COVID-19 TESTING IF YOU ARE VACCINATED

You did your part by getting vaccinated, but you still have an important role to play in stopping this pandemic.

Some people who are vaccinated still get COVID-19.

So, if you have symptoms, especially if you’ve been around someone with COVID-19, you should get tested.

By getting tested you protect the people around you, including your loved ones.

Encourage your friends and family to get vaccinated.

Remember, if you feel sick, get tested.
