Language for Identifying Most Knowledgeable Person during the BRFSS interview

Consent scripts for use during BRFSS 2011 Child asthma module when the most knowledgeable adult is identified during the BRFSS interview.

Child asthma module:
If BRFSS respondent indicates that the randomly selected child has ever had asthma (CASTHDX2 = 1 “yes”) and the BRFSS adult never had asthma then arrange for a call-back interview. If both the BRFSS adult and the randomly selected child both have asthma the child is randomly selected for the call-back 50% of the time.

Only respondents who are the parent/guardian of the selected child with asthma are eligible for the child asthma call-back interview. This is required because the parent/guardian must give permission to collect information about the child even if the information is being given by someone else. (RCSRELN1 = 1, 3 )
