*New weekly cases may decrease in this location over the next four weeks. For these locations, the ensemble forecast indicates a probability of 0.75 or greater that fewer cases will be reported in week four of the forecast than in the last reported week.
The diagrams represent the new cases reported in various counties of Wisconsin over different dates. Each county is shown with a set of graphs indicating the number of new cases, where the data points are represented by different models such as Ensemble, Individual models, etc. The graphs show a trend of new cases per 100,000 population, with the years spanning from October 2020 to January 2021. The inner bands represent 50% prediction intervals, while the outer bands represent 95% prediction intervals. The update for the data is dated December 28, 2020, and can be found at the CDC's website: https://www.cdc.gov/coronavirus/2019-ncov/cases-updates/forecasts-cases.html.
