1 in 9 people aged 45 and older are experiencing Subjective Cognitive Decline.

SCD is self-reported memory problems that have been getting worse over the past year.

Only two in five with SCD have talked to a health care provider about it.

Nearly 75% with SCD have at least one chronic condition.

Among those with SCD...

- 32.2% needed help with household chores.
- 28.6% had to give up day-to-day activities.
- One in four say SCD interfered with social activities, work, or volunteering.
