The Flood is Over. What do you do now?

Be Careful in Your Home

Follow these simple steps to be safe.

Always wash your hands with soap and water after you have touched flood water, or anything that has been in the flood water.

Throw away any of your things that have been in flood water.

Always tell an adult if you:
- Feel dizzy, weak or sick
- Throw up
- Have pain in your chest
- Feel confused
- Have a headache

Tell an adult if you smell a bad odor or hear a hissing noise in your house.

If your feel funny at night and can’t wake your mom or dad call 9-1-1 right away and go to a neighbor’s house for help. Do not go back into your house until help arrives.
