

“I'm here to tell HIV that I'm a survivor. It takes a lot more than three little letters to stop me.”

Jada – New Orleans, LA
Living with HIV since 1995.

I tested positive for HIV just one week before my 21st birthday. I was afraid, I didn't tell anyone, and I didn't go into treatment right away. But now I know the value of medical care and treatment. I found a doctor who I love and who's been ultra-sensitive and helpful throughout my transition. And because of HIV treatment, my viral load is undetectable and my CD4 cell count is back to normal. I live my life to the max and I want other transgirls living with HIV to know that it only gets better!

Get in care. Stay in care. Live well.

HIV TREATMENT WORKS

Get in care. Stay in care. Live well.
