

Anthony M. DiGiorgio, D.O., M.H.A., Associate Professor, Department of Neurological Surgery, University of California, San Francisco, California.

Dr. Anthony DiGiorgio is a neurosurgeon and health policy scholar with extensive experience in health services research and healthcare financing policy. He holds a Doctor of Osteopathic Medicine and a Master of Health Administration, with academic appointments focused on Medicaid policy, health system performance, and outcomes research. His work bridges clinical care with population-based health services analysis, including studies on access to care and payment models. He has contributed to national discussions on healthcare quality measurement and policy reform.

Christine Hall, B.S.H.M., C.H.C., President and Senior Consultant, Stirling Global Solutions, LLC, Port St. Lucie, Florida.

Christine Hall is a healthcare compliance and health information management expert with over 30 years of experience across physician practices, health systems, and consulting organizations. She holds a bachelor's degree in health information management and has advanced expertise in health statistics, risk adjustment, coding systems, and federal reporting standards. Her work focuses on the privacy and security of electronic health information, HIPAA compliance, and data integrity in electronic health records. She has led compliance programs, supported regulatory audits, and advised on healthcare financing and reimbursement accuracy.

Regina E. Herzlinger, D.B.A, Nancy R. McPherson Professor of Business Administration, Harvard Business School, Boston, MA.

Regina Herzlinger is a nationally recognized scholar in healthcare innovation, financing, and consumer driven health systems. She holds a Doctorate in Business Administration from Harvard Business School and has authored foundational work on healthcare markets, payment models, and system reform. Her work focuses on healthcare financing, consumer access to health information, and the role of data and transparency in improving health system performance. She has advised policymakers, health systems, and industry leaders on sustainable healthcare delivery models.

Michael D. Hogue, PharmD, Executive Vice President and Chief Executive Officer (CEO), American Pharmacists Association, Washington, District of Columbia.

Michael D. Hogue, PharmD has more than 30 years of experience in pharmacy practice as both a pharmacy owner and a staff pharmacist, as well as an ambulatory care provider in family and preventive medicine. He is an accomplished academician, having served on the faculty at Samford University and Loma Linda University. Prior to becoming CEO of APhA in 2023, Dr. Hogue was the Dean of Pharmacy at Loma Linda University, as well as the Director of Interprofessional Education and Practice. He served on the original staff development team for APhA's Pharmacy-Based Immunization Delivery certificate program, and is regarded as one of the nation's leading experts on vaccines in pharmacy practice.

Jordan M. Johnson, M.S.H.A., Founder, Bridge Oncology, Pelahatchie, Mississippi.

Jordan M. Johnson is a healthcare data science and analytics leader specializing in value-based care, price transparency, and oncology services. He holds a Master of Science in Health Administration, a law degree, and clinical training in radiation therapy and radiologic technology, combining clinical, administrative, and legal expertise. His work focuses on health data analytics, alternative payment

models, health care financing, and compliance with federal requirements related to pricing, fraud prevention, and transparency. He has led the development of data platforms and analytic tools used to evaluate payment models, operational efficiency, and access to oncology care, particularly in rural and community-based settings.

Joseph E. Marine, M.D., M.B.A., Professor of Medicine, Johns Hopkins University School of Medicine, Baltimore, Maryland.

Dr. Joseph Marine is a cardiologist and cardiac electrophysiologist with extensive leadership experience in academic medicine and healthcare operations. He holds an MD and an MBA, combining clinical expertise with experience in healthcare management, financing, and system operations. His research includes population-based studies, health outcomes analysis, and the use of electronic health information in clinical decision-making. He has held senior leadership roles overseeing clinical quality, operational performance, and health system integration.

Trudie F. Milner, Ph.D., Adjunct Assistant Professor, College of Health Professions, Medical University of South Carolina, Charleston, South Carolina.

Dr. Trudie Milner is a healthcare executive, educator, and researcher with extensive experience in health system operations, population-based research, and healthcare delivery innovation. She holds a PhD in Sociology and has led large-scale hospital and ambulatory care operations in both urban and rural settings. Her work includes community-engaged public health research, health services research, and the integration of research capacity into healthcare delivery systems. She has published on population health, environmental health, and community-based health outcomes.

Paula Muto, M.D., F.A.C.S., Founder and Chief Executive Officer of UBERDOC, Boston, Massachusetts.

Dr. Paula Muto is a board-certified vascular surgeon and healthcare innovator with over 25 years of clinical experience. She holds an MD and has led efforts to modernize healthcare delivery through technology-enabled patient access platforms. Her work focuses on improving access to health services, consumer engagement in health information, and reducing barriers created by traditional healthcare financing and referral systems. She combines clinical practice with leadership in digital health innovation.

Anh T. Nguyen, Ph.D., M.S.P.H., Strategic Data Consultant, Onvida Health and Founder and Principal Consultant, Taxlocity, LLC, d/b/a Connected Insights, Omaha, Nebraska.

Anh Nguyen is a health data executive with more than 15 years of experience leading enterprise data strategy, data governance, and analytics across payer, provider, health information exchange, and public health environments. She serves as Chief Data Officer for Connected Insights, where she supports healthcare organization, including health systems and medical centers as well as public-sector partners, in designing data governance programs and interoperable data architectures that strengthen data quality and decision support.

Dr. Nguyen holds a PhD in Health Services Research, Administration, and Policy. Her expertise includes health data standards, interoperability, and large-scale clinical and administrative data integration in support of value-based care, population health, and public-sector analytics. She has collaborated with

federal agencies and contributed to national initiatives focused on health data infrastructure and analytics governance.

Sean M. Weiss, C.H.C., Partner and Vice President of Compliance, DoctorsManagement, LLC, Knoxville, Tennessee.

Sean Weiss is a healthcare compliance executive with over three decades of experience in regulatory oversight, healthcare data integrity, and risk management. He specializes in compliance related to electronic health information, HIPAA privacy and security, and federal healthcare payment programs. His work includes auditing, health data analysis, and serving as an expert on healthcare fraud, abuse prevention, and regulatory compliance. He has advised hospitals, physician groups, and government entities on healthcare data governance and compliance systems.

Kelly M. Willenberg, D.B.A., R.N., C.H.R.C., C.H.C., Owner, Kelly Willenberg and Associates, Greenville, South Carolina.

Kelly M. Willenberg specializes in healthcare research compliance. With over 35 years of clinical research experience, she holds a bachelor's degree in nursing and a Doctorate in Business Administration. Kelly frequently speaks and trains on compliance issues. She has been recognized for her advocacy work strengthening distracted driving laws following the tragic loss of her husband. She serves on the Board of Directors for the Healthcare Compliance Association/Society for Corporate Compliance and Ethics, and participates in multiple healthcare and compliance initiatives.
