What is mPINC?
mPINC is CDC’s national survey of Maternity Practices in Infant Nutrition and Care.

What does mPINC measure?
The survey measures care practices and policies that impact newborn feeding, feeding education, staff skills, and discharge support.

Who is included in mPINC surveys?
CDC invites all hospitals with maternity services in the U.S. and territories to participate. In 2020, 71 of 87 eligible hospitals in Wisconsin participated (82%).

Implementing best practices and policies in maternity care help to improve breastfeeding outcomes. Use your state’s mPINC data to bring together partners, identify gaps, celebrate achievements, and prioritize next steps.

### Immediate Postpartum Care

- Few breastfeeding newborns receive infant formula: 57%
- Hospital does NOT perform routine blood glucose monitoring on newborns not at risk for hypoglycemia: 99%
- When breastfeeding mothers request infant formula, staff counsel them about possible consequences: 59%
Mothers whose newborns are fed formula are taught feeding techniques and how to safely prepare/feed formula 72%

Breastfeeding mothers are taught/shown how to recognize/respond to feeding cues, to breastfeed on-demand, and to understand the risks of artificial nipples/pacifiers 80%

Breastfeeding mothers are taught/shown how to position and latch their newborn, assess effective breastfeeding, and hand express milk 79%

Discharge criteria for breastfeeding newborns requires direct observation of at least 1 effective feeding at the breast within 8 hours of discharge 65%

Discharge criteria for breastfeeding newborns requires scheduling of the first follow-up with a health care provider 87%

Hospital’s discharge support to breastfeeding mothers includes in-person follow-up visits/appointments, personalized phone calls, or formalized, coordinated referrals to lactation providers 97%

Hospital does NOT give mothers any of these items as gifts or free samples: infant formula; feeding bottles/nipples, nipple shields, or pacifiers; coupons, discounts, or educational materials from companies that make/sell infant formula/feeding products 76%

Nurses are required to demonstrate competency in assessing breastfeeding (milk transfer & maternal pain), assisting with breastfeeding (positioning & latch), teaching hand expression & safe formula preparation/feeding, and demonstrating safe skin-to-skin practices 63%

Hospital requires nurses to be formally assessed for clinical competency in breastfeeding support/lactation management 44%

Hospital records/tracks exclusive breastfeeding throughout the entire hospitalization 94%

Hospital pays a fair market price for infant formula 42%

Hospital has 100% of written policy elements§ 20%

*Scores range from 0 to 100, with 100 being the best possible score. The “Total Score” is an average of the subscores for the 6 subdomains.

§See the scoring algorithm for specific items at www.cdc.gov/breastfeeding/data/mpinc/scoring.htm

NOTE: The mPINC survey was redesigned in 2018. Results from the 2020 mPINC survey cannot be compared with results from 2007-2015 mPINC surveys.
