CDC Budget Overview

Fiscal Year (FY) 2024 President’s Budget Request: $11.581 billion

The total FY 2024 request for CDC funding is $11.581 billion in discretionary budget authority, Prevention and Public Health Funds (PPHF), and PHS Evaluation Transfers. This is an increase of $2.397 billion over the FY 2023 enacted level.

FY 2024 BUDGET REQUEST

- Bolsters U.S. capacity for emergency response to health threats
- Provides training, data gathering and analyses, and prevention and laboratory services that Americans depend on for healthy communities
- Helps families cope with public health challenges including those stemming from COVID-19, and poor mental health, suicide, Adverse Childhood Experiences, opioid addiction, and violence
- Strengthens programs to protect communities against preventable, transmissible diseases such as measles and influenza
- Expands initiatives for better access to nutrition, physical activity, and protection from environmental hazards

CDC MAKES AN IMPACT

- DC-trained disease detectives investigated more than 6,000 emergency outbreaks since 2005 globally. CDC strengthens global public health security systems by closing gaps in preparedness and addressing health security challenges to keep Americans safe.
- The Breast and Cervical Cancer Early Detection Program could serve an additional 142,000 people with new investments, resulting in 2,500 additional cancers and cancerous lesions detected.
- Through December 2022, 922,000,000 COVID-19 vaccine doses have been delivered in the United States.
- CDC built a new electronic pathway for COVID laboratory-based diagnostic tests that has handled over 934,000,000 diagnostic test reports, at times averaging over 1,500,000 per day.
- Efforts support global health security activities in 110 countries worldwide, including 50 new countries receiving direct CDC support as a result of establishing new offices in 2022.
