

What is mPINC?

mPINC is CDC's national survey of Maternity Practices in Infant Nutrition and Care.

What does mPINC measure?

The survey measures care practices and policies that impact newborn feeding, feeding education, staff skills, and discharge support.

Who is included in mPINC surveys?

CDC invites all hospitals with maternity services in the U.S. and territories to participate. In 2018, 39 of 49 eligible hospitals in Oklahoma participated (80%).

Oklahoma Hospitals
with Ideal Response

Few breastfeeding newborns receive infant formula

33%

Hospital does NOT perform routine blood glucose monitoring on newborns not at risk for hypoglycemia

74%

When breastfeeding mothers request infant formula, staff counsel them about possible consequences

51%

Feeding Education & Support	National Subscore	92	Oklahoma Subscore	87	Oklahoma Hospitals with Ideal Response
Mothers whose newborns are fed formula are taught feeding techniques and how to safely prepare/feed formula					67%
Breastfeeding mothers are taught/shown how to recognize/respond to feeding cues, to breastfeed on-demand, and to understand the risks of artificial nipples/pacifiers					64%
Breastfeeding mothers are taught/shown how to position and latch their newborn, assess effective breastfeeding, and hand express milk					49%
Discharge Support	National Subscore	78	Oklahoma Subscore	69	Oklahoma Hospitals with Ideal Response
Discharge criteria for breastfeeding newborns requires direct observation of at least 1 effective feeding at the breast within 8 hours of discharge					62%
Discharge criteria for breastfeeding newborns requires scheduling of the first follow-up with a health care provider					90%
Hospital's discharge support to breastfeeding mothers includes in-person follow-up visits/appointments, personalized phone calls, or formalized, coordinated referrals to lactation providers					82%
Hospital does NOT give mothers any of these items as gifts or free samples: infant formula; feeding bottles/nipples, nipple shields, or pacifiers; coupons, discounts, or educational materials from companies that make/sell infant formula/feeding products					44%
Institutional Management	National Subscore	70	Oklahoma Subscore	63	Oklahoma Hospitals with Ideal Response
Nurses are required to demonstrate competency in assessing breastfeeding (milk transfer & maternal pain), assisting with breastfeeding (positioning & latch), teaching hand expression & safe formula preparation/feeding, and demonstrating safe skin-to-skin practices					64%
Hospital requires nurses to be formally assessed for clinical competency in breastfeeding support/lactation management					51%
Hospital records/tracks exclusive breastfeeding throughout the entire hospitalization					82%
Hospital pays a fair market price for infant formula					41%
Hospital has 100% of written policy elements [§]					18%

*Scores range from 0 to 100, with 100 being the best possible score. The "Total Score" is an average of the subscores for the 6 subdomains.

[§]See the scoring algorithm for specific items at www.cdc.gov/breastfeeding/data/mpinc/scoring.htm

NOTE: The mPINC survey was redesigned in 2018. Results from the 2018 mPINC survey cannot be compared with results from previous mPINC surveys.
