Center for Good Food Purchasing, Culinary Institute of America Consulting

Program Implementation

Under SRCP, LACDPH is partnering with food service organizations to increase the availability and purchase of lower-sodium food options by

- Implementing food service guidelines/nutrition standards that include sodium
- Changing procurement practices to include lower-sodium options
- Making meal and/or menu modifications to reduce sodium
- Implementing environmental strategies/behavioral economics approaches for lower-sodium products

This profile provides an overview of activities and key achievements through Year 5 (September 30, 2016 - September 29, 2021) of SRCP. Data comes from recipient performance measure reporting and annual performance reports.

Performance Measure Highlights Los Angeles County Sodium Reduction in Communities

Guidelines and Nutrition Standards

52 entities implementing comprehensive nutrition standards and practices that include sodium

Examples of LACDPH activities included supporting food service organizations to

- Use environmental scan assessments to inform recommendations for nutritional improvements in
- Implement recommended LACDPH Nutrition Standards and procurement practices

Meal and Menu Item Recipe **Modification**

1,012 meal/menu items affected by recipe modification to reduce sodium content

Examples of LACDPH activities included supporting food service organizations to

- Replace high sodium ingredients or products to ensure menu items satisfy USDA requirements
- Develop a culinary food preparation program where an expert chef educates and scales culinary techniques and food preparation practices to reduce sodium in meals

Procurement Changes

9,753 products/ingredients replaced with a lower-sodium alternative

Examples of LACDPH activities included supporting food service organizations to

- Embed sodium standards within existing and new food services contracts
- Implement the Good Food Purchasing Program and require all venues to meet baseline procurement goals

Environmental and Behavioral Economic Strategies

768,342 people exposed to environmental choice architecture and placement interventions for lower-sodium foods

Examples of LACDPH activities included supporting food service organizations to

- Integrate pricing and placement strategies in food service request for proposals and new/renewing food service contracts
- Pass regulations to require restaurants to include labels with calories, carbohydrates, saturated fat, and sodium

Intermediate- and Long-Term Outcomes

Decreased Sodium Content of Purchased Products

554mg

reduction of sodium on average per meal

Decreased Sodium Consumption

255,892

individuals purchasing or selecting lower-sodium items

Note: SRCP recipients vary in size and scope of work, so performance measures are not necessarily comparable across recipients.
