

Eastern Equine Encephalitis Virus Neuroinvasive Disease* Average Annual Incidence by County, 1996-2010

* Neuroinvasive disease includes cases reported as encephalitis, meningoencephalitis, or meningitis. Cases are reported by county of residence.

Data Table: This map shows the distribution of Eastern equine encephalitis virus neuroinvasive disease (encephalitis and/or meningitis) average annual incidence from 1996 through 2010. Counties are shaded according to incidences ranging from less than 0.05, 0.05 to 0.19, and greater than 0.2 per 100,000 population. Shaded counties are distributed along the Gulf Coast, Eastern seaboard, and the Great Lakes. Most of the highest incidence counties are in Florida, southeastern Georgia, southern Alabama, and the Carolinas.
