Are you the picture of health?

“Colorectal cancer is the 2nd leading cancer killer. But it doesn’t have to be.”

Katie Couric, Co-Founder
EIF’s National Colorectal Cancer Research Alliance

Colorectal cancer and precancerous polyps don’t always cause symptoms. So you can look healthy and feel fine and not know there may be a problem. ■ Screening helps find polyps so they can be removed before they turn into colorectal cancer. This is one cancer you can prevent! ■ Screening can also find colorectal cancer early, when treatment often leads to a cure. ■ If you’re 50 or older, make sure you really are the picture of health. Get screened for colorectal cancer.
