I'll protect my baby.

I'll get my flu vaccines.

Even if you're healthy, if you live with or care for someone at increased risk for serious complications from influenza, including seasonal flu and 2009 H1N1 flu, (sometimes called "swine flu") you should get vaccinated. Groups at high risk include **infants** and **pregnant women**.

Babies younger than 6 months can't be vaccinated against the flu, but they are at high risk for severe complications from seasonal flu and 2009 H1N1 influenza (sometimes called "swine flu").

They rely on *you* to protect them.

Get vaccinated.
