Hurricanes

are dangerous storms that can cause significant damage and loss of life. It is important to be prepared and know what to do during and after a hurricane.

Hurricane Safety

- Listen to local news or NOAA weather radio for updates and warnings.
- Stay away from coastal areas and areas with flooding risk.
- Stay indoors during the storm and take cover in a sturdy building with a strong roof.
- Use generators safely to avoid carbon monoxide poisoning.
- Do not use charcoal grills in closed spaces.
- Keep emergency supplies ready.
- Call 911 for assistance.
