**Subjective Cognitive Decline Among Women**

2015–2018 Behavioral Risk Factor Surveillance System (BRFSS) Data from Women in 50 States, Puerto Rico, and the District of Columbia: People Aged 45 Years and Older

1 in 9 women aged 45 years and older are experiencing subjective cognitive decline.

SCD is self-reported memory problems that have been getting worse over the past year.

43% of women with SCD had to give up day-to-day activities.

83% of women with SCD have at least one chronic condition.

Nearly one in two of women with SCD say it interfered with social activities, work, or volunteering.

Half of women with SCD have discussed their symptoms with a healthcare provider.

39% of women with SCD need help with household tasks.
