

## Prevent Carbon Monoxide (CO) Poisoning

August 2018

- Prevent Carbon Monoxide (CO) Poisoning
- Power outages can occur during emergencies (like hurricanes).
- Using gas-powered generators can cause CO to build up in home--poisoning the people inside.
- DANGER
- Carbon Monoxide
- Can't be seen
- Can't be smelled
- Can't be heard
- But--CO poisoning
- CO DETECTOR
- Can be stopped
- Prevent CO Poisoning:
- Install a battery-operated CO detector in your home.
- Use generators and any gas-powered equipment outside, at least 20 feet away from doors, windos, and vents.
