

Wes Studi: Signs

[Wes Studi] I'm Wes Studi and I'm concerned about the new H1N1 flu. Take flu seriously.

Seek medical care right away, if your child becomes sick and has any emergency warning signs such as troubled breathing, bluish skin, not drinking enough fluids, or being very irritable.

For adults, emergency warning signs include difficulty breathing, pain or pressure in the chest, and confusion. Please -- protect the circle of life. Watch for the signs.
