Medicaid and Public Health Community of Practice

Jointly supported by the Centers for Disease Control and Prevention and the Office of the National Coordinator for Health IT

January 26, 2018
Reminders

• The slides will be available after the webinar.
• Please submit questions during the presentation via the chat function.
• In addition, at the end of the presentation, we will provide an opportunity for participants to raise their hands to ask questions during the Q&A.
CoP Meaningful Use Website

Submit or Ask Questions

- Submit your text question and comments using the Question Panel
- Please raise your hand to be unmuted for verbal questions.
Agenda

• Introductions/Announcements

• Leveraging 90/10 Medicaid Funding: Immunization Information Systems (IIS)
  » Sharon Butler, Oklahoma State Department of Health
  » Jenne McKibben, Oregon Health Authority

• Discussion/Q&A

• Proposed Next Steps
Topics

• Oklahoma State Immunization Information System (OSIIS)
• OSDH 90/10 funding process
• Challenges and Successes
• Future of Health-e Oklahoma (HeO)
OSIIS

- Provider user interface accessible at clinics, schools, and childcare centers
- Repository of immunization records
- Reports based on the immunizations submitted to OSIIS
- Inventory management
- Immunization forecaster
90/10 Funding Process

- Oklahoma receives 90/10 funding through the Health Information Technology (HIT) Advanced Planning Document (APD)
- Administered by the Oklahoma’s Medicaid Authority, Health Care Authority (OHCA).
- OHCA’s Electronic Health Record (EHR) Incentive Program

- State Department of Health (OSDH) for the development of public health messaging through the project Health-e Oklahoma (HeO)
- OSDH provides the 10% match in state funds for public health messaging portion of the HIT APD
OSDH 90/10 Funding Process

- OSDH pays invoices and salaries
- Invoices OHCA
- OHCA draws down the 90% from CMS
- Provides the funds to OSDH
- OSDH provides the 10% match in state funds for public health messaging portion of the HIT APD
HIT APD 90/10 Funding

- HeO components:
  - Master Person Index (MPI)
  - Enterprise service bus
  - Meaningful Use (MU) Website.
- HeO application development staff
- MU staff
- Training
- Public Health Messaging
  - Immunization
  - Lab
  - Cancer
  - Child and Adolescent Record (CAR)
    - Body Mass Index (TBD)
    - Other specialty registries TBD

Health-e Oklahoma
OSDH Informatics

- Looking at all types of public health messaging
- Global process for all MU public health messages
- Informatics MU staff
  - Maintains the MU Website
  - Registration and Onboarding providers
  - Tests all types of public health messages for proper structure
- MU message testing consolidated in Informatics.
  - Immunization
  - Lab
  - Cancer
  - Child and Adolescent Record (CAR)
    - Body Mass Index
    - Other specialty registries TBD
Oklahoma MU Website

- Providers register
- Informatics MU staff onboards providers
- Providers submit test messages to NIST and provide documentation
- Providers submit test messages to MU Website
- Successful structure - moves to data quality
- Messages move into OSIIS
Challenges and Successes

• Collaborate closely Medicaid authority (OHCA)
• Collaborate closely CMS
  ‒ Receive feedback

• Defining implementation
  ‒ When are you implemented
  ‒ What is maintenance during implementation
  ‒ CMS may pay costs that could become maintenance post-implementation
Future

- OSIIS II – not funded under HIT APD
  - Adding adhoc reporting capabilities
  - Other requirements TBD

- HeO
  - Lab
  - Cancer
  - Child and Adolescent Record (CAR)
    - Body Mass Index
    - Other specialty registries TBD
Contact Information

• Becki Moore, State HIE Director
  – Becki.Moore@omes.ok.gov

• Sharon Butler, Enterprise Services Manager

The Oregon Experience
Medicaid and Public Health Community of Practice
January 26, 2018

Jenne McKibben, ALERT IIS Director
Oregon Health Authority

- OHA multi-project proposal
- Goal: work with other Public Health programs to submit a combined proposal to CMS
Oregon Health Policy & Analytics

Office of Health Information Technology (OHIT)

- Submitted Implementation Advance Planning Document (IAPD) to CMS
- Included components from across the Oregon Health Authority
- Provided technical assistance to PH
Oregon Public Health Division

Previous attempts at 90/10 efforts

• small or single program proposals were not successful

• minor success in 2014
  – 1-2 FTE for Meaningful Use Staffing
  – ALERT IIS received 0.25 FTE funding for 2 years
Public Health Team
• Brought together programs who were already engaged in Meaningful Use activities
• Questions to Public Health Team (February 2017)
  – E.g. Does your proposal encourage the adoption of certified EHR technologies by eligible (Medicaid) providers to promote health care quality and the exchange of health care information?
Oregon Public Health Division

• Templates used by each program merged together for formal submission by OHIT
• Theme used throughout request to connect projects: Public Health Modernization
• Final IAPD document over 125 pages
  – 79 varying personnel asks
  – 54 vendor contracts
  – 15/37 activities/sections were included in Public Health Modernization Section
Oregon Immunization Program

- Limited program funding is primarily federal
- Continual increase costs required to maintain statewide immunization information system
- OIP pressed forward internally due to the continued support nationally for IISs to pursue these funds
ALERT IIS
Immunization Information System

• 1996 established statewide registry with home grown system
• 2003 OIP made strategic decision to incorporate ALERT use into all program practices
• 2010 transitioned to Wisconsin Immunization Registry (WIR) based platform
• 2018 more that 90% data received via data exchange
• Ongoing participation with national associations and federal partners
Challenges

• IT contracts require longer term funding
• Difficult to complete all requirements for this funding with small IIS staff – working with larger team is essential

Successes

• MU incentives have greatly increased submission from adult immunizers in Oregon
• These new funds critical for OIP to maintain necessary staffing for increasing partner requests
Funding Awarded 12/14/17

- Public Health Division awarded close to $9 million
- Immunization Program awarded over $600,000
- Match: state general funds
ALERT IIS
Immunization Information System

Funding

• Support for staff who onboard clinics seeing Medicaid patients (the majority of clinics)
• Small contract request to support interoperability and reporting enhancements
• May consider a larger enhancement request in the future but need to complete pending enhancements funded by other sources in 2018
Changes to procurement approval process for these funds

- Staffing codes
- RFP processes
- Contracts
  - Held specific training
- Document requirements at all levels
  - Program, Center, Division, OHIT, CMS
- Must use funds exactly as described in request
- Start next IAPD to continue funding cycle

Question and Answer Session

How to submit or ask questions for the panel members?

Submit or Ask Questions

- Submit your text question and comments using the Question Panel
- Please raise your hand to be unmuted for verbal questions.
Next Steps/Homework

- Next Call: February 23, 2018 2-3PM EST.
- Please comment on ONC’s Draft Trusted Exchange Framework ([https://www.healthit.gov](https://www.healthit.gov)) you have until February 20.
- Invitations from Basecamp—Please start discussions and post resources. All slides will be posted here as well as CDC’s Meaningful use website ([https://www.cdc.gov/ehrmeaningfuluse/](https://www.cdc.gov/ehrmeaningfuluse/)).
- Send topics/ideas/questions for future CoP meetings to [meaningfuluse@cdc.gov](mailto:meaningfuluse@cdc.gov) or post them to Basecamp.
