**CHRONIC DISEASES IN AMERICA**

6 IN 10 Adults in the US have a chronic disease

4 IN 10 Adults in the US have two or more

**THE LEADING CAUSES** of death and disability and Leading Drivers of the Nation’s $4.1 Trillion in Annual Health Care Costs

- Heart Disease
- Cancer
- Chronic Lung Disease
- Stroke
- Alzheimer’s Disease
- Diabetes
- Chronic Kidney Disease

**THE KEY LIFESTYLE RISKS** for chronic disease

- Tobacco Use
- Poor Nutrition
- Physical Inactivity
- Excessive Alcohol Use

**NCCDPHP PREVENTS**

**CHRONIC DISEASE**

**AND PROMOTES HEALTH**

**FOR PEOPLE OF ALL AGES**

- Improving Quality of Life
- Increasing Healthy Life Expectancy
- Reducing Health Care Costs
WE WORK TO IMPROVE HEALTH ACROSS THE LIFE SPAN

Where People Live, Learn, Work, and Play

Infants
Reduce the leading causes of infant death and illness.

Children and Adolescents
Help support healthy communities, child care programs, and schools so children can eat well, stay active, and avoid risky behaviors.

Adults
Help adults lead healthy and active lives and increase the use of preventive services like cancer screenings.

Older Adults
Promote quality of life and independence for people as they age.

WHAT WE DO

Find out how chronic diseases affect populations in the United States.

Study interventions to find out what works best to prevent and control chronic diseases.

Fund and guide states, territories, cities, and tribes to use interventions that work.

Share information to help all Americans understand the risk factors for chronic diseases and how to reduce them.

HOW WE DO IT

Measure
how many Americans have chronic diseases or chronic disease risk factors.

Improve
environments to make it easier for people to make healthy choices.

Strengthen
health care systems to deliver prevention services that keep people well and diagnose diseases early.

Connect
clinical services to community programs that help people prevent and manage their chronic diseases and conditions.
