PDF/Image Export

- Title
    - Video Tutorial for the Interactive Atlas of Heart Disease and Stroke
    - How to print or save a map using the PDF Image Export tool
    - https://nccd.cdc.gov/DHDSPAtlas/
- Transcript
    - The PDF Image Export tool allows the user to print or save a map for use in a document or publication. Prior to launching the tool, create a map by selecting the map area, data and filters in the left navigation bar. You can also watch the video tutorial 'How to Create a Map'. Once the desired map has been created, move the cursor to the top navigation panel and select the PDF/Image tool. A new dialog will appear. Move the cursor to the dialog. Navigate to the 'Layout Type' dropdown box and select the desired map layout. Then navigate to the 'Output Type' dropdown box and select the appropriate output type. Move the cursor to the green button and select 'Generate Preview'. A preview of the export will appear. Select the green 'Print' button to export the file. The file will be displayed in a new browser tab and can be saved or copied and pasted into a document. This concludes the video tutorial for printing or saving a map using the PDF Image Export Tool.
