

# GSK's RSVPreF3 OA Vaccine (AREXVY)

*AREXVY was approved by FDA on May 3, 2023, and is indicated for the prevention of LRTD caused by RSV in adults 60 and older, as a single dose.*

**ACIP June 21, 2023**

Leonard Friedland, MD

Vice President, Scientific Affairs and Public Health

## Presentation Overview

### Efficacy and safety results over 2 full RSV seasons from pivotal Phase 3 Study

- 1 dose of AREXVY provides durable efficacy against RSV-associated LRTD over 2 full RSV seasons, including against severe RSV disease, in adults with underlying comorbidities, and across advancing ages
- 2<sup>nd</sup> dose 12 months after 1<sup>st</sup> dose does not appear to confer additional efficacy in overall population

### Immunogenicity and safety results from 2 co-administration trials with influenza vaccines (adjuvanted, high dose)

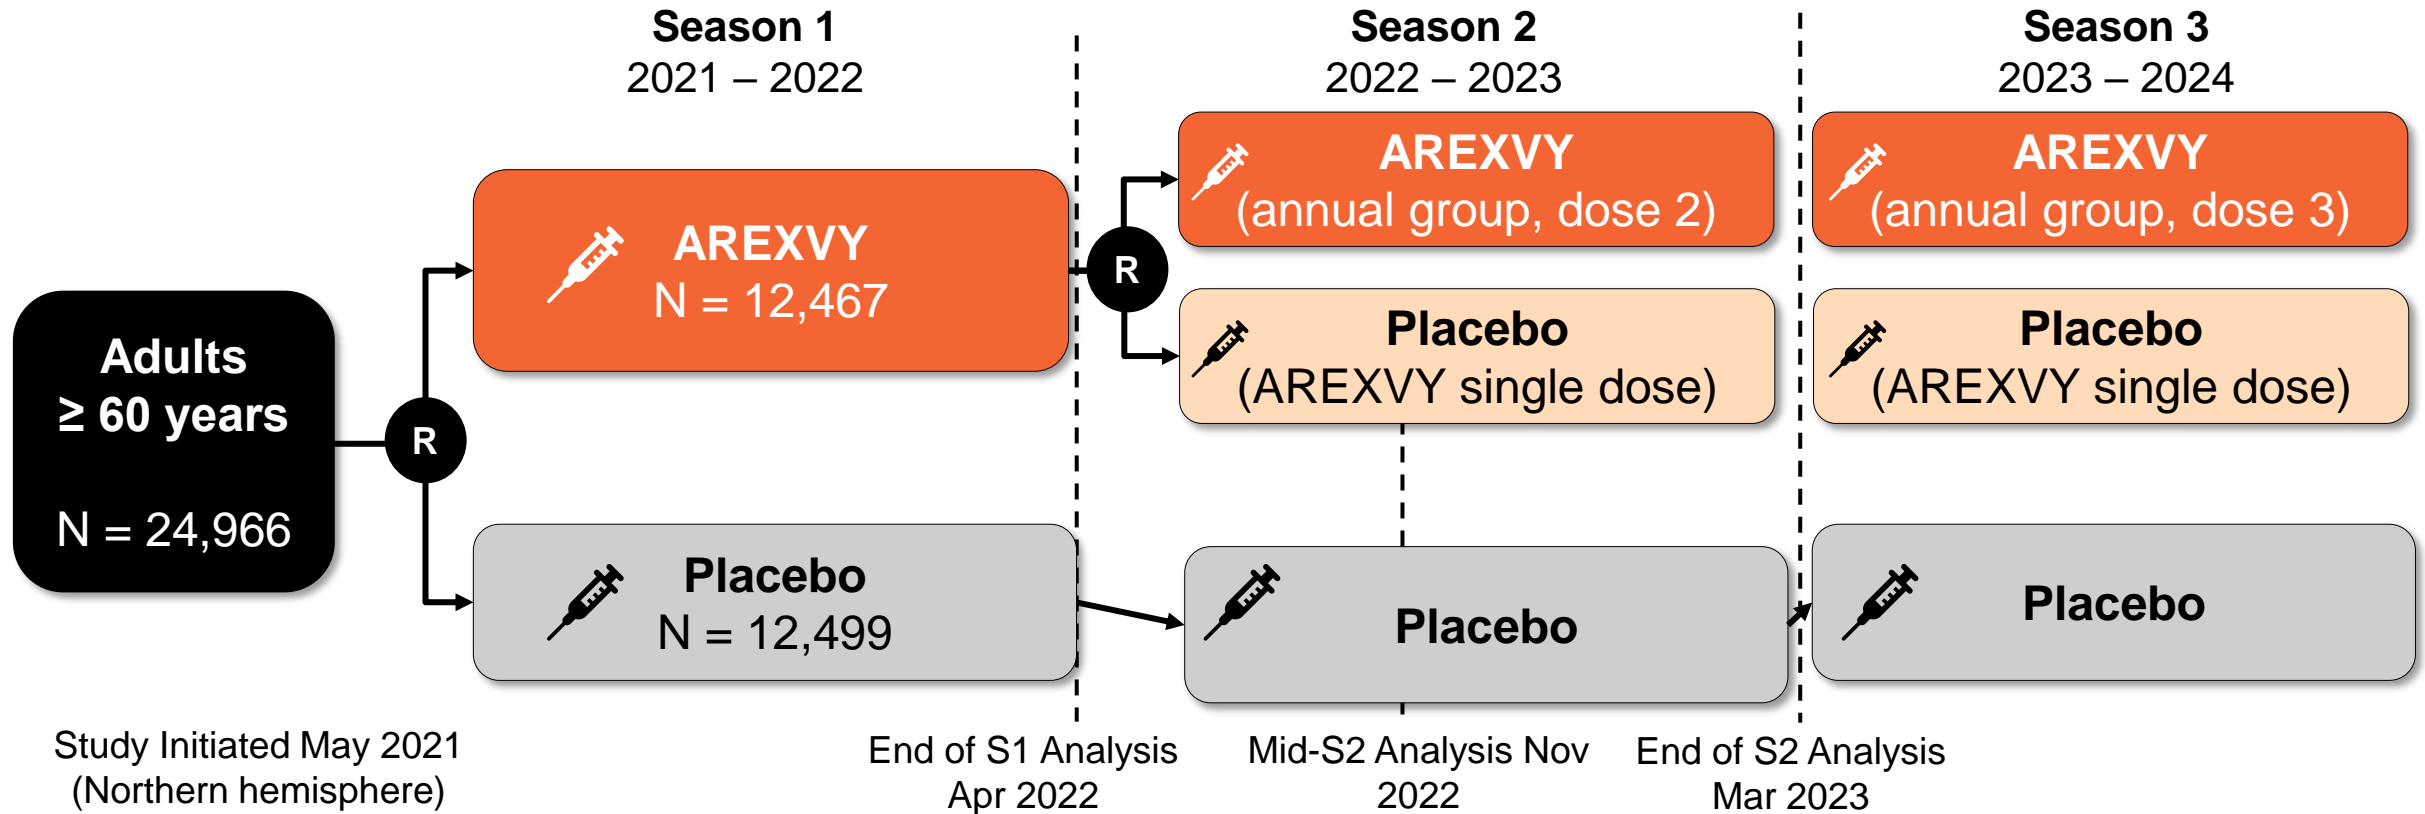

- AREXVY can be administered with all types of commonly used influenza vaccines

# Pivotal Efficacy and Safety Study (AReSVi-006): Results Through 2 Full RSV Seasons

Phase 3, randomized, placebo-controlled, multi-country study to demonstrate efficacy and safety of single and annual revaccination doses in adults 60 years and older

# Ongoing AReSVi-006 Phase 3 Trial Design

Randomized, placebo-controlled, observer-blind, multi-country efficacy study

**Confirmatory secondary endpoint: Evaluate efficacy of AREXVY in prevention of RSV\*-LRTD<sup>†</sup> in adults ≥ 60 YOA over 2 seasons, following a single dose of AREXVY and following annual revaccination dose**

- All RSV-LRTD cases adjudicated by independent external adjudication committee
- Success criterion: lower limit of 2-sided 97.5% CI for vaccine efficacy > 20%

# AReSVi-006 Case Definitions

## ARI

≥ 2 respiratory symptoms or signs  
OR  
 ≥ 1 respiratory and 1 systemic symptom or sign for at least 24 hours

### Systemic symptoms or signs

- Fever/feverishness
- Fatigue
- Body aches
- Headache
- Decreased appetite

### Respiratory symptoms or signs

#### Upper respiratory symptoms or signs

- Nasal congestion
- Sore throat

#### Lower respiratory symptoms

- Sputum
- Cough
- Dyspnea

#### Lower respiratory signs

- Wheezing
- Crackles/rhonchi
- Tachypnea
- Hypoxemia
- O2 supplement

## LRTD\*

≥ 2 lower respiratory symptoms or signs (≥ 1 sign)  
OR  
 ≥ 3 lower respiratory symptoms for at least 24 hours

#### Lower respiratory symptoms

- Sputum
- Cough
- Dyspnea

#### Lower respiratory signs

- Wheezing
- Crackles/rhonchi
- Tachypnea
- Hypoxemia
- O2 supplement

## Severe LRTD\*

≥ 2 lower respiratory signs  
OR  
 episode preventing normal, everyday activities

#### Lower respiratory signs

- Wheezing
- Crackles/rhonchi
- Tachypnea
- Hypoxemia
- O2 supplement

# AREXVY Produces Durable Vaccine Efficacy Against RSV-LRTD in Vulnerable Populations Over 2 Full Seasons

*Vaccine efficacy in frail participants cannot be concluded due to low number of cases accrued*

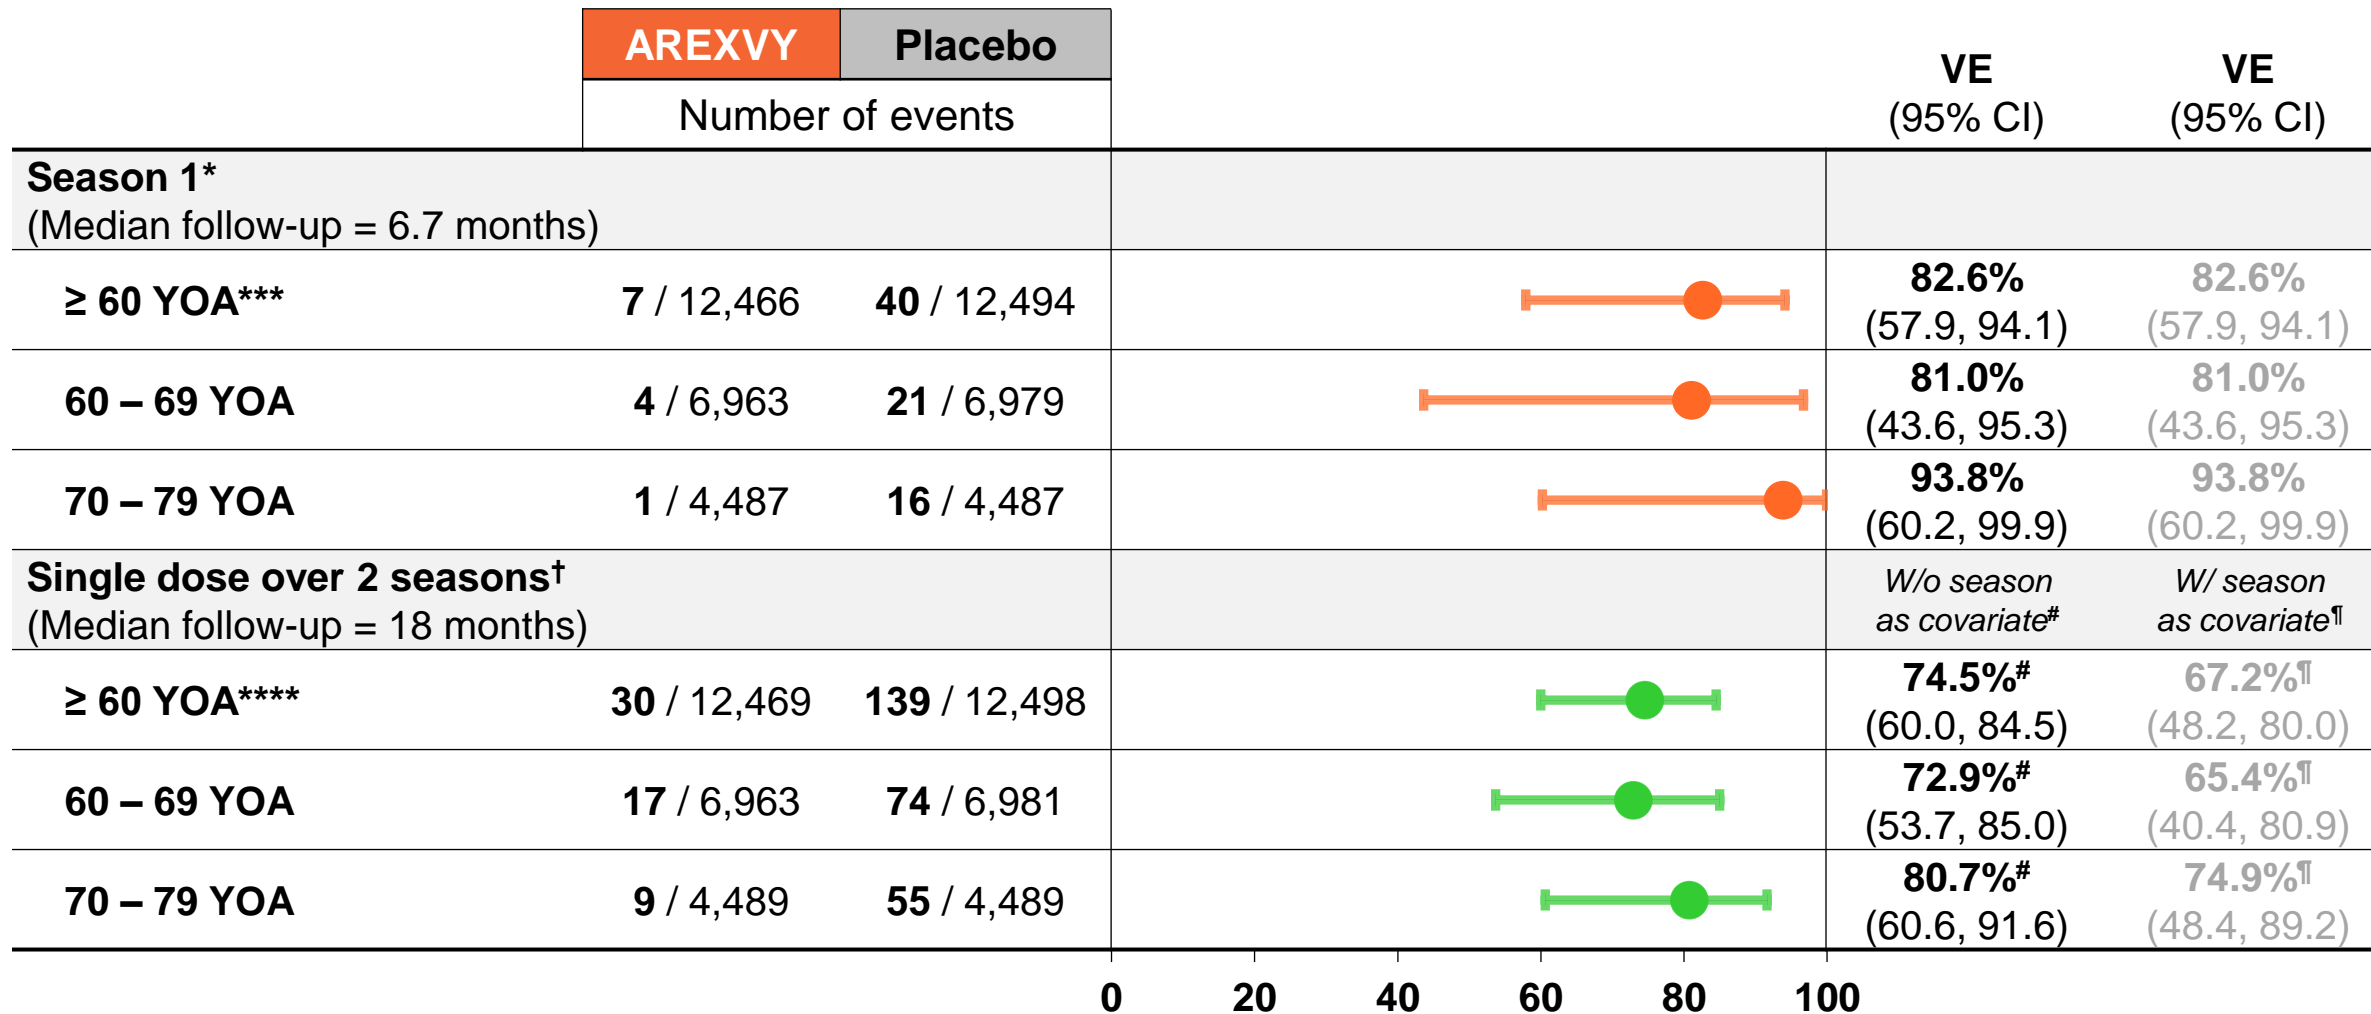

Comorbidities of interest include chronic obstructive pulmonary disease, asthma, any chronic respiratory or pulmonary disease, and chronic heart failure (cardiorespiratory condition) and diabetes mellitus type 1 or type 2 and advanced liver or renal disease (endocrine or metabolic condition)

\*April 2022 analysis; †From 15 days post Dose 1 up to end of Season 2 in Northern Hemisphere

Presentation by GSK at ACIP June 21, 2023

# AREXVY Produces Durable Vaccine Efficacy Against RSV LRTD Across Advancing Ages Over 2 Full Seasons

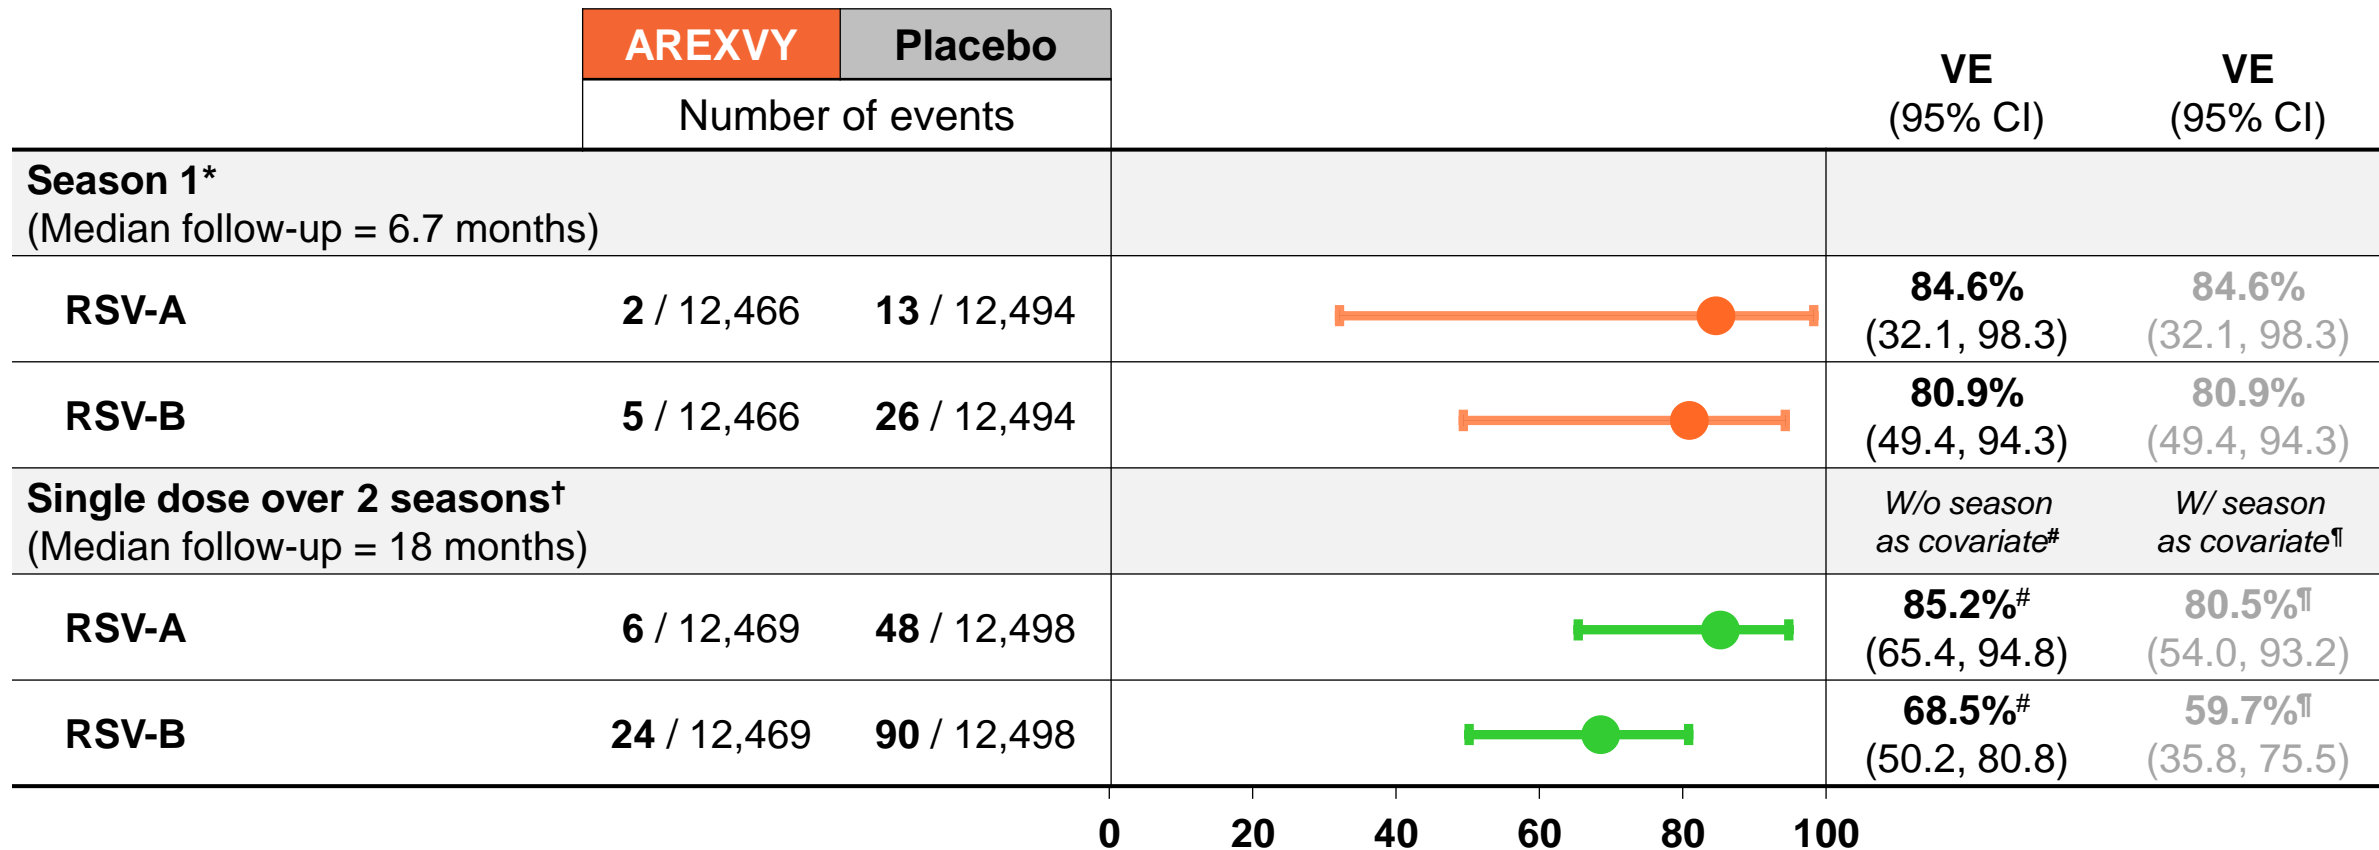

*Vaccine efficacy in adults ≥ 80 years of age cannot be concluded due to low number of cases accrued*

\*April 2022 analysis; \*\*\*96.95% CI; \*\*\*\*97.5% CI; YOA: years of age;

†From 15 days post Dose 1 up to end of Season 2 in Northern Hemisphere

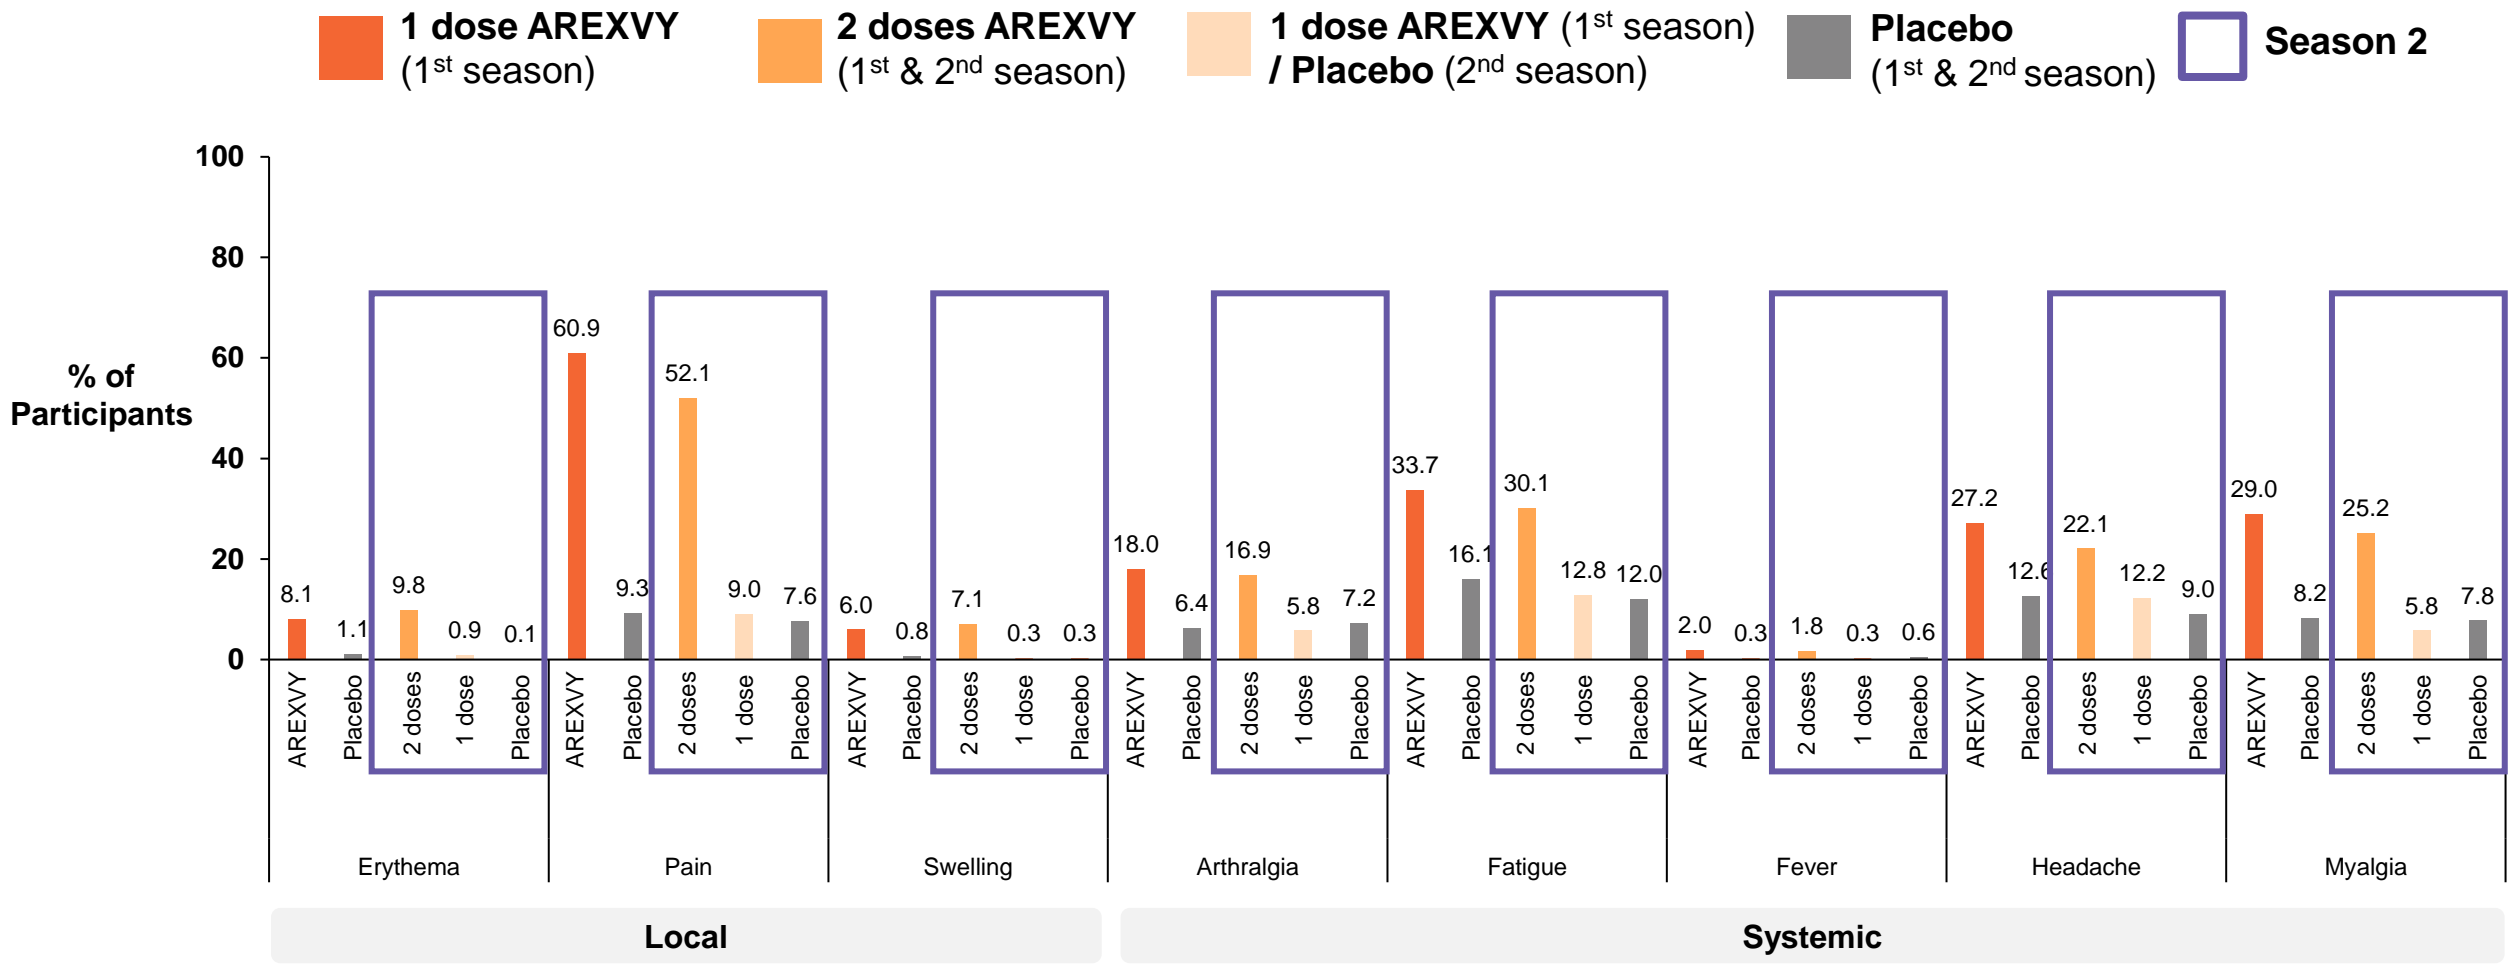

# AREXVY Produces Durable Vaccine Efficacy Against RSV-A LRTD and RSV-B LRTD Over 2 Full Seasons

\*April 2022 analysis; †From 15 days post Dose 1 up to end of Season 2 in Northern Hemisphere

# Reactogenicity Profile of 2<sup>nd</sup> Dose in Line with 1<sup>st</sup> Dose

## Solicited AEs Reported Within 4 Days of Vaccination (Solicited Safety Set)

AREXVY Season 1 n=879; Placebo Season 1 n=878; 2 doses Season 2 n=326 (received AREXVY in Season 1 and Season 2);  
 1 dose Season 2 n=345 (received AREXVY in Season 1 and Placebo in Season 2);  
 Placebo Season 2 n=666 (received Placebo in Season 1 and Season 2)

# Safety Profile of 2<sup>nd</sup> Dose in Line with 1<sup>st</sup> Dose

Unsolicited AEs, SAEs, fatal SAEs, and pIMDs

**Unsolicited AEs**  
Within 30 days

**SAEs**  
Up to 6 months post vaccination

**Fatal SAEs**  
Up to DLP (Season 2)

**pIMDs**

AREXVY Season 1 n=12,467; Placebo Season 1 n=12,499; 2 doses Season 2 n=4,966 (received AREXVY in Season 1 and Season 2); 1 dose Season 2 n=4,991 (received AREXVY in Season 1 and Placebo in Season 2); Placebo Season 2 n=10,033 (received Placebo in Season 1 and Season 2)

DLP: data lock point; pIMD: potential immune-mediated disease

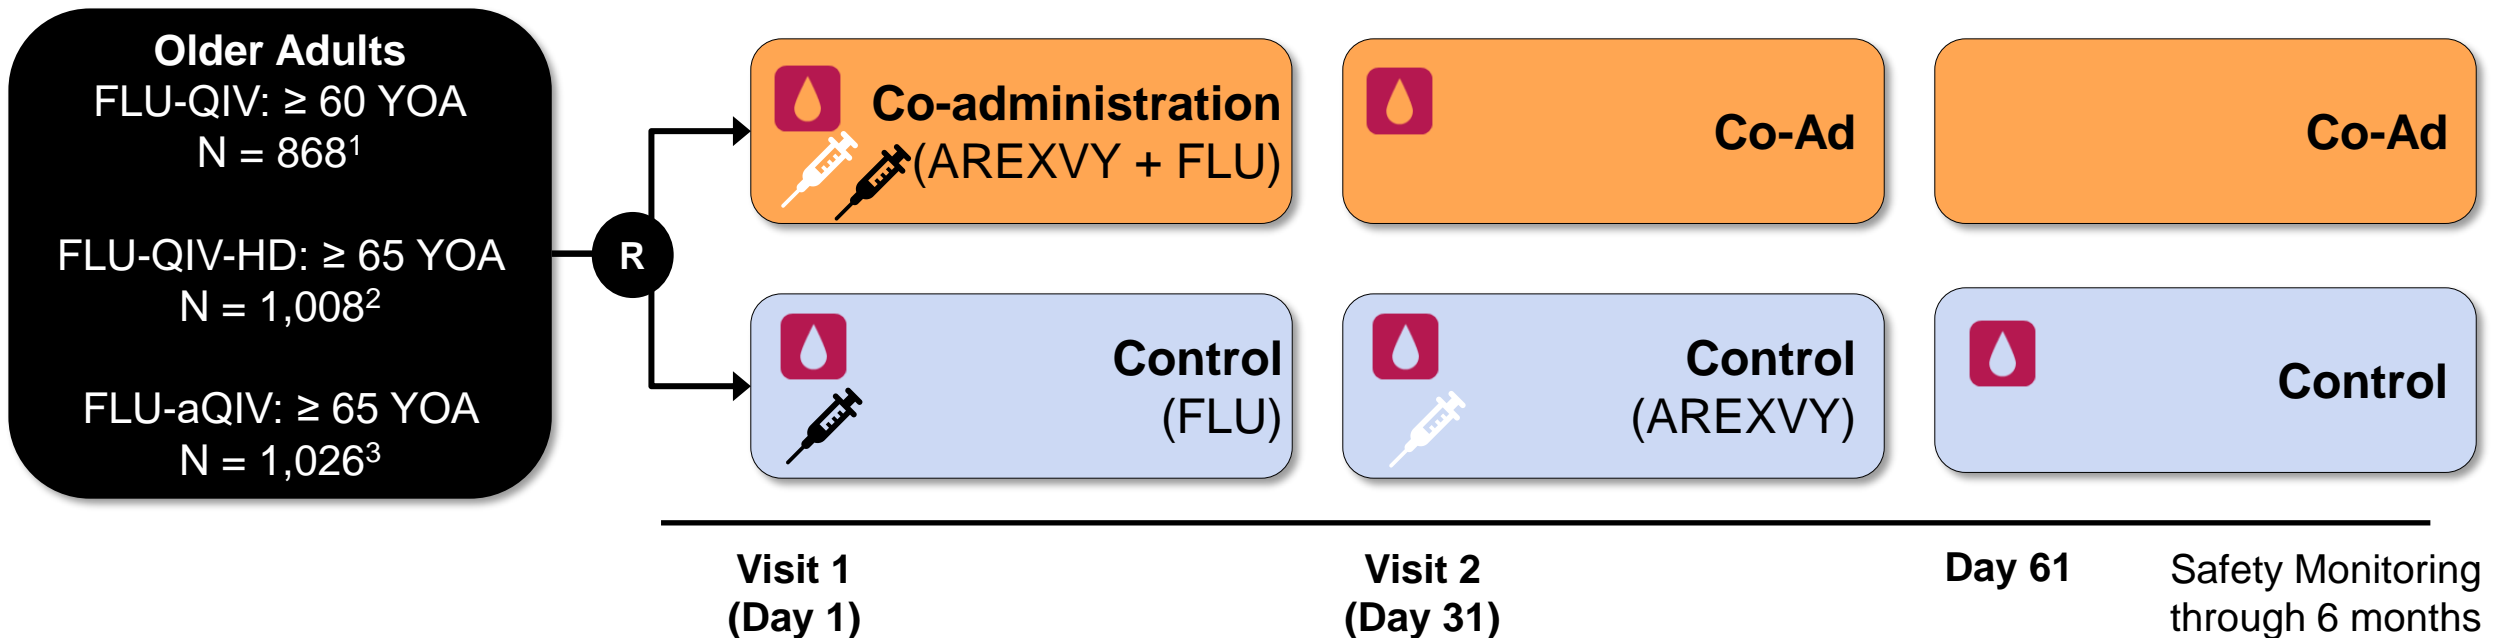

# Influenza Vaccine Co-administration Studies: Immunogenicity and Safety

Open-label, randomized, controlled, multi-country studies to evaluate immune response, safety, and reactogenicity of AREXVY when co-administered with influenza vaccines in adults aged 60 years and above (RSV OA=ADJ-007) or 65 years and above (RSV OA=ADJ-008 and RSV OA=ADJ-017)

# Phase 3 Influenza Vaccine Co-Administration Studies: Designs<sup>1-3</sup>

Open-label, randomized controlled studies evaluating immunogenicity, safety, and reactogenicity of AREXVY co-administered with:

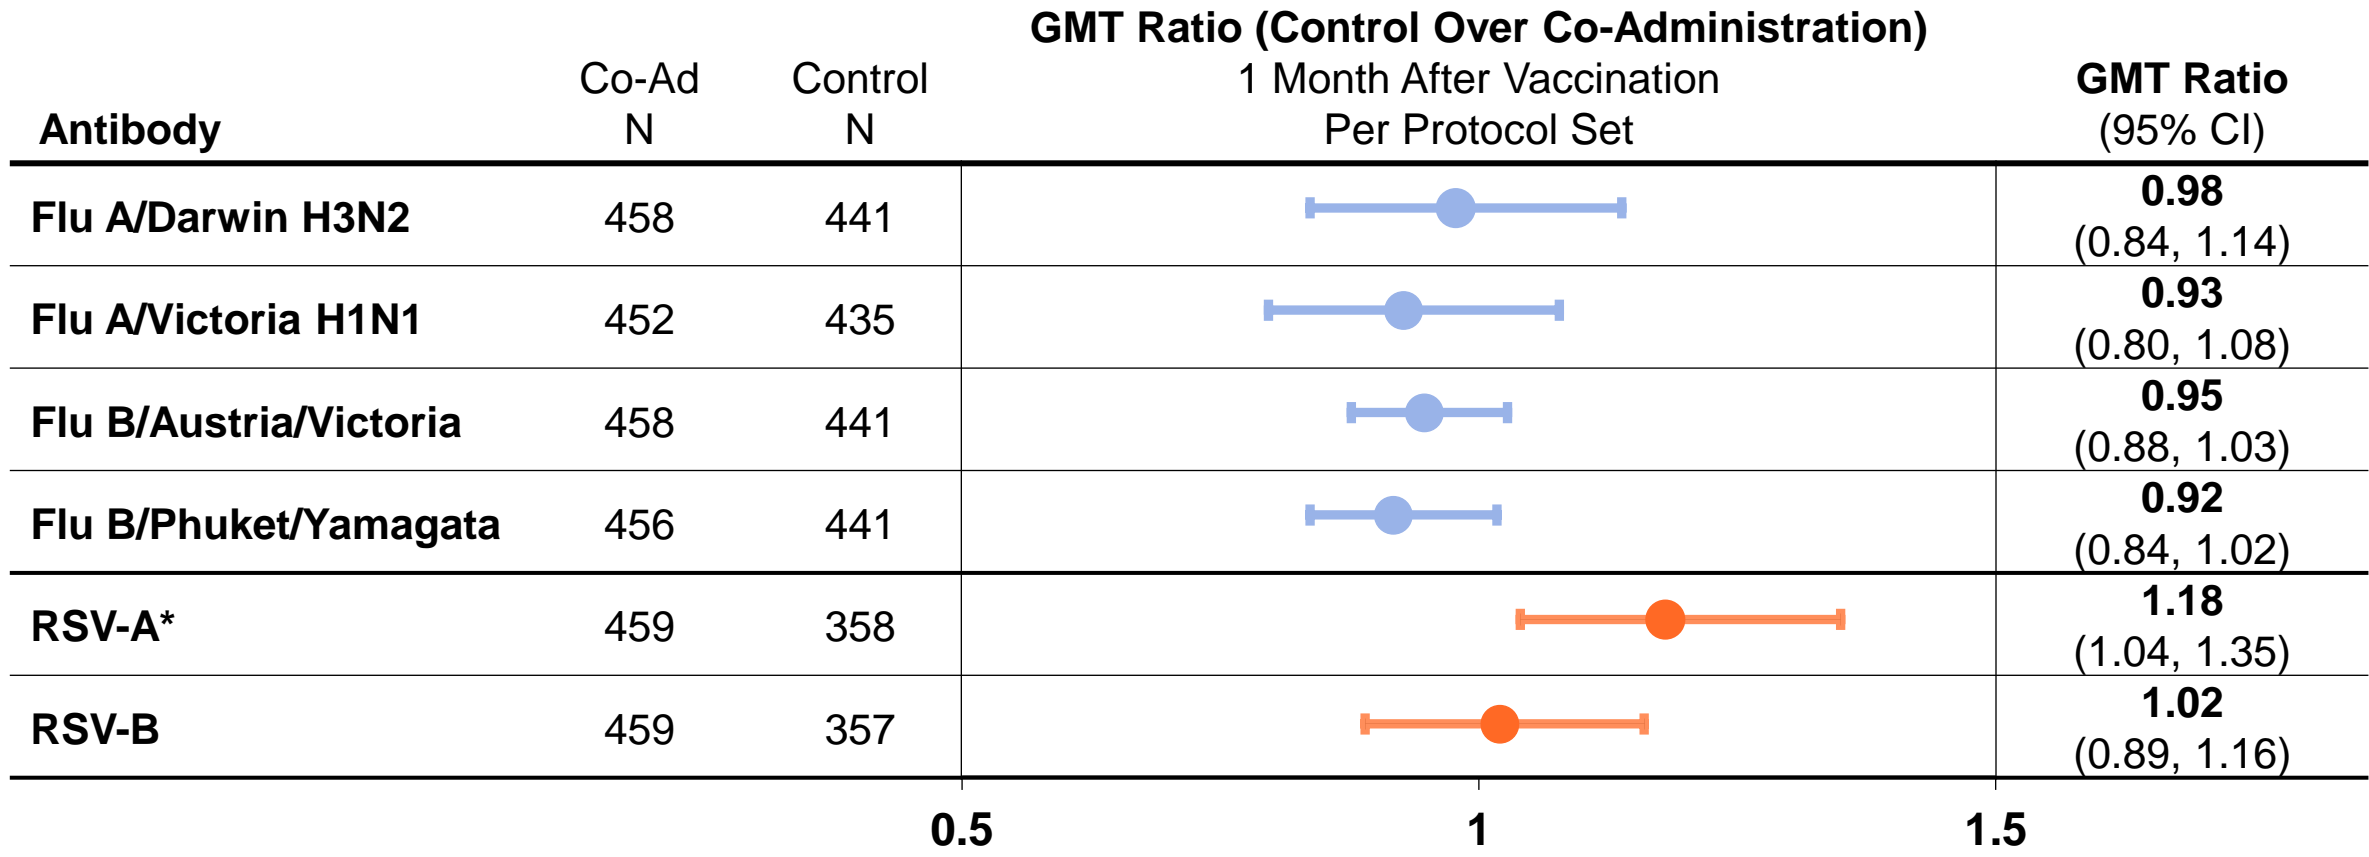

- FLU-QIV (RSV OA=ADJ-007; Southern hemisphere)<sup>1</sup>
- FLU-QIV-HD (RSV OA=ADJ-008; Northern hemisphere)<sup>2</sup>
- FLU-aQIV (RSV OA=ADJ-017; Europe)<sup>3</sup>

Co-Ad group: Participants receiving single dose of RSVPreF3 OA investigational vaccine and single dose of FLU vaccine at Visit 1. Control group: Participants receiving a single dose of FLU vaccine at Visit 1 (Day 1), followed by a single dose of the RSVPreF3 OA investigational vaccine at Visit 2. FLU-aQIV: adjuvanted quadrivalent influenza vaccine; FLU-QIV: quadrivalent influenza vaccine; FLU-QIV-HD: quadrivalent influenza vaccine-high dose. 1. ClinicalTrials.gov, 2022. NCT04841577. <https://clinicaltrials.gov/ct2/show/NCT04841577>; 2. ClinicalTrials.gov, 2023. NCT05559476. <https://clinicaltrials.gov/ct2/show/NCT05559476>;

# Co-Administration of AREXVY and Licensed FLU-QIV-HD

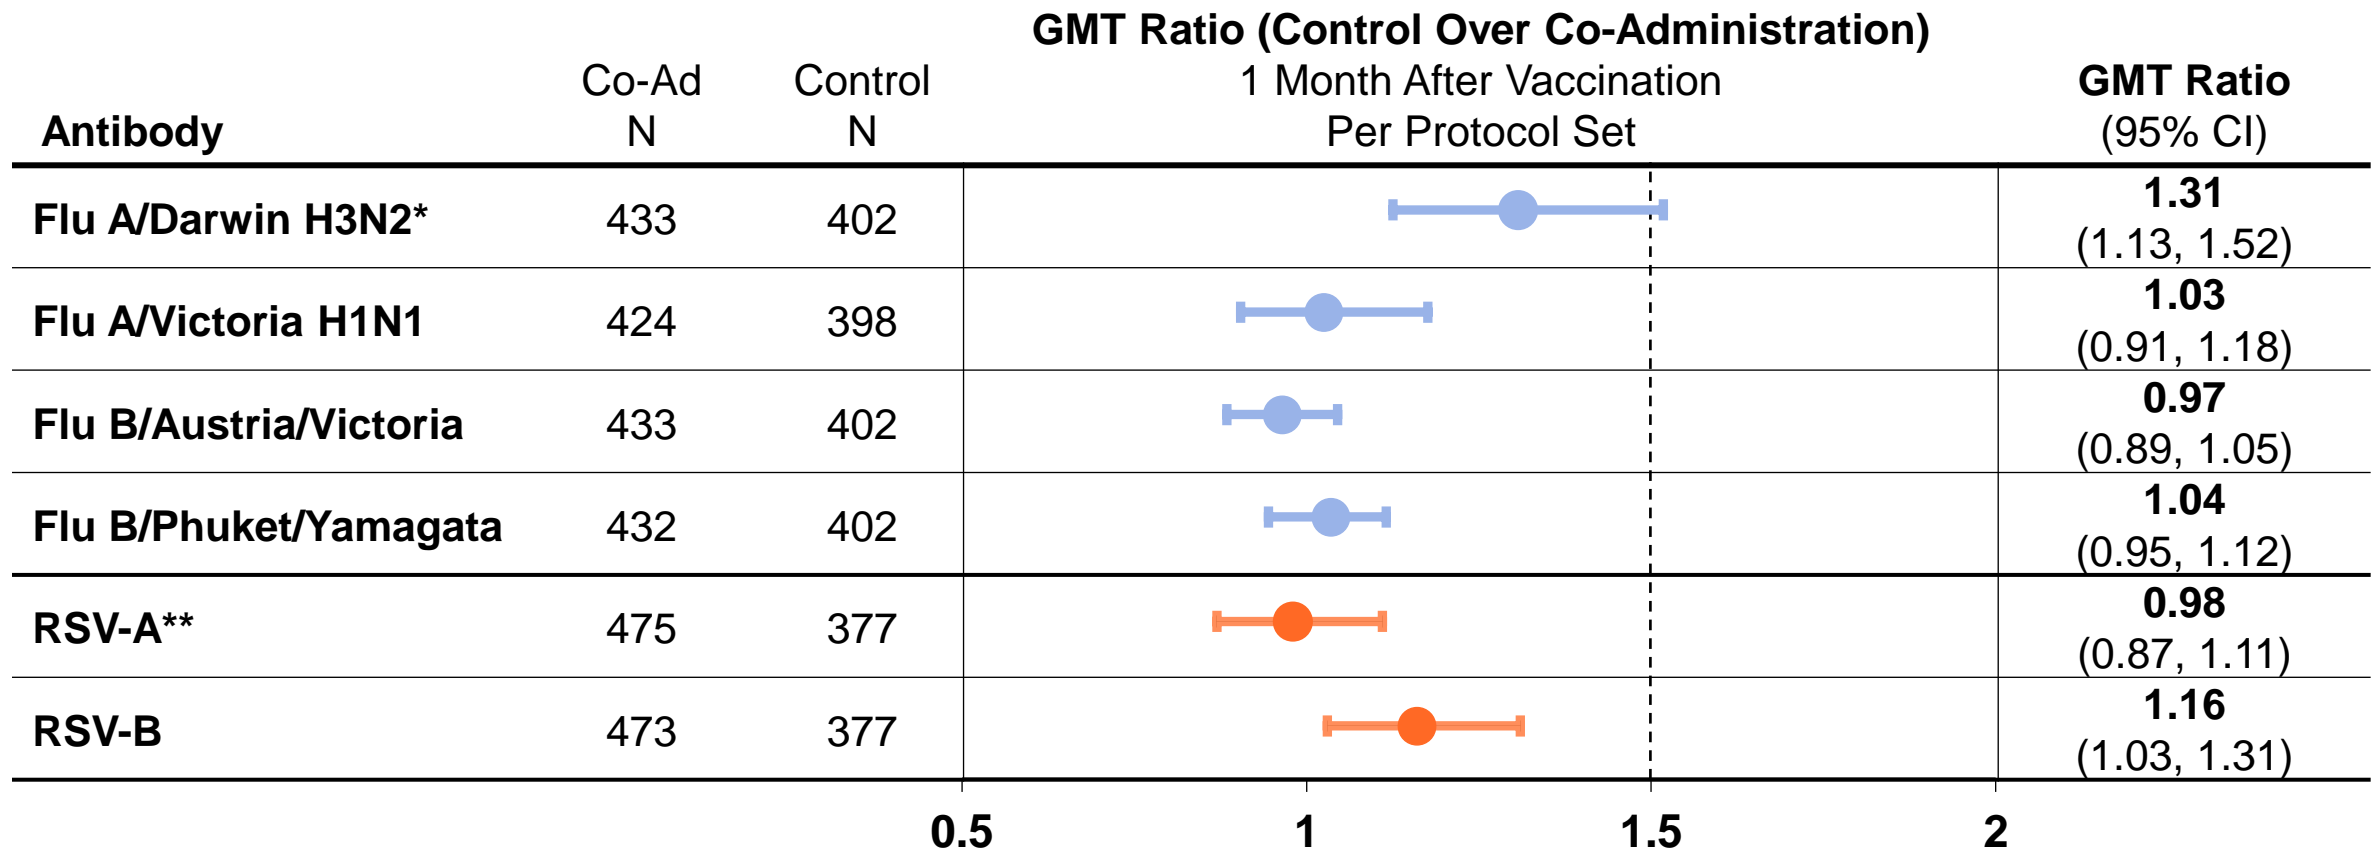

**Success Criteria:** Upper limit ≤ 1.5 of 2-sided 95% CI for Group GMT Ratio (Control Group divided by Co-Ad Group) for RSV vaccine and for each of FLU vaccine strains

\*RSV-A preliminary, final results pending  
 Flu response evaluated using HI and RSV response evaluated using NAb (ED 60); HI: Hemagglutination

# Co-Administration of AREXVY and Licensed Flu-Adjuvanted QIV

**Success Criteria:** Upper limit  $\leq 1.5$  of 2-sided 95% CI for Group GMT Ratio (Control Group divided by Co-Ad Group) for RSV vaccine and for each of FLU vaccine strains

\*Lower HI titers observed than expected, investigation ongoing; \*\*RSV-A preliminary, final results pending  
Flu response evaluated using HI and RSV response evaluated using NAb (ED 60); HI: Hemagglutination

# Modified Set: Solicited Local AEs Within 4 Days Post Vaccination

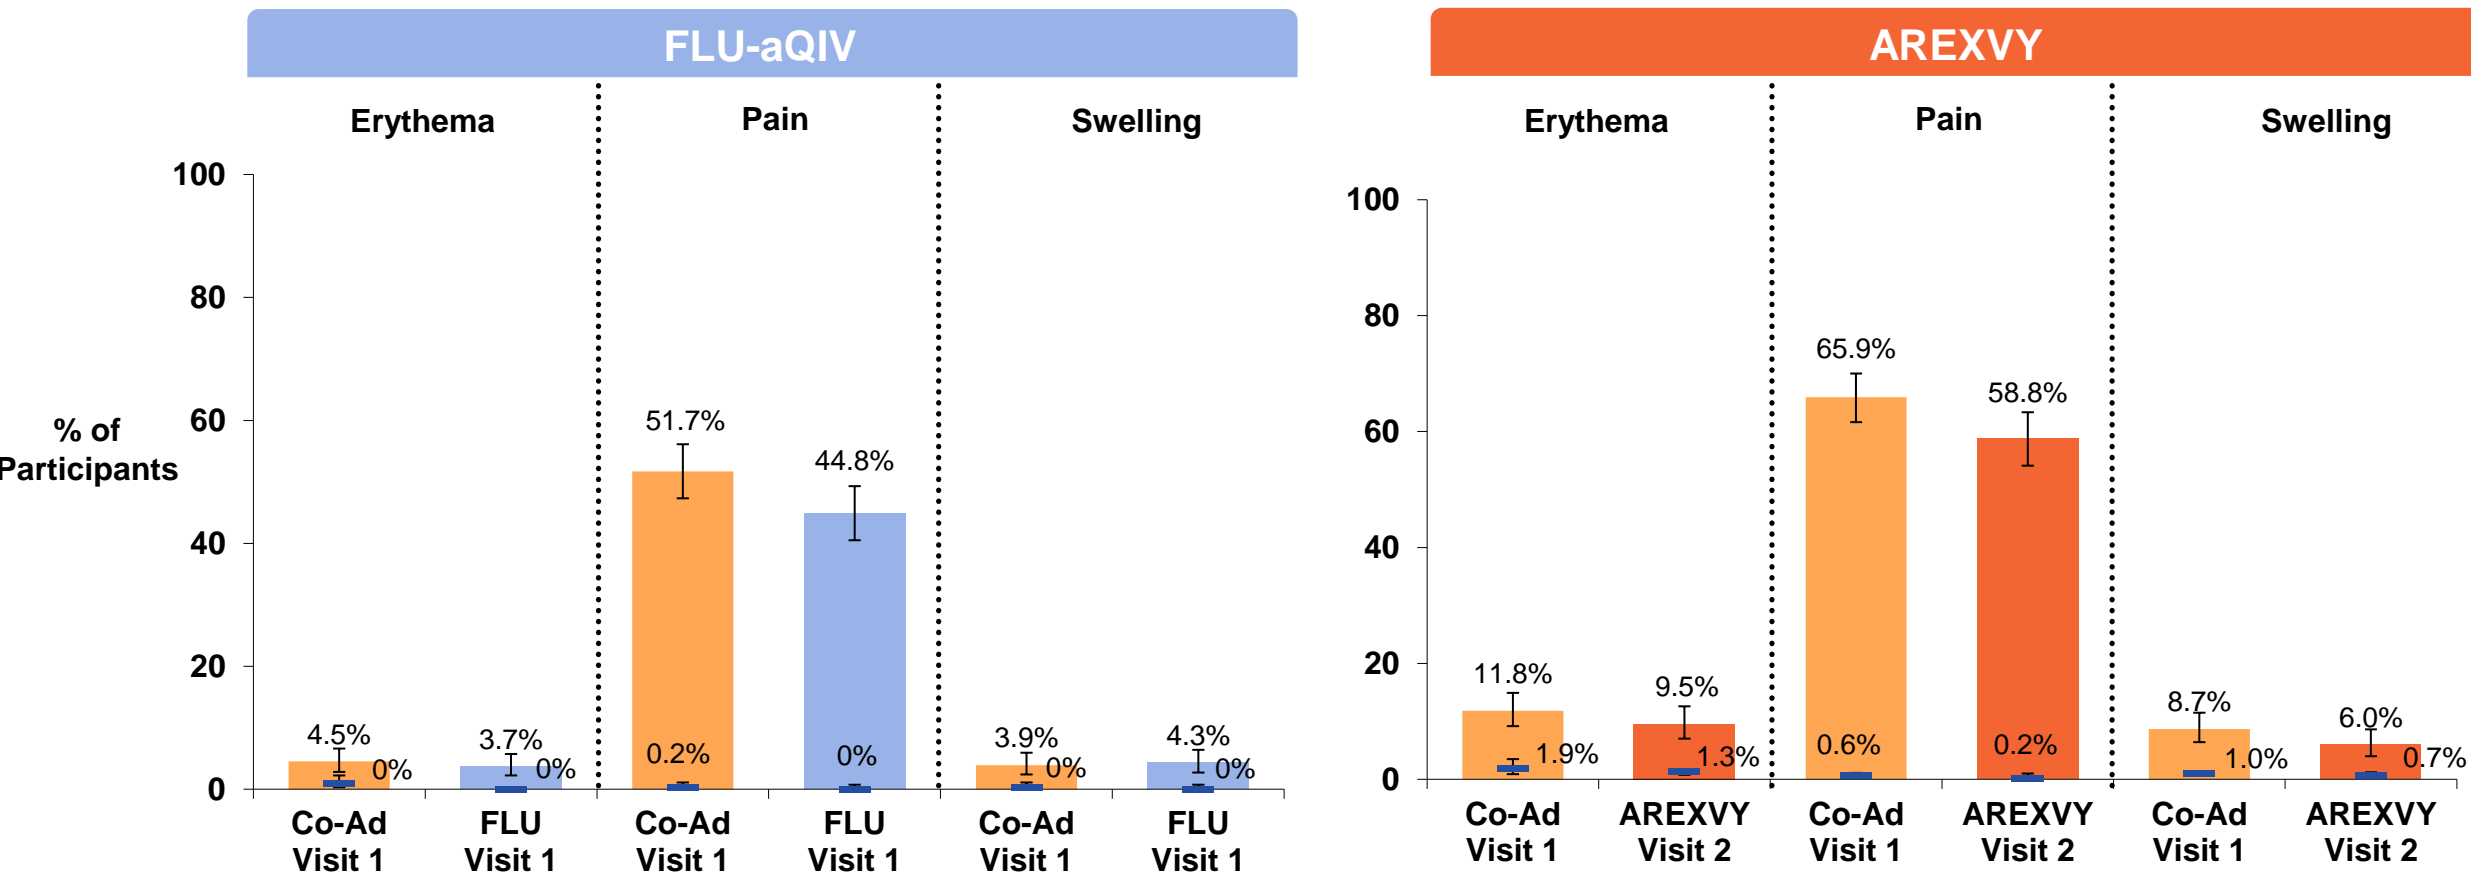

Co-Ad FLU AREXVY Grade 3

Grade 3: > 100 mm for erythema and swelling; Grade 3 pain: significant pain at rest; prevents normal everyday activities. Fever: temperature  $\geq 38.0$  C/100.4 F by any route (oral, axillary or tympanic); Grade 3 fever: > 39.0 C/102.2 F. Grade 3 headache, fatigue, myalgia, arthralgia: preventing normal activity

## Solicited Systemic Adverse Events

Grade 3: >100 mm for erythema and swelling. Grade 3 pain: significant pain at rest; prevents normal everyday activities.

Fever: temperature  $\geq 38.0^{\circ}\text{C}/100.4^{\circ}\text{F}$  by any route (oral, axillary or tympanic); Grade 3 fever:  $> 39.0^{\circ}\text{C}/102.2^{\circ}\text{F}$ .

Grade 3 headache, fatigue, myalgia, arthralgia: preventing normal activity

## Summary of Findings

**1 dose of AREXVY provides durable efficacy against RSV-associated LRTD for 2 full RSV seasons, including against severe RSV disease, in adults with underlying comorbidities, and across advancing ages**

**Revaccination after 12 months does not appear to confer additional efficacy benefit for overall population; future data will inform optimal timing of revaccination**

**AREXVY can be administered with all types of commonly used influenza vaccines**

**Reactogenicity and safety profiles of 2<sup>nd</sup> dose in line with 1<sup>st</sup> dose; important for future revaccination consideration**

**Across all studies no new cases of GBS, ADEM, or other neuroinflammatory demyelinating disorders with additional exposure**

# Immunogenicity Overview Through Month 18 Post Vaccination

## RSV-A Serum Neutralization Titers

## RSV-B Serum Neutralization Titers

## RSVPreF3-specific CD4+ T-cells

\*RSV-A preliminary, final results pending

\*\*versus before vaccination 1; CD4+ T-cells expressing  $\geq 2$  activation markers including  $\geq 1$  cytokine among CD40L, 4-1BB, IL-2, TNF- $\alpha$ , IFN- $\gamma$ , IL-13, IL-17 (events/ $10^6$  cells; by intracellular staining). ED: Estimated Dilution; ED60: serum dilution inducing 60% inhibition in plaque-forming units; GMT: geometric mean titer; IL: interleukin; TNF: tumor necrosis factor
