

Applying CDC's Guideline for Prescribing Opioids: Module 9: Opioid Use During Pregnancy

WB2958

PROGRAM DESCRIPTION: The goal of this training is to provide an overview of the unique considerations of opioid use and pregnancy, and to outline recommended practices for before and after childbirth. This module will require practitioners to consider the implications of opioid use that are unique to women and identify risks of opioid use during pregnancy. This activity will also give practitioners the opportunity to learn about best practices for prenatal care when opioids are being used, as well as best practices for postpartum care of mother and child in cases of opioid use disorder (OUD).

Please refer to the *CDC Guideline for Prescribing Opioids for Chronic Pain* for additional information as needed during this training.

OBJECTIVES:

At the conclusion of the session, the participant will be able to:

- 1) Recognize that opioid use by women presents unique considerations
- 2) Identify risks of opioid use during pregnancy
- 3) Explain how preconception care can help improve maternal and neonatal outcomes
- 4) Describe best practices concerning opioid use during prenatal care
- 5) Describe best practices concerning opioid use during postpartum care of mother and child

FACULTY/ CREDENTIALS:

Christina A. Mikosz, MD, MPH Medical Officer, Prescription Drug Overdose Health Systems Team, Division of Unintentional Injury Prevention, National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control (CDC)

ORIGINATION DATE December 28, 2018
RENEWAL DATE: December 28, 2020
EXPIRATION DATE: December 28, 2022
