You can help stop the spread of COVID-19!

1. COVID-19 vaccines are safe and effective.
2. The shots will help protect you from getting very sick, being hospitalized, or dying.
3. You may have some side effects after you are vaccinated, like a fever, chills, sore muscles, or feeling tired. This is normal and lasts only a few days.
4. Even after you get the vaccine, protect yourself and others:
   - Wear a well-fitting mask
   - Stay at least 6 feet away from other people when possible
   - Wash your hands often
