

CDC—INJURY PREVENTION AND CONTROL

FY 2016 President's Budget Request | \$257 Million

Mission

To prevent violence and injuries and reduce their consequences so that people can live to their full potential.

Major Programs

- Child Maltreatment Prevention
- Core Violence and Injury Prevention Program
- Injury Control Research Centers
- Intimate Partner Violence Prevention
- Motor Vehicle Injury Prevention
- National Violent Death Reporting System (NVDRS)
- Older Adult Falls Prevention
- Prescription Drug Overdose Prevention
- Sexual Violence Prevention
- Rape Prevention and Education Program
- Traumatic Brain Injury Prevention and Treatment
- Youth Violence Prevention

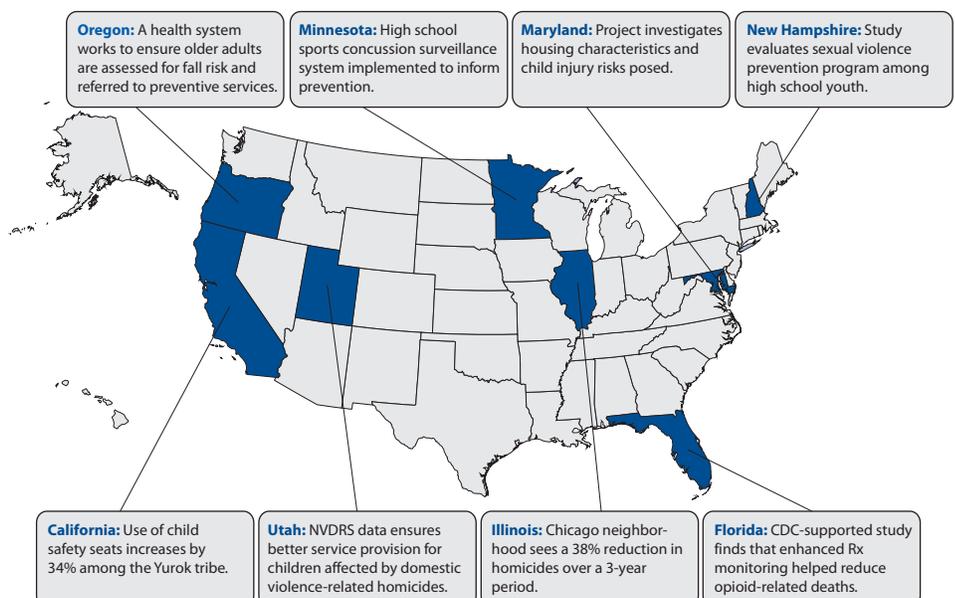

Goal Highlights

- Prevent violence against children and youth.
- Prevent motor vehicle-related injuries and deaths.
- Prevent prescription drug overdoses.
- Prevent older adult falls.
- Improve prevention of and recovery from traumatic brain injuries.
- Enhance state capacity to implement violence and injury prevention activities.
- Improve data, surveillance, and research to better inform prevention.

Why We're Here

- Nearly 180,000 people die from violence and injuries each year—nearly 1 person every 3 minutes.
- More than 2.8 million people are hospitalized and 31.7 million people are treated in emergency rooms as a result of violence and injuries each year.
- Violence and injuries cost more than \$406 billion in medical care and lost productivity each year.
- Prescription opioid overdose deaths have quadrupled since 1999, killing more than 16,000 people in 2013 alone.

Snapshot: CDC Investments Contribute to Injury Prevention Successes and Activities throughout the U.S.

How We Work

- Provide states with direct funding and scientific expertise.
- Monitor injuries and violent deaths through state-of-the-art data collection.
- Conduct research on what works to prevent violence and injuries.
- Provide evidence-based information to states, partners, and policymakers to guide their programmatic and policy decisions.

Centers for Disease Control and Prevention

Impact Highlights

Ongoing CDC youth violence prevention funding in a Chicago neighborhood has, to date, shown a 38% reduction in homicides over a 3-year period – more than twice that of comparison areas

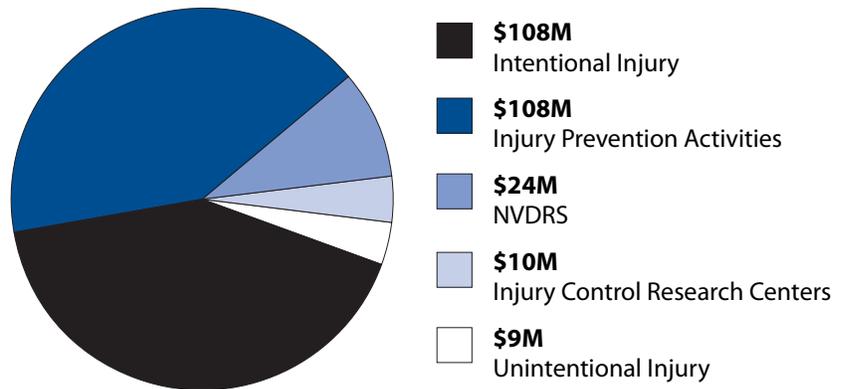

The Native American Yurok Tribe's CDC-funded motor vehicle safety project increased use of child safety seats by 34%

A CDC report found that new state regulation of pain clinics and enhanced prescription monitoring in Florida helped reduce opioid-related deaths

FY 2016 President's Budget Request

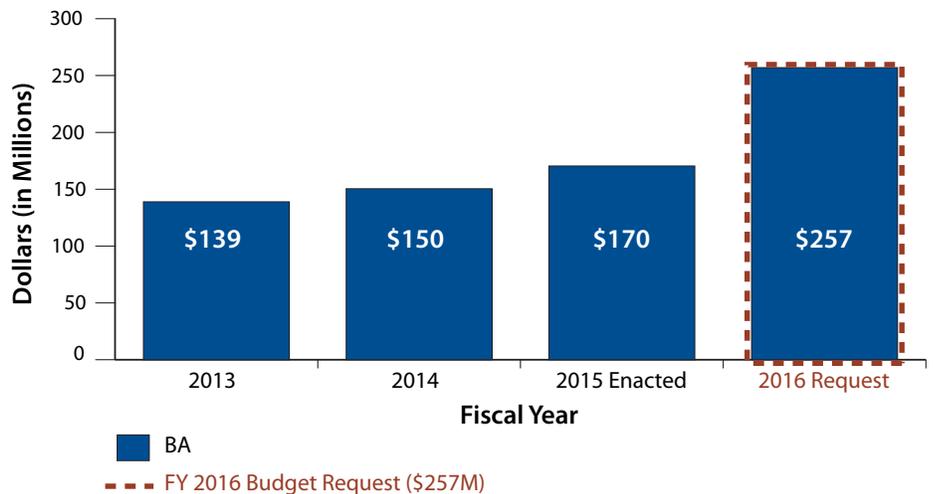

A total of \$257 million requested is:

- \$87 million above FY 2015 Enacted level

Budget Highlights

- \$48 million above FY 2015 to expand prescription drug overdose prevention activities to all 50 states and Washington, D.C.
- \$12 million above FY 2015 to expand the NVDRS system nationwide to equip states and communities with vital information to better track, understand, and address the preventable characteristics of violent deaths.
- \$5.6 million to inform and strengthen heroin overdose prevention by improving heroin-related surveillance and further investigating the relationship between prescription drug abuse and heroin use.
- \$10 million for a new initiative to support research into the causes and prevention of gun violence.
- \$5 million to begin a national concussion surveillance system to determine the incidence of sports-related concussions, including those among youth ages five to 21.
