JDS Background/Overview

Why is this information collected?

The DFL JDS provides high level information on MCM distribution and dispensing plan coverage, EOC and command staff, RSS Staff, dispensing staff, closed PODs, open PODs, and open POD staffing.

What impacts achieving “Established” status?

To be eligible for this status, you must update and submit the JDS every 12 months.

Jurisdictional Data Sheet (JDS) : DFL

Questions on RSS Sites and POD locations

<p>Total intermediate sites (include Regional/Local Distribution Sites (RDS/LDS)) that receive materiel directly from the RSS</p>	<p>If there are no intermediate sites within your DFL, enter 0.</p>
<p>Total number of designated primary Open (Public) Point of Dispensing (PODs) DFL-wide</p>	<p>Include the total number of open PODs that you would open to prophylax your entire population.</p>
<p>Distribution assets identified in the DFL plan for use in primary and any additional RSS sites</p>	<p>Include distribution assets that you would use for any RSS sites and/or other distribution sites during an MCM response.</p>

Jurisdictional Data Sheet (JDS) : DFL

EOC and Command Staff	Count current and needed public health EOC and command staff directly related to a public health activation in an anthrax planning scenario.
Current RSS Staff	Count current and needed staff for each active RSS
Required dispensing staff	Complete if DFL dispenses any MCM directly to: 1) public health responders, or 2) critical infrastructure staff (CIS) through an open or closed POD.
Jurisdiction population	Population will be auto-populated from Census Bureau data (https://www.census.gov).

Jurisdictional Data Sheet (JDS) : DFL

Population served by closed PODs (CPODs)	For each CPOD category (e.g. healthcare entities, businesses), count the total number of <i>people served</i> (include family and friends that will receive medications).
Number of CPODs with operational written plans	Of the CPODs with agreements in each category, enter the number of CPODs with written operations plans. For example, if one agreement includes 5 CPODs, enter 5.
Number of plans reviewed	Of the CPODs with written operations plans in each category, enter the number of CPOD plans that have undergone any review by the CRI planning jurisdiction, the state, or other agency.

Jurisdictional Data Sheet (JDS) : DFL

Number of CPODs exercised	Indicate number of CPODS (if any) in each category that have been exercised at any level (drill, FSE, or incident).
Number of agreements in place with dispensing sites using alternate dispensing methods	Include any other sites used to reach individuals who cannot access open or closed PODs.
Total population per hour to process	Auto-calculated value. Population to be served by open PODs divided by the number of hours remaining in the 48 hour campaign. Provides an aggregate estimate of the number of regimens per hour that need to be dispensed to reach the entire remaining population.

Jurisdictional Data Sheet (JDS) : DFL

Head of Household (HOH) option	If no HoH option is selected, regimens per hour will be the same as total population per hour.
Maximum regimens dispensed to each HOH	Regimens will be used consistently to calculate how many persons are covered in an hour, regardless of Head of Household use.
Estimated number of regimens dispensed to each HOH	Estimate will be auto-populated from Census Bureau data (https://www.census.gov) using the approximate number of people living in the US divided by the number of households in the US.

Jurisdictional Data Sheet (JDS) : DFL

Calculated number of regimens per hour (RPH)	Although individual PODs may dispense at different rates, the calculated number of regimens per hour provides an estimate of total dispensing need for the jurisdiction's population
Number of Open (Public) PODs needed	Auto-calculated and populated based on selections in prior questions regarding head of household and RPH calculations.
Using current # of PODs (from Table), the RPH to process population served is	Provides a calculation to estimate how much RPH must be increased to meet the dispensing need with existing PODs.
Select any applicable source(s) of staffing for Open (Public) PODs	Select all categories from which staff will be utilized for dispensing MCM.
