

PHARMACY, PODIATRY, OPTOMETRY, AND DENTISTRY TOOLKIT  
Working Together to Manage Diabetes

# HELP YOUR PATIENTS WITH DIABETES GET THE CARE THEY NEED.

Too many people with diabetes are not getting annual foot, eye, and oral exams, or managing their medications.

**You have the power to change that.**

The enhanced *Working Together to Manage Diabetes Toolkit* empowers pharmacists, podiatrists, optometrists, dentists, and other providers to deliver more integrated health care for patients with diabetes.

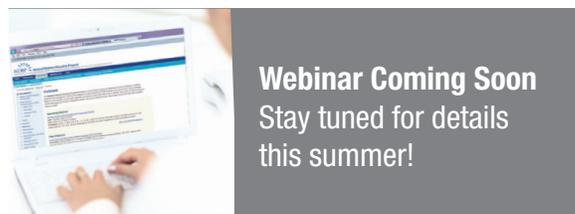

When you work in tandem with other health care providers, you become even more effective at recognizing the early danger signs of diabetes, decreasing the risk for complications, and managing medication therapy.

» To download your **FREE** toolkit, visit [www.cdc.gov/diabetes/ndep/ppod.htm](http://www.cdc.gov/diabetes/ndep/ppod.htm).

You can help your patients avoid the many health complications related to diabetes, including:

- Cardiovascular disease
- Blindness
- Nontraumatic amputations
- Kidney disease
- Periodontal disease

» Almost 26 million Americans have diabetes. Likely some are your patients.

**Webinar Coming Soon**  
Stay tuned for details this summer!

» For your patients with diabetes, the best care is team care.

Your **FREE kit** comes with a comprehensive, easy-to-use guide, evidence-based patient education materials, and a customizable PowerPoint presentation.
