Notes:
*Aged 18+ years
"U.S. Total includes 49 states plus the District of Columbia and excludes the three territories, New Jersey was exluded because of not meeting the minimum data collection requirements.
${ }^{4} \mathrm{Cl}$ denotes confidence interval.
${ }^{\text {s }}$ Sample size is the number of respondents answered current asthma question
If values for the standard error and the $95 \%$ confidence interval are not provided, the normal approximation to the binomial distribution does not apply due to small sample size.
When the Sample Size is less than 50 , estimates are not precise and should be interpreted with caution.
