The document contains graphs showing the reported new cases of COVID-19 from November 1, 2020, to February 1, 2021, for various counties in Missouri. Each graph includes multiple models' predictions, indicated by different colored lines, with inner and outer bands representing 50% and 95% prediction intervals, respectively. The graphs also show the number of new cases per 100,000 population, with updates on January 4, 2021, and a link to the CDC's coronavirus forecasts cases page.
