

## **Babies on the Move: Protecting Babies with Vaccination (:60)**

[Announcer] All around town, from grocery stores, to playgrounds... babies are on the move! And there are diseases that are on the move too.

And some of these diseases—like measles, and whooping cough—can spread easily. To best protect him from 14 serious diseases, by the time he turns two years old, be sure to get him vaccinated according to the recommended schedule.

That way, he can go about his business. And you can have peace of mind. For more reasons to vaccinate, talk to your child's doctor, or go to [cdc.gov/vaccines](http://cdc.gov/vaccines).
