

The National Comprehensive Cancer Control Program Priorities

Focusing on What Works

Since 1998, the Centers for Disease Control and Prevention's National Comprehensive Cancer Control Program (NCCCP) has provided the **funding, guidance, and technical assistance** that programs across the country use to **develop, implement, and evaluate** state-wide cancer control plans.

These plans are guided by the **NCCCP priorities** that focus coalition efforts on **evidence-based** strategies that will impact cancer prevention and control across the cancer continuum.

THE NCCCP PRIORITIES

Emphasize
**Primary
Prevention
of Cancer**

Support
**Early Detection &
Treatment**

Address Public
Health Needs of
Survivors

NATIONAL Comprehensive Cancer Control PROGRAM

Collaborating to Conquer Cancer

Implement
**Policy, Systems,
and Environmental
(PSE) Approaches**

Promote
Health Equity

Demonstrate
Outcomes through
Evaluation

Focusing on What Works

NCCCP awardees are advancing the priorities through evidence-based interventions that include:

Primary Prevention

- Increasing vaccination for HPV and HBV
- Promoting tobacco-free living
- Improving nutrition and physical activity in:
 - Communities
 - Worksites
 - Schools
- Promoting sun safety
- Reducing exposure to artificial UV light sources

Early Detection and Treatment

- Increasing use of recommended cancer screenings
- Supporting appropriate treatment
- Addressing financial barriers
- Providing emotional support
- Improving access to clinical trials
- Using patient navigators and community health workers

Survivorship

- Offering survivorship programs
- Promoting survivorship care plans
- Educating and providing information to:
 - Survivors
 - Caregivers
 - Providers

Cross-Cutting Priorities

Policy, systems, and environmental approaches, health equity, and evaluation are all cross-cutting priorities that are used to strengthen and advance NCCCP efforts in primary prevention, early detection and treatment, and survivorship.

Learn More about the NCCCP

More information about the National Comprehensive Cancer Control Program and its priorities, partners, and awardees can be found at www.cdc.gov/cancer/ncccp and in the following resources.

COMP CINCER WORKS
Stopping Cancer Before It Starts
Putting the National Comprehensive Cancer Control Program Practices into Action

Emphasizing Primary Prevention of Cancer
The mission of the program is to reduce cancer rates by focusing on primary prevention. Primary prevention means preventing cancer before it starts. This includes:

- Increasing vaccination for HPV and HBV
- Promoting tobacco-free living
- Improving nutrition and physical activity in:
 - Communities
 - Worksites
 - Schools
- Promoting sun safety
- Reducing exposure to artificial UV light sources

National Comprehensive Cancer Control Program (NCCCP) Making a Difference

Examples of successful NCCCP program activities focusing on primary prevention include:

- **Supporting evidence-based approaches to reduce cancer rates in the workplace and schools**
- **Supporting evidence-based approaches to reduce cancer rates in communities**
- **Supporting evidence-based approaches to reduce cancer rates in schools**
- **Supporting evidence-based approaches to reduce cancer rates in communities**

Cancer Prevention & Control Works
Examples of successful NCCCP program activities focusing on early detection and treatment include:

- **Supporting evidence-based approaches to reduce cancer rates in communities**
- **Supporting evidence-based approaches to reduce cancer rates in schools**
- **Supporting evidence-based approaches to reduce cancer rates in communities**

Cancer Prevention & Control Works
Examples of successful NCCCP program activities focusing on survivorship include:

- **Supporting evidence-based approaches to reduce cancer rates in communities**
- **Supporting evidence-based approaches to reduce cancer rates in schools**
- **Supporting evidence-based approaches to reduce cancer rates in communities**

COMP CINCER WORKS
Finding & Treating Cancer Now
Putting the National Comprehensive Cancer Control Program Practices into Action

Promoting Early Detection and Treatment of Cancer
Learning to detect and address cancer early on can make a difference in the outcome for many people. This includes:

- Increasing use of recommended cancer screenings
- Supporting appropriate treatment
- Addressing financial barriers
- Providing emotional support
- Improving access to clinical trials
- Using patient navigators and community health workers

National Comprehensive Cancer Control Program (NCCCP) Making a Difference

Examples of successful NCCCP program activities focusing on early detection and treatment include:

- **Supporting evidence-based approaches to reduce cancer rates in communities**
- **Supporting evidence-based approaches to reduce cancer rates in schools**
- **Supporting evidence-based approaches to reduce cancer rates in communities**

Cancer Prevention & Control Works
Examples of successful NCCCP program activities focusing on survivorship include:

- **Supporting evidence-based approaches to reduce cancer rates in communities**
- **Supporting evidence-based approaches to reduce cancer rates in schools**
- **Supporting evidence-based approaches to reduce cancer rates in communities**

COMP CINCER WORKS
Improving Life After Cancer Diagnosis
Putting the National Comprehensive Cancer Control Program Practices into Action

Supporting Cancer Services and Caregivers
Many cancer survivors live in the United States. A cancer survivor is someone who has been diagnosed with cancer and is still alive. This includes:

- Offering survivorship programs
- Promoting survivorship care plans
- Educating and providing information to survivors, caregivers, and providers

National Comprehensive Cancer Control Program (NCCCP) Making a Difference

Examples of successful NCCCP program activities focusing on survivorship include:

- **Supporting evidence-based approaches to reduce cancer rates in communities**
- **Supporting evidence-based approaches to reduce cancer rates in schools**
- **Supporting evidence-based approaches to reduce cancer rates in communities**

Cancer Prevention & Control Works
Examples of successful NCCCP program activities focusing on survivorship include:

- **Supporting evidence-based approaches to reduce cancer rates in communities**
- **Supporting evidence-based approaches to reduce cancer rates in schools**
- **Supporting evidence-based approaches to reduce cancer rates in communities**

Cross-Cutting Priorities
Putting the National Comprehensive Cancer Control Program Practices into Action

NCCCP Cross-Cutting Priorities
Policy, systems, and environmental approaches are all cross-cutting priorities that are used to strengthen and advance NCCCP efforts in primary prevention, early detection and treatment, and survivorship. This includes:

- Building Healthy Communities through Policy, Systems, and Environment (PSE) Approaches
- Advancing Health Equity within Cancer Prevention and Control
- Promoting Outcomes through Evaluation

National Comprehensive Cancer Control Program (NCCCP) Making a Difference

Examples of successful NCCCP program activities focusing on cross-cutting priorities include:

- **Supporting evidence-based approaches to reduce cancer rates in communities**
- **Supporting evidence-based approaches to reduce cancer rates in schools**
- **Supporting evidence-based approaches to reduce cancer rates in communities**

Cancer Prevention & Control Works
Examples of successful NCCCP program activities focusing on cross-cutting priorities include:

- **Supporting evidence-based approaches to reduce cancer rates in communities**
- **Supporting evidence-based approaches to reduce cancer rates in schools**
- **Supporting evidence-based approaches to reduce cancer rates in communities**
