

What are the ages of women who use ART?

Figure 13 presents ART cycles using fresh nondonor eggs or embryos in 2012 according to the age of the woman who had the procedure. About 12% of these cycles were among women younger than age 30, 64% were among women aged 30–39, and almost 24% were among women aged 40 or older. The mean age of women who had ART cycles using fresh nondonor eggs was slightly less than 36 and the median age was 36.
