Drinking too much can harm your health. Excessive alcohol use leads to more than 140,000 deaths in the United States each year, shortening the lives of those who died by an average of 26 years. The economic costs of excessive alcohol consumption in 2010 were estimated at $249 billion, or $2.05 a drink.

**Excessive alcohol use includes:**

- **Binge Drinking**
  - For women, 4 or more drinks consumed on an occasion
  - For men, 5 or more drinks consumed on an occasion

- **Heavy Drinking**
  - For women, 8 or more drinks per week
  - For men, 15 or more drinks per week

- **Any alcohol use by pregnant women**
- **Any alcohol use by people younger than 21**

If you choose to drink, do so in moderation.

- **DON’T DRINK AT ALL** if you are younger than 21, or if you are or may be pregnant, or if you have health problems that could be made worse by drinking.

- **FOR WOMEN**, 1 drink or less in a day
- **FOR MEN**, 2 drinks or less in a day

People who don’t drink alcohol **SHOULD NOT START** for any reason. **DRINKING LESS** is better for health than drinking more.

Or nondrinking
Excessive alcohol use has immediate effects that increase the risk of many harmful health conditions. These are most often the result of binge drinking. Over time, excessive alcohol use can lead to the development of chronic diseases and other serious problems.
