What to Expect after Getting a COVID-19 Vaccine

The COVID-19 shot may cause side effects in some people. Side effects should go away in a few days.

**COMMON SIDE EFFECTS**

<table>
<thead>
<tr>
<th>On the arm where you got the shot:</th>
<th>In the rest of your body:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Pain</td>
<td>• Fever</td>
</tr>
<tr>
<td>• Redness</td>
<td>• Chills</td>
</tr>
<tr>
<td>• Swelling</td>
<td>• Tiredness</td>
</tr>
<tr>
<td></td>
<td>• Headache</td>
</tr>
<tr>
<td></td>
<td>• Muscle pain</td>
</tr>
<tr>
<td></td>
<td>• Nausea</td>
</tr>
</tbody>
</table>

**If you are sore where you got the shot:**
- Apply a clean, cool, wet washcloth over the area
- Use or move your arm gently

**If you have a fever:**
- Drink a lot of water
- Get plenty of rest
- Dress lightly

**Ask the facility healthcare provider (or facility staff) for help if:**
- The redness or pain where you got the shot gets worse after 24 hours
- Your side effects are worrying you
- Your side effects do not seem to be going away after a few days

**HELPFUL TIPS**

If you have pain, headache, or fever, ask a healthcare provider (or facility staff) if you can have medicine.

**REMEMBER**

Side effects may make you feel a little sick or even make it hard to do daily activities, but they should go away in a few days.

Some COVID-19 vaccines need 2 shots to work. You should get the second shot even if you have side effects after the first shot, unless a doctor tells you not to.

COVID-19 vaccines may not fully protect you until a week or two after your final shot. It takes time for your body to build protection after any vaccination.

Even after your COVID-19 vaccination, when you are in a correctional facility, it’s important to continue wearing your mask, try to stay at least 6 feet away from others as much as possible, and wash your hands often.
