

Reduce the spread of HIV by helping your patients inform partners.

Partner Services provides an array of free services to persons with HIV or other STDs (such as syphilis, gonorrhea, and chlamydial infection) and their partners. Partner Services is a function of local and state health department staff who help to identify and locate sex or drug-injection partners to inform them of their risk and to provide them testing, counseling, and referrals for other services.

Help your patients get in touch with their local Partner Services representative:

Health Department: _____ Contact: _____
