Grantees will select evidence-based strategies from the Library of Indicators and Data Sources located at "Library of Indicators and Data Sources_2014.accdb", as well as activities that are aligned with the DP17-1701 Integrated Logic Model.

**Organizational Capacity**
- Program Management
  - Cancer Plan
  - Chronic Disease Plan
- Work Plan
- Organizational Capacity
  - Staffing
  - Funding
  - Partnership Building
  - Evaluation Capacity
  - Data Systems
  - Evidence Base

**Partnership (CCC)**
Chronic Disease Networks, Leadership Team, Cancer Control Partners

**Cancer Data and Surveillance**
Use cancer and risk factor surveillance data to develop burden reports and set baselines and targets for cancer plan, action plan, or other program documents.

**Environmental Approaches for Sustainable Cancer Control**
Implement evidence-based interventions to reduce risk and promote healthy behaviors by enhancing social and physical environments.

**Community-Clinical Linkages to Aid Patient Support**
Implement evidence-based interventions to increase availability and use of cancer-related preventive health services or health extender services.

**Health Systems Changes**
- Implement evidence-based interventions that increase the efficiency and effectiveness of clinical care.

**Program Monitoring and Evaluation**
- Implement an evaluation plan containing strategies to evaluate the CCC coalition, plan, and the interventions.
  - Monitor, track, analyze, and report program data in a CDC-provided Management Information System.
  - Develop dissemination documents that describe the monitoring, assessment, or evaluation of program effort.

**Inputs (Grantee Resources)**
- Collaboration
  - Comprehensive Cancer Control Coordination Partnership
  - CCC Networks, Coalitions, and Chronic Disease Partners
- Program Management
  - Cancer Plan
  - Chronic Disease Plan
  - Work Plan
- Organizational Capacity
  - Staffing
  - Funding
  - Partnership Building
  - Evaluation Capacity
  - Data Systems
  - Evidence Base

**Strategies with Grantee Activities**
- **Program Collaboration**
  - Convene Leadership Team and facilitate coordination of activities across programs.
  - Collaborate with cancer registry to ensure program efforts are informed by surveillance data.
  - Collaborate across all programs to identify target populations and determine appropriate strategies.
  - Recruit leadership across all components to participate in the cancer coalition.
  - Collaborate with chronic disease prevention programs to ensure coordination and implementation of evidence-based interventions.

**External Partnerships**
- Support an existing cancer coalition to achieve state cancer plan goals and objectives.
- Leverage community resources to implement evidence-based interventions.
- Implement and periodically revise the state's (or jurisdiction's) cancer plan.

**Governmental Policies**
- Increase policies and systems that support cancer prevention and control.
- New or enhanced school, worksite, adult and child care programs and policies to support cancer prevention and screening activities.
- Increased evidence-based lifestyle and wellness survivorship programs.

**Informatics**
- Use cancer and risk factor surveillance data to develop burden reports and set baselines and targets for cancer plan, action plan, or other program documents.
- Support an existing cancer coalition to achieve state cancer plan goals and objectives.
- Leverage community resources to implement evidence-based interventions.
- Implement and periodically revise the state's (or jurisdiction's) cancer plan.

**Environmental Approaches for Sustainable Cancer Control**
Implement evidence-based interventions to reduce risk and promote healthy behaviors by enhancing social and physical environments.

**Community-Clinical Linkages to Aid Patient Support**
Implement evidence-based interventions to increase availability and use of cancer-related preventive health services or health extender services.

**Health Systems Changes**
- Increased evidence-based supports for prevention through:
  - New or enhanced school, worksite, adult and child care programs and policies to support cancer prevention and screening activities.
  - Increased evidence-based lifestyle and wellness survivorship programs.

**Policy Changes**
- Improved access to lifestyle programs, clinical preventive services, and cancer care among cancer survivors.
- Increased use of evidence-based lifestyle programs, clinical preventive services, and cancer care among cancer survivors.

**Community Changes**
- Improved community linkages.
- Increased chronic disease self-management support among cancer survivors.
- Improved systems to support quality screening.
- Increased health extender services.

**Health Care System Changes**
- Improved delivery of clinical preventive services and cancer care.

**Provider Changes**
- Improved health care provider practices and systems to support screening.

**Individual Changes**
- Increased awareness, knowledge, and abilities among target populations about cancer prevention and screening.

**IMPACT**
- Prevent cancer and recurrence.
- Decrease cancer incidence.
- Increase quality of life among cancer survivors.
- Reduce cancer disparities.
- Decrease cancer morbidity and mortality.

**LONG-TERM OUTCOMES**
- Reduced cancer risk, for example, tobacco, alcohol, and exposure to ultraviolet (UV) rays.
- Increased in health seeking and healthy lifestyle behaviors, for example, human papillomavirus (HPV) vaccination, Hepatitis B vaccination, improved physical activity, and improved diet.
- Increased early detection of cancer.
- Improved survivorship practices.

**SHORT-TERM OUTCOMES**
- Increased appropriate cancer screening, re-screening, and surveillance of priority populations.
NATIONAL COMPREHENSIVE CANCER CONTROL PROGRAM LOGIC MODEL

Inputs (Grantee Resources)

Collaboration
- Comprehensive Cancer Control (CCC) National Partnership
- CCC Networks, Coalitions, and Chronic Disease Partners
- Cancer Control Leadership Team

Program Management
- Cancer Plan
- Chronic Disease Plan
- Work Plan

Organizational Capacity
- Staffing
- Funding
- Partnership Building
- Evaluation Capacity
- Data Systems
- Evidence Base

Integrated Cancer Funding Opportunity Announcement Strategy with Grantee Activities*

Program Collaboration
- Convene Leadership Team and facilitate coordination of activities across programs.
- Collaborate with cancer registry to ensure program efforts are informed by surveillance data.
- Collaborate across all programs to identify target populations and determine appropriate strategies.
- Recruit leadership across all components to participate in the cancer coalition.
- Collaborate with chronic disease prevention programs to ensure coordination and implementation of evidence based interventions.

External Partnerships
- Support an existing cancer coalition to achieve state cancer plan goals and objectives.
- Leverage community resources to implement evidence-based interventions.
- Implement and periodically revise the state’s (or jurisdiction’s) cancer plan.

Cancer Data and Surveillance
Use cancer and risk factor surveillance data to develop burden reports and set baselines and targets for cancer plan, action plan, or other program documents.

Implement CCC Priorities
- Address Primary Prevention
- Support Early Detection
- Address the Needs of Survivors
- Reduce Cancer Disparities

Environmental Approaches for Sustainable Cancer Control*
Implement evidence-based interventions to reduce risk and promote healthy behaviors by enhancing social and physical environments.

Community-Clinical Linkages to Aid Patient Support*
Implement evidence-based interventions to increase availability and use of cancer-related preventive health services or health extender services.

Health Systems Changes*
Implement evidence-based interventions that increase the efficiency and effectiveness of clinical care.
Program Monitoring and Evaluation
- Implement an evaluation plan containing strategies to evaluate the CCC coalition, plan, and the interventions.
- Monitor, track, analyze, and report program data in a CDC-provided Management Information System.
- Develop dissemination documents that describe the monitoring, assessment, or evaluation of program effort.

Short-Term Outcomes

Policy Changes
Increased policies and systems that promote healthy lifestyle behaviors and support high-quality cancer screening.

Community Changes
Increased environmental supports for prevention through:
- New or enhanced school, worksite, adult and child care programs and policies to support cancer prevention and screening activities.
- Increased evidence-based lifestyle and wellness survivorship programs.

Health Care System Changes
- Improved community linkages.
- Increased chronic disease self-management support among cancer survivors.
- Improved systems to support quality screening.
- Increased health extender services.

Provider Changes
Improved health care provider practices and systems to support screening.

Individual Changes
Increased awareness, knowledge, and abilities among target populations about cancer prevention and screening.

Intermediate Outcomes
- Improved access to lifestyle programs, clinical preventive services, and cancer care among cancer survivors.
- Improved access to health care and preventive services.
- Increased evidence-based lifestyle programs to increase healthy living.
- Improved delivery of clinical preventive services and cancer care.
- Increased appropriate cancer screening, rescreening, and surveillance of priority populations.
- Increased use of evidence-based lifestyle programs, clinical preventive services, and cancer care among cancer survivors.

Long-Term Outcomes
- Reduced cancer risk, for example, tobacco, alcohol, and exposure to ultraviolet (UV) rays.
- Increase in health seeking and healthy lifestyle behaviors, for example, human papillomavirus (HPV) vaccination, Hepatitis B vaccination, improved physical activity, and improved diet.
- Increased early detection of cancer.
- Improved survivorship practices.

Impact
- Prevent cancer and recurrence.
- Decrease cancer incidence.
- Increase quality of life among cancer survivors.
- Reduce cancer disparities.
- Decrease cancer morbidity and mortality.

*Grantees will select evidence-based strategies from the Library of Indicator and Data Sources located at \cdc.gov\private\M121\hcq9\CCC Library of Indicators and Data Sources_2014.accdb as well as activities that are aligned with DP17-1701 Integrated Logic Model.
