops a statistical program to obtain, evaluate, analyze and disseminate health and nutrition examination statistics to meet these needs; (5) prepares and publishes descriptive analyses as well as sophisticated multivariate analyses that integrate data across multiple surveys or data sets; (6) performs theoretical and experimental research to improve the content of the health and nutrition examination statistics data collection effort and improve the timeliness, availability, and quality of the nutritional and health examination statistics data; (7) participates in the design and development of integrated, automated data collection systems and data file release programs as well as conducts statistical methods research; (8) provides technical oversight of all laboratory aspects of health and nutrition examination studies; and (9) provides consultation and technical assistance to a wide range of researchers and institutions at the state, national, and international levels addressing the definitions, needs, and uses of nutrition and health nutrition examination statistics. (Approved 02/02/2003)

Division of Research and Methodology (CPCH)

(1) Participates in the development of policy, long-range plans, and programs for NCHS; (2) plans, coordinates, stimulates and participates in NCHS' basic and applied research program, including but not limited to research in the fields of mathematical statistics, survey design and methodology, mathematics

and operations research; (3) formulates statistical standards regarding survey design, data collection, coding, data analysis, data presentation, disclosure limitation, and statistical computing for all NCHS data systems and coordinates activities directed at the implementation and maintenance of these standards; (4) supports all of NCHS through consultation in the fields of mathematical statistics, survey design and methodology, cognition and survey measurement, mathematics and operations research, missing data problems, and data dissemination; (5) consults, collaborates and participates in research projects with HHS, CDC and other Federal organizations, State and local governments, universities, private research organizations, and international agencies and organizations; and (6) provides scientific services and facilities on a reimbursable basis to research and health policy communities, principally through the Center for Questionnaire Design and Evaluation Research and the Research Data Center. (Approved 6/11/2015)

Office of the Division Director (CPCH1)

- (1) Participates in the development of policy, long range plans, and programs for NCHS;
- (2) plans, coordinates, and stimulates the NCHS applied and basic research program which includes the fields of mathematical statistics, survey design and methodology, cognition and survey measurement, and automated statistical and graphical technologies, and conducts research in each of these fields; (3) formulates statistical standards regarding the survey design, data collection, coding, data analysis, data presentation, and statistical computing for all NCHS data systems and coordinates activities directed at the implementation and maintenance of these standards; (4) supports all of the NCHS basic and applied research activities by serving as NCHS' consultants in the fields of mathematical statistics, survey design and methodology, and cognition and survey measurement; (5) consults and collaborates on statistical research projects with PHS agencies and other Federal organizations, State and local governments, universities, private research organizations, and international health agencies; and (6) provides administrative, management, and leadership functions for all DRM units. (Approved 6/11/2015)

Collaborating Center for Statistical Research and Survey Design (CPCHB)

- (1) Conducts basic research in mathematical and statistical theory, analysis, and computation to improve the efficiency, quality, confidentiality, and analytical utility of NCHS' data systems and products;
- (2) provides statistical consultation and technical assistance to all NCHS data systems on survey methods, quality control, and design of data systems; (3) investigates and develops new and improved statistical methods for analyzing public health data; (4) conducts basic research regarding the impact of sampling and non-sampling errors on statistical estimation and analysis and develops error profiles of sampling and non-sampling error for NCHS' complex data systems; (5) develops and recommends standards for data presentation, analysis, statistical computing, statistical disclosure limitation, survey design and methodology; (6) promotes the publication and dissemination of research on statistical theory, survey design, and methods research; (7) develops sample design and statistical estimation procedures for NCHS surveys; (8) develops statistical models and innovative survey techniques to extend the analytic potential of NCHS complex sample surveys; and (9) plans for future use of Center data through a continuous research program on statistical theory, survey design, statistical and mathematical methods, statistical computing, and data analysis. (Approved 6/11/2015)

Collaborating Center for Questionnaire Design and Evaluation Research (CPCH)

(1) Promotes and advances interdisciplinary research on the cognitive aspects of survey methods; (2) conducts basic and applied research on the cognitive aspects of the survey response process in order to improve the efficiency and quality of NCHS' data systems; (3) develops new methods for investigating the cognitive aspects of survey data collection and presentation; (4) promotes the dissemination and implementation of cognitive research methods through publications and presentations; (5) develops and tests NCHS survey data collection instruments using cognitive laboratory methods and related innovative questionnaire evaluation methods; (6) provides consultation and technical assistance to NCHS' data systems on questionnaire design issues and other related data collection procedures; and (7) conducts a program of reimbursable applied and basic research, technical assistance, and consultation on questionnaire design and cognitive aspects of survey methods. (Approved 6/11/2015)

Research Data Center (CPCHD)

(1) Facilitates the access of restricted use data to the research community; (2) conducts research in areas related to the development, linkage, analysis, and dissemination of survey data; (3) provides consultation and technical assistance to programs on data collection procedures, confidentiality, disclosure limitation, data linkage, and dissemination; (4) serves as NCHS' primary venue for disseminating restricted use data to the research community; and (5) supports scientific research on disclosure limitation of surveys using micro-data files. (Approved 6/11/2015)
