Million Hearts®

Goal: Prevent one million heart attacks and strokes by 2017

- US Department of Health and Human Services initiative, co-led by:
  - Centers for Disease Control and Prevention (CDC)
  - Centers for Medicare & Medicaid Services (CMS)
- Partners across federal and state agencies and private organizations

Key Components of Million Hearts®

Keeping Us Healthy
Changing the environment

Health Disparities

Excelling in the ABCS
Optimizing care

Aspirin when appropriate

Blood pressure control

Cholesterol management

Smoking cessation

Focus on the ABCS

Health information technology

Innovations in care delivery

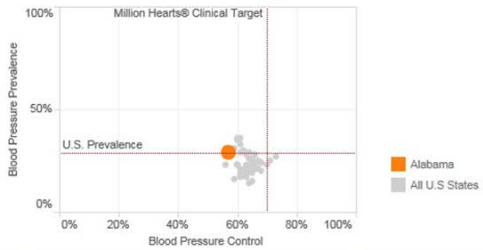
Data System: HRSA UDS | Year: 2013 | State: Alabama

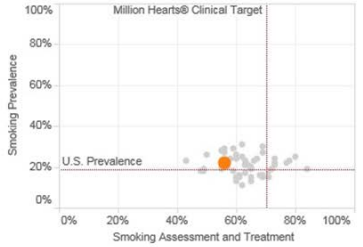
Blood Pressure Control Performance vs. Blood Pressure Prevalence by Selected State

These data show the HRSA UDS blood pressure control rate (x-axis) and blood pressure prevalence (y-axis) by state. States will cluster around 29% blood pressure prevalence (national U.S. prevalence as reported by the National Health and Nutrition Examination Survey (NHANES)) and be at or above the 70% Million Hearts® clinical target.



Smoking Assessment and Treatment Performance vs. Smoking Prevalence by Selected State

These data show the HRSA UDS smoking assessment and treatment rate (x-axis) and smoking prevalence (y-axis) by state. States will cluster around 19% smoking prevalence (national U.S. prevalence as reported by [National Health Interview Survey (NHIS)]) and be at or above the 70% Million Hearts® clinical target.



States Comparisons in the HRSA UDS by Selected Peformance Measure

Choose a clinical quality perfomance measure from dropdown below to view rank-ordered state performance and national performance rates

Clinical Quality Measure: Blood Pressure Control

Blood Pressure Control

2013 Rate	State	Adult HRSA UDS Population	% Over Time
73%	Maine	142,584	
71%	Vermont	104,783	
70%	Pennsylvania	475,183	
68%	Connecticut	222,357	
	New Hampshire	54,139	
	New York	1,155,771
