Tick bites can make you sick

Ticks spread germs

Ticks can get on you from tall grass, bushes, or leaves.

Ticks are so tiny that you can mistake them for freckles or dirt. Sometimes you can’t see them see at all.

Ticks hide in your hair, behind your knee, or under your clothes.

Ticks spread germs

Ticks can spread germs and make you sick.

Keep from getting sick.

Wear insect repellent
Stay out of tall weeds
Take a shower after you come inside

Tell medical workers if

A tick bites you
You get a rash after a tick bite
You feel sick or tired after a tick bite
