

APPLYING CDC'S GUIDELINES FOR PRESCRIBING OPIOIDS: MODULE 5: ASSESSING AND ADDRESSING OPIOID USE DISORDER (OUD)

WB2863

PROGRAM DESCRIPTION: This module will cover the CDC-recommended options for assessing and addressing opioid use disorder (OUD). The goal of this training is to have participants understand how opioid use disorder is diagnosed using the Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5) assessment criteria, and determine how to discuss this diagnosis with patients. Additionally, this training seeks to increase practitioners' understanding of the different types of medications used for medication assisted therapy for OUD. Please refer to the *CDC Guidelines for Prescribing Opioids for Chronic Pain* for additional information as needed during this training.

OBJECTIVES:

At the conclusion of the session, the participant will be able to:

1. Describe Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5) assessment criteria for OUD
2. Describe how OUD is diagnosed and how it can be discussed with patients
3. Describe the types of medications used in medication assisted therapy (MAT)
4. List patient and provider resources for the treatment of OUD

FACULTY/CREDENTIALS:

Christina A. Mikosz, MD, MPH

Medical Officer, Prescription Drug Overdose Health Systems Team, Division of Unintentional Injury Prevention, National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC), Office of Noncommunicable Diseases, Injury and Environmental Health (ONDIEH)
