

The Office of the National Coordinator for
Health Information Technology

Medicaid and Public Health Community of Practice

Jointly supported by the Centers for Disease Control and Prevention and the Office of the National Coordinator for Health IT

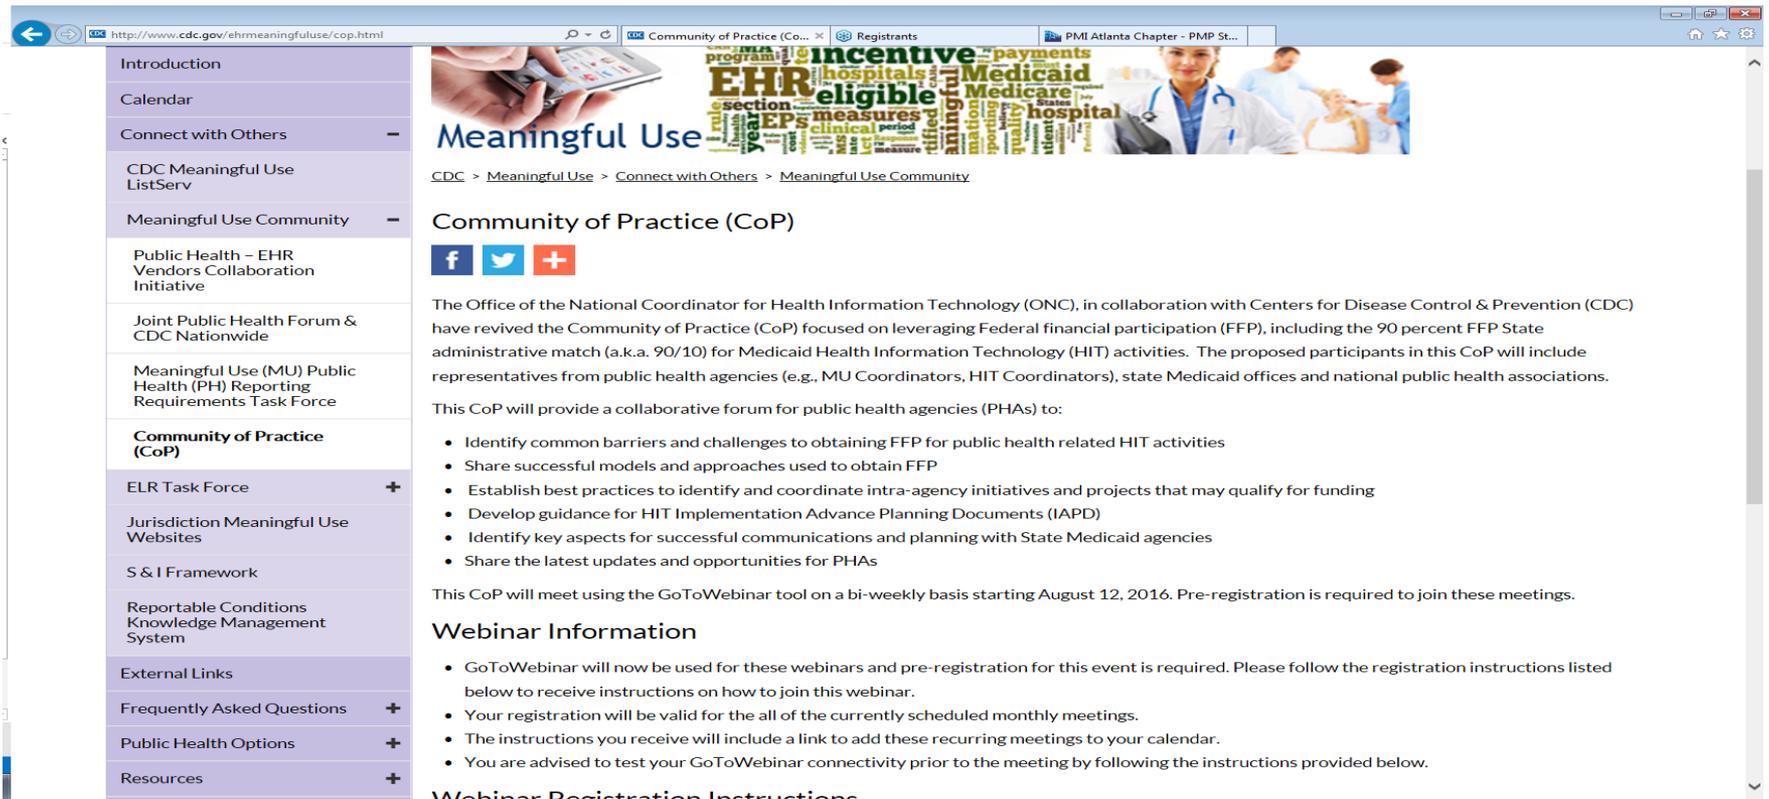

August 26, 2016

- The slides will be available after the webinar.
- Please submit questions during the presentation via the chat function.
- In addition, at the end of the presentation, we will provide an opportunity for participants to raise their hands to ask questions during the Q&A.

CoP Meaningful Use Website

- <http://www.cdc.gov/ehrmeaningfuluse/cop.html>

The screenshot shows the CDC website for the Meaningful Use Community of Practice (CoP). The page is titled "Meaningful Use" and "Community of Practice (CoP)". It includes a navigation menu on the left with items like "Introduction", "Calendar", "Connect with Others", "CDC Meaningful Use ListServ", "Meaningful Use Community", "Public Health - EHR Vendors Collaboration Initiative", "Joint Public Health Forum & CDC Nationwide", "Meaningful Use (MU) Public Health (PH) Reporting Requirements Task Force", "Community of Practice (CoP)", "ELR Task Force", "Jurisdiction Meaningful Use Websites", "S & I Framework", "Reportable Conditions Knowledge Management System", "External Links", "Frequently Asked Questions", "Public Health Options", and "Resources".

The main content area features a word cloud with terms like "incentive", "payments", "Medicaid", "Medicare", "hospitals", "eligible", "EHR", "section", "measures", "clinical", "period", "quality", "patient", "hospital", "program", "rule", "year", "EPs", "cost", "difficult", "national", "supporting", "ability", "patient", "Public Health". Below the word cloud is a photo of healthcare workers. The text on the page reads:

CDC > Meaningful Use > Connect with Others > Meaningful Use Community

Community of Practice (CoP)

The Office of the National Coordinator for Health Information Technology (ONC), in collaboration with Centers for Disease Control & Prevention (CDC) have revived the Community of Practice (CoP) focused on leveraging Federal financial participation (FFP), including the 90 percent FFP State administrative match (a.k.a. 90/10) for Medicaid Health Information Technology (HIT) activities. The proposed participants in this CoP will include representatives from public health agencies (e.g., MU Coordinators, HIT Coordinators), state Medicaid offices and national public health associations.

This CoP will provide a collaborative forum for public health agencies (PHAs) to:

- Identify common barriers and challenges to obtaining FFP for public health related HIT activities
- Share successful models and approaches used to obtain FFP
- Establish best practices to identify and coordinate intra-agency initiatives and projects that may qualify for funding
- Develop guidance for HIT Implementation Advance Planning Documents (IAPD)
- Identify key aspects for successful communications and planning with State Medicaid agencies
- Share the latest updates and opportunities for PHAs

This CoP will meet using the GoToWebinar tool on a bi-weekly basis starting August 12, 2016. Pre-registration is required to join these meetings.

Webinar Information

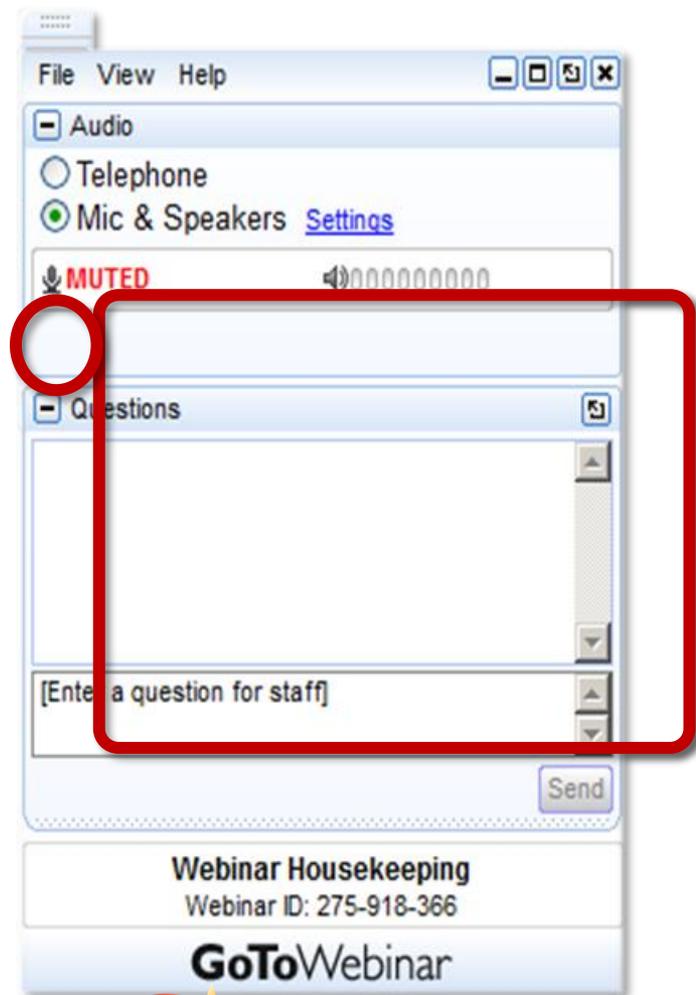

- GoToWebinar will now be used for these webinars and pre-registration for this event is required. Please follow the registration instructions listed below to receive instructions on how to join this webinar.
- Your registration will be valid for the all of the currently scheduled monthly meetings.
- The instructions you receive will include a link to add these recurring meetings to your calendar.
- You are advised to test your GoToWebinar connectivity prior to the meeting by following the instructions provided below.

Webinar Registration Instructions

How to submit or ask questions for the panel members?

Submit or Ask Questions

- Submit your text question and comments using the Question Panel
- Please raise your hand to be unmuted for verbal questions.

Agenda

TRADING PARTNER REGISTRATION (TPR) SYSTEM

Brian K. Moore

TDH Meaningful Use Coordinator

08/26/2016

What is TPR?

- An application that allows potential trading partners to register their intent to electronically exchange data with TDH
- A way for potential trading partners and TDH to efficiently communicate
- A mechanism for eligible professionals and eligible hospitals to register their intent for Meaningful Use with TDH
- Application developed by TDH surveillance team and NICUSA, Inc.

To ensure secure access to State of Tennessee applications, the security certificates have been upgraded. Some older web browsers and systems with older operating systems may be unable to login or view the site. If you are experiencing a problem please click the link below to see the minimum requirements to access this site. [Minimum Browser and Operating System Requirements](#)

If you need further assistance please contact:

NIC, TN - TN.gov Help Desk

(615) 313-0300 or 1-866-8TN-EGOV

E-mail: help@egovtn.org

? What Is Trading Partner Registration

An application that allows potential trading partners to register their intent to electronically exchange data with TDH

A way for potential trading partners and TDH to efficiently communicate

A mechanism for eligible professionals and eligible hospitals to register their intent for Meaningful Use with TDH

📄 What You Will Need

PAAMS Account (username and password) to log into the system

Information that might come from many different sources within your organization, including:

✓ What You Can Do

CAN register intent to electronically exchange data with TDH

CAN view your progress through the on-boarding process of each registered interface

CAN document relationships between entities in your organization

CANNOT use the system for the actual electronic data exchange

+ Information on Using the Trading Partner Registration System

[Trading Partner Registration User Guide](#)

Available Entities

[Print Screen](#)

Trading Partner Registration is an application that allows the Tennessee Department of Health and all registered trading partner entities to efficiently communicate.

In most cases, you will use the system as yourself. Occasionally, there will be more than one record of you, if multiple trading partners have registered you as an entity below them. In certain situations, you may wish to view another trading partners milestone status or information. You can have access to all of these records, if they already exist, once you request access to them. If no record of you currently exists, you can create a new record.

Please select which entity you would like to use the system as. If there are no entities available, or you would like to request access to view another entity, select "Add New Entity".

[Add New Entity](#)

Search Entity Records

[Print Screen](#)

To utilize the trading partner registration system, you must be registered in the system.

In certain situations, you may have already been registered in the system. You must search for your records before beginning a new registration. If you have already been registered in the system, you will be able to request access to that registration. Once approved, that record will be linked to your Paams account, and available to you on the Available Entities screen. If you are not yet in the system, you will be able to begin a new registration.

Search for your Records

Search by any of the identifiers below to locate your records. If you have been registered by multiple trading partners already, you will be able to request access to all of those records.

Entity TypeChoose an option... **Entity Name**

HealthOne

IdentifiersChoose an option... **Identifier**

Identifier

[Search for your Records](#) [Back to Available Entities](#)

Entity Results

Print Screen

Entity records listed here were registered by another trading partner. To view these records, you must request access to them. The trading partner that controls these records then has the option to either approve or deny your request for access. If your request is approved, the entity record will be available under your Available Entities screen immediately following login.

Please select which entity you would like to request access to. There are three different levels of access:

View Access: With view access you will be able to view milestones and entity information.

Edit Access: With edit access you will be able to view milestones and edit entity information.

Approval Access: With approval access you will be able to view milestones, edit entity information, and approve user requests to the entity record.

1 to 1 of 1 records

[Search Again](#)

Entity Classification

What is a Classification?

For the purpose of registration, trading partners are grouped into classifications. The three trading partner classifications include Organizations, Facilities, and Professionals. During the registration process, you will be able to register multiple affiliated Organizations, Facilities, and Professionals, allowing you to document the hierarchy of relationships between your parent Organization or Facility, and other affiliates. Associated on-boarding documentation will be generated based on how you register. Please review the classifications below for more information.

I am a...

Begin the trading partner registration process by selecting the highest level classification you will be registering. For example, if you are a practice and will be registering your practice as well as the doctors within it, select organization or facility and not professional here.

Organization

Multiple locations.

Organizations can register themselves and multiple affiliated Organizations, Facilities, and Professionals.

Register as an organization for:

- Health System
- Hospital
- Public Health Agency
- Practice
- Clinic
- Laboratory Group
- Pharmacy Group
- Long Term Care Group
- Payer

[Register](#)

Facility

Single location.

Facilities can register themselves and multiple affiliated Professionals. Do not register as a Facility if you will be registering affiliated Organizations and/or Facilities.

Register as a facility for:

- Hospital
- Practice
- Clinic
- Laboratory
- Pharmacy
- Long Term Care
- Payer

[Register](#)

Professional

Individual only.

Professionals can only register themselves. Do not register as a professional unless you have no other affiliated Organizations, Facilities, or Professionals.

Register as an individual for:

- Professional

Interface Selection

[Save](#)[Save & Exit](#)

Select an interface that you will be registering as a trading partner under. You may select multiple interfaces and be a trading partner for each.

Immunization Registry Messaging

In Tennessee, the Immunization Registry (IR) is a statewide registry developed by TDH to be a single source of immunization records for all Tennessee residents. The IR gives authorized immunizing providers the ability to electronically record, change, and access comprehensive immunization information on any patients in the system. The IR accepts immunizations administered in **any** clinical setting by **any** immunization provider to recipients of **all ages** using interoperability standards.

Electronic Lab Reporting

In Tennessee, ELR is the electronic submission of laboratory results thought to be indicative of a reportable condition, disease, or event, as described by the TDH in Tennessee Code Annotated AA568 Rule 1200-14-01-.02, using interoperability standards. The potential benefits of ELR include the automation and standardization of the laboratory reporting process, timelier laboratory reporting, and ultimately improved validity and reliability of information for better case detection, surveillance, and disease investigation activities.

Cancer Case Reporting

In 1983, the Tennessee Assembly passed Tennessee Code Annotated 68-1-1001, which required all health care practitioners and **facilities that diagnose and/or treat cancer** patients to report cancer case information to the TDH. In May, 2000, the Tennessee Assembly amended the law to bring it into conformity with Public Law 102-515, adopted by the U.S. Congress in 1992, which established the National Program of Cancer Registries housed within the Centers for Disease Control & Prevention, U.S. Department of Health & Human Services.

Syndromic Surveillance Messaging

The Tennessee Communicable and Environmental Disease Services and Emergency Preparedness (CEDEP) Division within the Tennessee Department of Health (TDH) has programmatic oversight of Syndromic Surveillance activities across the state. Currently, all 13 Tennessee Public Health regions receive data from select emergency departments and perform Syndromic Surveillance activities. Syndromic Surveillance messaging provides an electronically automated secure and standardized mechanism for communicating Syndromic Surveillance data from **eligible hospitals' (EH) emergency departments** to TDH to support Syndromic Surveillance. Syndromic Surveillance is defined as public health surveillance emphasizing the use of timely pre-diagnostic data and statistical tools to detect and characterize unusual activity for further public health investigation.

The image displays two side-by-side screenshots of an Outlook email interface, showing the progression of an immunization registry registration for MidSouth Health, LLC.

Left Screenshot: "Immunization Registry Messaging Registration Submitted - Message"

- From:** do-not.respond@tn.gov
- To:** MU Health
- Subject:** Immunization Registry Messaging Registration Submitted
- Body:**

This email is to confirm that MidSouth Health, LLC successfully submitted a registration for Immunization Registry Messaging with the Tennessee Department of Health (TDH).

A confirmation email will follow once the registration has been reviewed and approved.

Please retain a copy of this email for your records.

Right Screenshot: "Immunization Registry Messaging Registration Approved - Message (Placeholder)"

- From:** do-not.respond@tn.gov
- To:** MU Health
- Sent:** Wed 8/17/2016 6:16 PM
- Subject:** Immunization Registry Messaging Registration Approved
- Body:**

This email is to confirm that registration for MidSouth Health, LLC has been approved by the Tennessee Department of Health (TDH) for Immunization Registry Messaging on 08/17/2016.

TDH will contact you with the next steps in the on-boarding process. Information regarding on-boarding processes can be found at <https://www.tennesseeiis.gov/tnsiis/>.

Please retain a copy of this email for your records.

Both screenshots show a retention policy of 90 days for all folders, expiring on 11/15/2016. Below the email content, there are social network integration prompts and placeholder profile photos for the sender (do-not.respond@tn.gov) and the recipient (MU Health).

About the CIIS Resource Center

The CIIS Resource Center is a self-service system that will allow you to do the following:

- Enroll your organization for participation in CIIS.
- Submit new user account requests.
- Access training information and resources.
- Provide access to electronic data exchange guidelines and CIIS messaging specifications.
- Test Health Level 7 (HL7) messages generated from your EHR against CIIS specifications for formatting accuracy (HL7 validation).
- Receive assistance with Stage 1 Meaningful Use attestation for the immunization registry reporting objective.
- Register your intent for Stage 2 Meaningful Use.
- Submit online support tickets to the CIIS Help Desk for assistance.

Step 5: CIIS Manner of Usage

STEP 5: Manner of IIS Usage

*How does your clinic plan to report its immunization data to the CIIS?

- Direct Data Entry - Manually enter data into CIIS web application
- Electronic Data Exchange (HL7) - Electronically report data to the CIIS through an interface from EHR.

Clinic Technical Contact

As part of creating an interface with CIIS, you will need to identify someone as the IT/Technical contact that will work with the CIIS Program to establish the interface.

Are you the Technical Contact for this Clinic?

Yes No

Data Validation Contact

As part of creating an interface with CIIS, you will need to identify someone who can pull 30 patient records so that we can perform a data validation check. This is generally someone within the clinic. Please identify this person below:

Are you the Data Validation Contact for the Clinic?

Yes No

Electronic Health Record Information

Does the Provider Site currently record immunizations in an Electronic Health Record (EHR)?

Yes No

Please provide your EHR information:

Provider - Invite to Onboard

COLORADO Department of Public Health & Environment

Dedicated to protecting and improving the health and environment of the people of Colorado

Demo Hospital Extravaganza	NPI:
369 Demo Plaza	Medicaid #:
55	Medicare UPIN:
Denver, CO, 45897	Reporting Period: 10/01/2014

Purpose: Meaningful Use Stage 2 Onboarding Invitation 03/18/2015

Dear Archie Demo,

Demo Hospital Extravaganza registered its intent with the Colorado Department of Public Health and Environment (CDPHE) to submit ongoing data to the Colorado Immunization Information System (CIIS) to meet the Stage 2 Meaningful Use Immunization Reporting Objective.

Your site has been moved to the top of the CIIS waiting list queue, and we are now inviting you to onboard with us. Onboarding refers to the testing and validation processes that each site must go through in order to implement an interface from their Electronic Health Record (EHR) to CIIS. Providers seeking to meet the Stage 2 Meaningful Use Immunization Reporting Objective will be required to provide actual patient data from production systems (not systems use for testing). We will work with your technical and clinical team to help you successfully submit immunization data on an ongoing basis to CIIS.

This email is CDPHE's official written request for action. Please contact the CIIS Program as soon as possible to move your facility forward in the onboarding process. You may reply to this email to initiate contact.

Please note: Entities that fail to participate in the onboarding process as demonstrated by failure to respond to CDPHE's written requests for action within 30 days on two successive occasions may not meet the Stage 2 Meaningful Use measure.

Please contact CIIS Interoperability Coordinator Kim Gulliver at kim.gulliver@state.co.us or 303-692-2644 with any questions.

Best,

Kim Gulliver, MS

Department of Public
Health & Environment

Dedicated to protecting and improving the health and environment of the people of Colorado

Darrin Colorado TEST	NPI:
1222 somewhere blvd	Medicaid #:
	Medicare UPIN:
Lyons, CO, 80540	Reporting Period: 07/01/2014

Purpose: MU Stage 2 - 1st Non-Responsive Notice (Invite to Onboard) 09/09/2015

Dear Darrin Jasa,

On 04/08/2014, Darrin Colorado TEST registered its intent with the Colorado Department of Public Health and Environment (CDPHE) to submit ongoing data to the Colorado Immunization Information System (CIIS) to meet the Stage 2 Meaningful Use Immunization Reporting Objective.

On 12/24/2014, the CIIS Program sent you an invitation to onboard. Per the Center for Medicare & Medicaid Services (CMS) guidelines, you have 30 days to respond to the invitation.

This is your first Failure to Respond notice. You must respond to this notice within 30 days of receipt to begin the onboarding process as failure to do so will result in your site being removed from the onboarding queue and may result in a delay of your Meaningful Use attestation.

Providers that fail to respond within 30 calendar days to a request for action from CDPHE on two separate occasions may not meet the Meaningful Use Stage 2 Immunization Reporting Objective.

Please contact me with any questions at kim.gulliver@state.co.us or 303-692-2644 to initiate the onboarding process.

Best,

Kim Gulliver, MS
Interoperability Coordinator
Colorado Immunization Information System
