

MicrobeNet and Advanced Molecular Detection (AMD)

MicrobeNet is a virtual reference laboratory of more than **2,400** rare and emerging bacteria and fungi, providing unprecedented access for users to search CDC databases with their own laboratory data.

Using **MicrobeNet**, a hospital can reduce the time to identify a pathogen **from days to hours**.

Developed through **AMD** support and in collaboration with industry partners, new diagnostic equipment can search the libraries directly, **saving time and money**.
