

CDC's Antibiotic Resistance (AR) Solutions Initiative

COMBATING THE GLOBAL THREAT OF UNTREATABLE INFECTIONS

CDC
is leading
efforts to:

- Tackle the threat of antibiotic resistance (when bacteria no longer respond to the drugs designed to kill them)
- Transform how CDC and partners address and slow resistance at all levels
- Empower the nation to respond comprehensively, efficiently, and effectively

CDC is investing in every state to combat AR in:

- Healthcare-associated infections
- Community infections, like drug-resistant gonorrhea
- Foodborne infections

How does CDC help combat AR near you?
